LIST OF OFFICERS ASSOCIATED WITH THE PREPARATION OF MAHARASHTRA STATE REPORT

NAME	DESIGNATION
Dr. Jayant Tekale	Dy.Commissioner (Agril. Census)
Dr. Jayant Tekale	Statistician
Shri. Hanmant Shinde	Asstt. Statistician
Shri. Sunil Kulkarni	Agriculture Officer
Shri. Girish Phegde	Technical Director, NIC, Pune
Shri. Vishram Chowsalkar	Scientist E, NIC , Pune
Smt. Sonali Shidore	Scientist C, NIC, Pune
Shri. Shirish Gorhe	Agriculture Supervisor
Shri. Shashikant Vishwasrao	Agriculture Supervisor

PREFACE

This is the tenth report on Agricultural Census pertaining to the year 2015-16 brought out by the Department of Agriculture, Maharashtra state. It was conducted in the State to collect the data on numbers and area of operational holdings throughout the state.

It is important to note that 9th census was done first time by extracting land record data from their data base and census was done offline. We have cross one step ahead and for 10th census, updated land record data was extracted and dedicated website was developed for field work at tahsil level. The first phase of the Census carried out thoroughly online with the help of NIC, Pune, resulting in saving in time and money and also work load of field machinery. Talathis to whom the responsibility of collecting the appropriate data was entrusted have done good job during the census period.

Results of the Agriculture Census data are extensively utilized not only by different departments but also by researchers, economists and those associated with agricultural planning and development. Results of Census will be considerably helpful for policy planning, formulations and evaluation of various agricultural policies and projects.

I express deep sense of gratitude and thanks to Hon. Additional Chief Secretary, Revenue and Forest for his guidance and support in using computerised land records for his agricultural census work. Without guidance and support of then Hon. Additional Chief Secretary, Agriculture and Marketing, GOM, we will not be able to complete the census work in time and in sophisticated manner. I express deep sense of gratitude and thanks to him also. I appreciate involvement of field staff of Revenue department for their active participation in collection and correction of data in time.

Dr. J. R. Tekale, Statistician and Deputy Co0mmissioner, Agriculture Census successfully monitored fieldwork in all districts with the help of NIC officers who played major role in timely completion of the Census work.

Agriculture Census Officers and Staff completed work of compilation of tables and drafting of this reports. I would therefore, like to place on record excellent services rendered by the present and previous officers and the staff of Agriculture Census Cell.

I am also thankful to the officers and staff of NIC, Pune for taking keen interest and efforts in development of computer programme and giving guidance in data processing.

I am grateful to the officers of Government of India for their guidance and help in the conducting Agricultural census programme in the state.

This report has also been made available on this Department website krishi.maharashtra.gov.in for public use.

Place : Pune.
Date : 27th February, 2019.

Commissioner Agriculture,
Maharashtra State, Pune.

FOREWORD

The government of India has been conducting quinquennial Agriculture Census since 1970-71.It is my great pleasure to put on record the 10th Agriculture Census Report of the Maharashtra State for the year 2015-16.

Operational holding is the basic unit of decision making in Agriculture and therefore for formulation of any meaningful and effective strategy for agriculture development detailed data on structure of agricultural holdings are absolutely necessary. The census data fills in this long felt gap in agricultural statistics. The holding wise information is having considerable utility in planning of agricultural production programmes.

The Agricultural Census 2015-16 is the 10th census in the state. As in the previous censuses & in this census also it was found that the number of small & marginal holdings (below 2.00 ha.) increased and that now they accounted for more than two third i.e.79.5% of the total operational holdings in the state, with a share of 44.96 % in the total operated area.

Another important features in this census was that the average size of holdings has come down from 1.44 ha. which was in 2010-11 to 1.34 ha. in 2015-16 census.

Point is to be noted here that, per capita size of holding is decreased by 0.10 ha. in this census due to decrease in operated area and increasing in the total number of holders.

The staff of revenue department was entrusted with the field work and supervision, without their active co-operation, it would have been difficult to complete the census work. I wish to place here my deep feelings with gratitude.

I recall with gratitude the valuable services rendered by the staff of NIC, Pune associated with the agriculture census computerization.

The Commissioner Agriculture, Maharashtra State, Pune Shri. Sachindra Pratap Singh has taken deep interest and provided useful guidance from time to time. Dr. J. R Tekale, Deputy Commissioner, Agriculture Census and his staff in the census cell exerted a great deal in organizing and completing the voluminous work of agricultural census work 2015-16.

I hope information in the reports will be most useful in decision making in government sector as well as will be useful in planning, extension work and research work.

Agriculture Census Commissioner,
& Secretary, (Agriculture)
Govt.ofMaharashtra,

Place : Pune.
Date : 27th February, 2019.

Technical Notes

1. Definitions

Operational Holding :

All land which is used wholly or partly for agricultural production and is operated as one technical unit by one person alone or with others without regard to the title, legal form, size or location.

Technical Unit :

An unit of land which is under the same management and has the same means of Production such as labour force, machinery and animals.

Operated area :

Operated area includes both cultivated and uncultivated area, provided part of it is put to agricultural production during the reference period. If, for instance, an operational holding consists of four survey numbers out of which one survey number is put to non-agricultural uses, the total area of the operational holding will be equal to the total geographical area of all the four survey numbers.

Operational holder :

A person who has the responsibility for the operation of the agricultural holding and who exercises the technical initiative and is responsible for its operation. He may have full economic responsibility or may share it with others. The operational holder maybe Individual/Joint/ Institutional.

I. ***Individual :*** If the holding is being operated either by one person or by a group of persons who are the members of the same household, such holding will be considered as an individual holding.

II. ***Joint :*** If two or more persons belonging to different households, share jointly as partners in the economic and technical responsibility for the operation of an agricultural holding, such holding will be considered as joint holding.

III. ***Institutional :*** Holdings such as government farms, farms of sugarcane factories, co-operative farms, lands managed by trusts would be treated as institutional holdings.

Size classes and Size groups of Holdings:

The data are presented at All India level and for all States and Union Territories in the following size classes and size groups of operational holdings

Sr. No.	Group	Sr. No.	Classes (in ha.)
I.	Marginal	1.	Below 0.50 ha
		2.	0.50-1.00
II.	Small	3.	1.0–2.0 ha.
III.	Semi-medium	4.	2.0–3.0 ha.
		5.	3.0–4.0 ha.
IV.	Medium	6.	4.0-5.0 ha
		7.	5.0-7.5 ha
		8.	7.5 ha -10.0 ha
V.	Large	9.	10.0–20.0 ha
		10.	20.0 and above

2. Sampling design

For the collection of data in the Agriculture Census, an approach of Census-cum sample survey has been adopted. Various States in the country have been grouped in to two categories *i.e.* land record States and non-land record States. Those States where Comprehensive land records are maintained giving information on land and its utilization, cropping pattern etc are called land record States and those States where such information is not maintained in the form of land-records are called non land record States. In land record States data on Agriculture Census is pooled for all the parcels of an operational holding irrespective of its location. However, for operational convenience the outer limit for pooling is restricted to taluka. This pooling is done for each operational holder in the village of his residence. In the non-land record States the data is collected through sample survey following household enquiry approach in 20% of villages in each block. In these selected villages, all the operational holdings are enumerated following household enquiry approach.

Thus in land record States no sampling is resorted to for data collection for the number and area of operational holdings and in non-land record States sampling of villages in each block/taluka is resorted to.

3. Attributes of disaggregation

This report contains the number and area of operational holdings distributed with reference to the following variables:

- Size category (Marginal, Small, Semi-medium, Medium and Large)
- Social groups (SC, ST and Others)
- Types of Holding (Individual, Joint, Institutional)
- Gender (Male, Female)
- States (all states and Union Territories of Indian Union)

Maharashtra State Report on Number and Area of operational holdings – 2015-16

1. Introduction:-

The department of Agriculture, ministry of Agriculture, Government of Maharashtra, conducts Agriculture census, quinquennilay to collect data on operational holdings in the state. The reference period for Agriculture census is the Agricultural year (July 2015 to June 2016). Being the ultimate unit for taking Agriculture related decision, operational holdings has been taken as statistical unit at micro level to data collection.

The first agriculture census in the state was conducted with reference year 1970-71. So far , eight Agriculture Census have been conducted in the state. The current Agriculture Census with reference year 2015-16 is 10th in the series.

The provisional result for first pores of correct census we released at state in September 2018. After scrutinizing the result at district/ Tahsil level. This data base has now been finalized out is being published in the form of Maharashtra State Report on numbers and area of operational holdings 2015-16.

2. Methodology

2.1 Agriculture Census is the largest countrywide statistical operation undertaken by the Ministry of Agriculture, Government of India for collection of data on the structural profile of Indian agriculture. The first Agriculture Census in the country and also in Maharashtra state was conducted with reference year 1970-71. So far ninth Agriculture Censuses have been conducted at five yearly intervals. The tenth Agriculture Census is presently going on in country and also in Maharashtra state.

2.2 This report presents the summary results obtained during Phase-I of the tenth Agriculture Census with reference year 2015-16 (July to June). Phase-I of the census operation is carried out for all the agricultural operational holdings in the State.

2.3 The Census is carried out in three Phases. In Phase-1, a list of all the holdings with data on primary characteristics like area, gender and social group of the holder and its location code etc. are prepared. During Phase-II detailed data on irrigation status, tenancy particulars, cropping pattern, number of crops taken etc. are collected. Phase III, popularly known as Input Survey, relates to collection of data on the pattern of input use across various crops, regions and size groups of holdings.

2.4 In Maharashtra state where the revenue agency maintains the record of ownership of holdings and regular crop inspections are carried out, such records form the basis for conducting Phase-I of the Census operations. For Phase II, further sampling of holdings is carried out for collection of detailed data.

2.5 In the Maharashtra state, the data on the number and area of holdings is collected in the specified schedules using the land records as benchmark. However, as per the concepts and definitions followed in the Census, effort is made to obtain the de facto position rather than de jure position. A number of parcels of land scattered within a tehsil but operated by an individual or a single household are clubbed together to make a single holding. Similarly, such holdings on which partitions had taken place in practice, though not legally, are counted as separate holdings. The list of operational holdings is manually sorted according to social groups, *viz*. SCs, STs and others, of the

holder and size of the holding at village level. Collection of the data on number and area of Operational holdings according to gender of the holder were introduced for the first time during 1995-96 Census. Various tables prepared at village level are aggregated at Taluka, District, State and finally at all State level.

3. The Highlights of the Report on Number and Area of Operational Holdings, 2015-16 :

3.1 As per the Agriculture Census, 2015-16, the total number of operational holdings in the Maharashtra state has increased from 137 Lakh in 2010-11 to 153 Lakh 2015-16 i.e. an increase of 11.58%.

3.2 There is an increase in the operated area from 197.67 lakh ha. In 2010-11 to 205.06 lakh ha. in 2015-16 showing an decrease of 3.74%.

3.3 The average size of operational holding has declined to 1.34 ha. in 2015-16 as compared to 1.44 ha. in 2010-11. The highest average land holding is in Wardha (2.06 Ha.) followed by Yeotmal (2.04 Ha) and Nandurbar (1.84 Ha.). The lowest average holding is in Kolhapur (0.74 Ha.) followed by Satara (0.78 Ha.) and Gondia (0.81 Ha.)

3.4 The percentage share of female operational holders has increased from 14.98 in 2010-11 to 15.46 in 2015-16 with the corresponding operated area of 13.08 and 14.07.

3.5 The small and marginal holdings taken together (below 2.00 ha.) constitute 79.52 percent in 2015-16 against 78.54 in 2010-11and the operated area at 44.96 percent in the current Census as against the corresponding figure of 45.13 percent in 2010-11.

3.6 The semi-medium and medium operational holding (2.00 ha. – 10.00 ha.) in 2015-16 were 20.02 percent with the operated area at 49.38 percent. The corresponding figures for 2010-11Census were 20.93 and 49.33 percent.

3.7 The large holdings (10.00 ha. & above) were 0.46 percent of total number of holdings in 2015-16 with a share of 5.66 percent in the operated area as against 0.53 percent and 5.55 percent respectively for 2010-11Census.

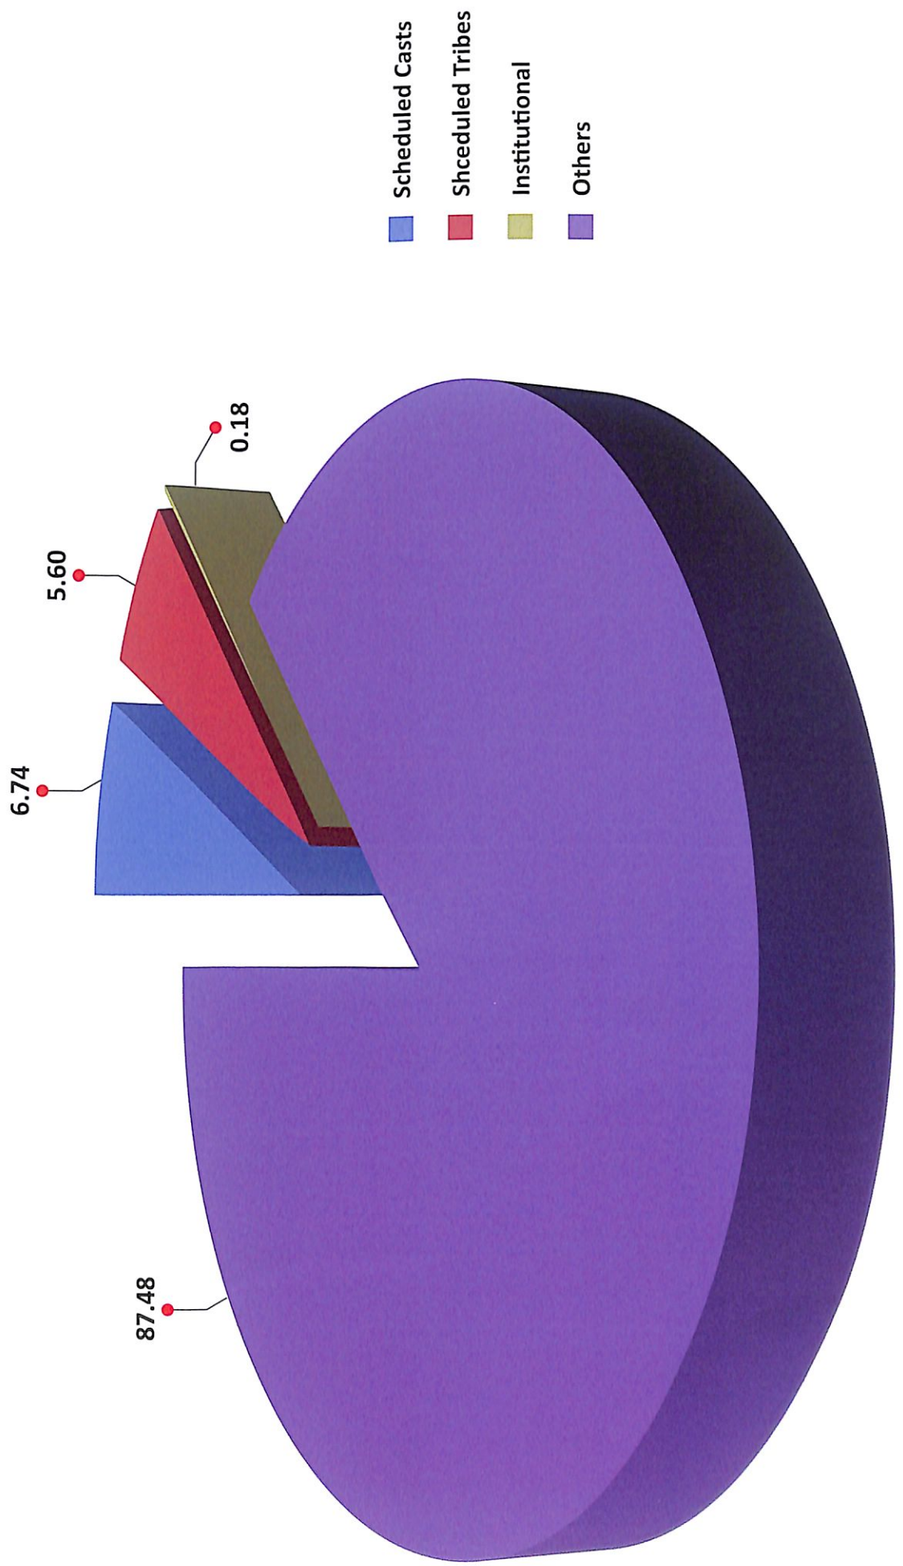

3.8 In a total of 152.85 lakh operational holdings in the State, the highest number belonged to Ahmednagar District (10.79 lakh) followed by Satara (9.04 lakh), Pune (8.30 lakh), Solapur (7.77 lakh), Beed (7.58 lakh), Nashik (7.09 lakh), Kolhapur (6.61 lakh), Nanded (6.47 lakh), Sangali (5.52 lakh), Aurangabad (5.86 lakh), Ratnagiri (5.17 lakh) etc. with the lowest number of only 1.47 lakh operational holdings in Palghar District.

3.9 Out of a total of 205.06 lakh hectares operated area in the Maharashtra State in 2015-16, the highest contribution was made by Ahmednagar (13.00 lakh ha.), followed by Solapur District (12.72 lakh ha.), Pune (10.52 lakh ha.), Nashik (10.38 lakh ha.), Yavatmal (9.03 lakh ha.), Beed (8.85 lakh ha.) Nanded (8.39 lakh ha.) etc. with the lowest operated area of 1.75 lakh hectares in Thane District.

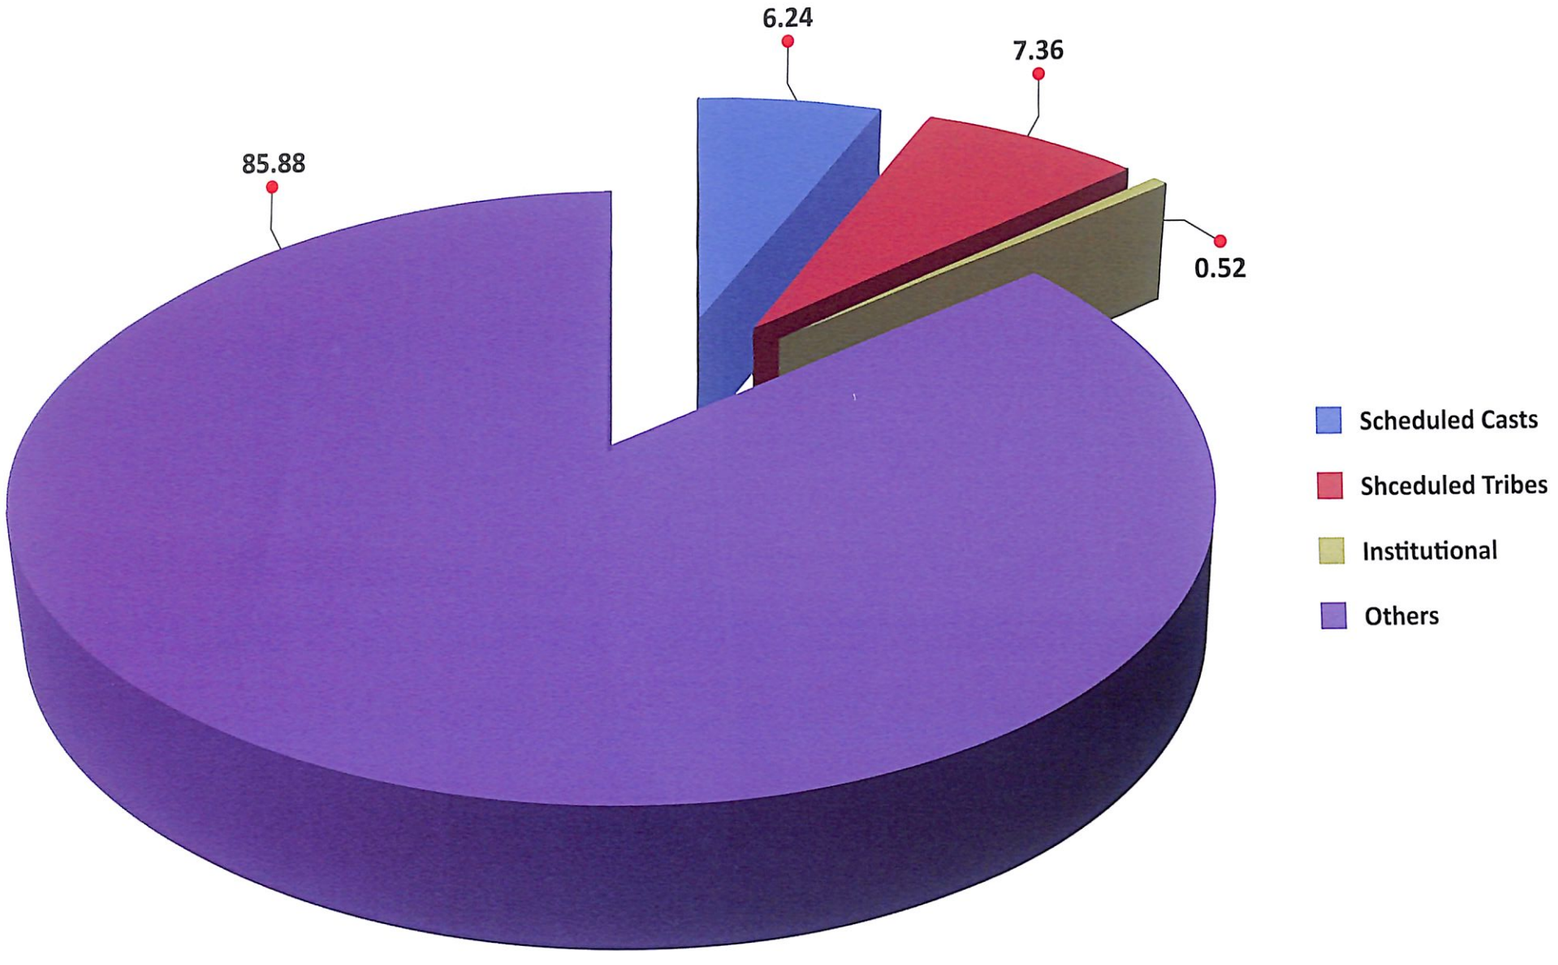

3.10 As compared to 2010-11, percentage variation in number of operational holdings in 2015-16 was highest in case of Washim District (19.87 percent) followed by Sindhudurg (17.03 percent), Yavatmal (16.86 percent), Solapur (16.40 percent), Nagpur (16.38 percent), Beed (16.37 percent), Jalna (16.31 percent), Hingoli (15.42 percent), Osmanabad (14.98 percent) etc.

3.11 A set of tables giving Maharashtra States distribution of number of holdings and area operated and the District-wise breakup of distribution of the number of operational holdings and area operated by major size groups is presented in the tables that follow.

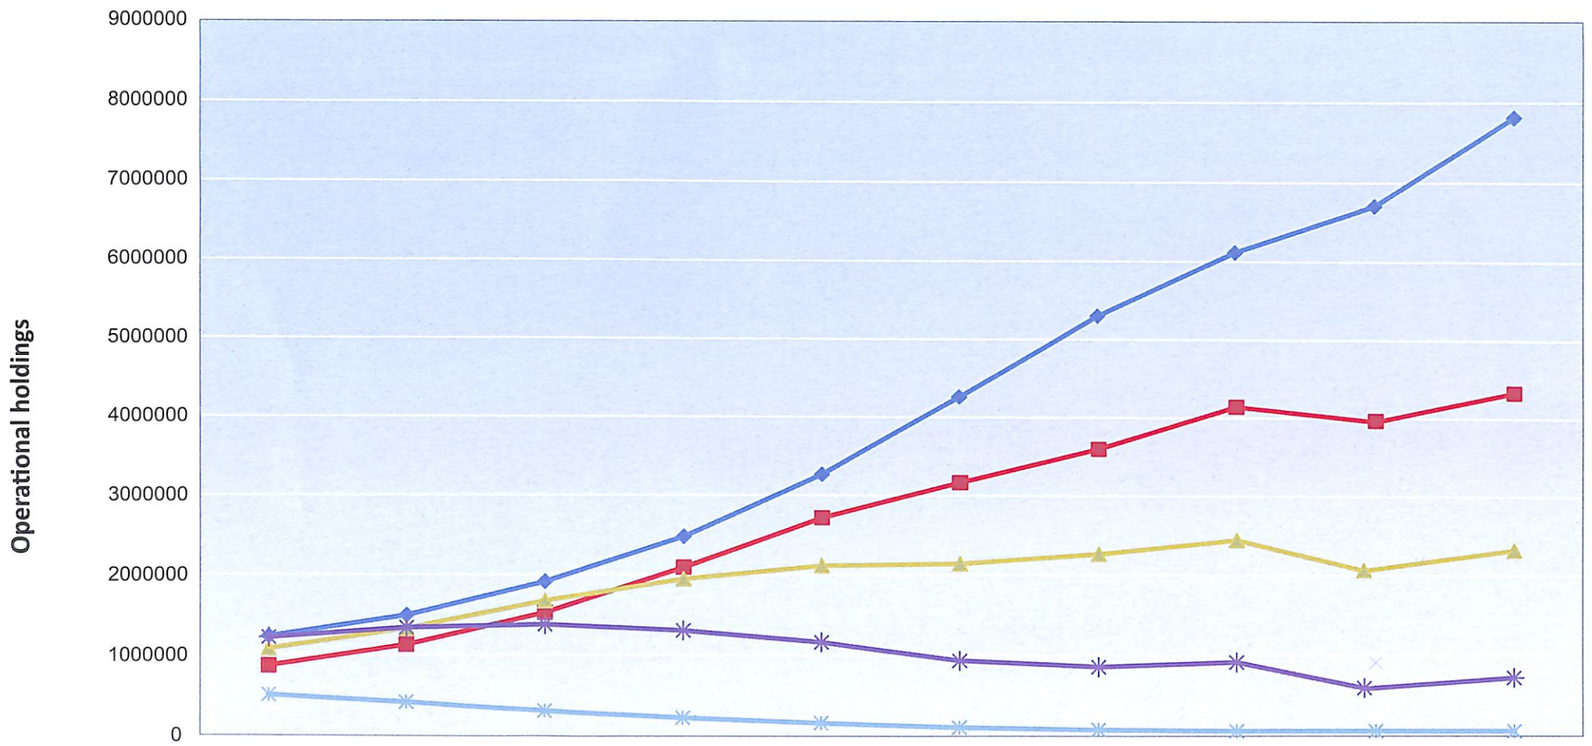

Percentage share of different social groups in *number* of operational holdings as per Agriculture Census 2015-16

Percentage share of different social groups in *area* operated by holdings as per Agriculture Census 2015-16
