GOVERNMENT OF MAHARASHTRA

REPORT ON AGRICULTURAL CENSUS

1990 - 91

MAHARASHTRA STATE

PART I & II

REPORT ON
AGRICULTURAL CENSUS
1990-91

PART I and PART II

MAHARASHTRA STATE

DEPARTMENT OF AGRICULTURE
PUNE

FOREWORD

Operational holding is the basic Unit of decision making in agriculture and therefore, for formulation of any meaningful and effective strategy for agricultural development, detailed data on structure of agricultural holdings are absolutely necessary. The Census data fills in this longfelt gap in agricultural statistics. The holdingwise information is of considerable utility, in planning agricultural production programmes.

The Agricultural Census 1990-91 is the fifth one in the State. As in the previous Censuses, in this Census also it was found that the number of small and marginal holdings increased and that now they accounted for about two-third that is 64 per cent of the total operational holdings in the State, but with a share of hardly 27 per cent in the total operated area. Another important feature in this Census was that the average size of a holding has came down from 2.64 ha in 1985-86 to 2.21 ha in 1990-91.

The staff of Revenue Department was entrusted with the field work and supervision. Without their active co-operation, it would have been diffcult to complete the Census. I place on record my deep appreciation and gratitude to them.

The work of computerisation was carried out at National Informatics Centre, Pune. I recall with gratitude the valuable services rendered by the staff of NIC, Pune associated with Agricultural Census computerisation work.

The Commissioner, Agriculture, Maharashtra State, Pune has taken deep interest in the activity and provided useful guidance from time to time. The Deputy Commissioner (Agricultural Census) and his staff in the Agricultural Census Cell exerted a great deal in organising and completing the voluminous work of Agricultural Census 1990-91.

I hope that this Report will be useful to planners, decision makers, extension and research workers.

ASOKE BASAK,
Agricultural Census Commissioner and Secretary (Agriculture) to Government of Maharashtra, Mantralaya, Bombay - 400 032

DATE : 22nd September, 1995

PREFACE

This is the fifth Report on Agricultural Census brought out by the Agricultural Department, Maharashtra State, Pune.

In the present Census, data relating to operational holdings and their size classes, type of holdings, tenancy status, land use, irrigation status, area irrigated by different sources and area under different crops was collected.

The programme of Agricultural Census was implemented in the State under the overall control of the Secretary (Agriculture) who is designated as State Agricultural Census Commissioner. A small Cell in the Agricultural Department is also created to implement the programme in all the districts of the State under the guidance and technical control of Deputy Commissioner (Agricultural Census).

The results of the Agricultural Census for the State and districts are presented in this report. The results obtained from the analysis of the data in respect of Scheduled Castes and Scheduled Tribes are also presented in this report. Part II of this report contains statistical tables for the State and districts.

Results obtained from the analysis of Census data are considerably utilised not only by different Departments, but also by the Research Workers, Economists and those associated with the agricultural planning and development. The results of Census will be considerably helpful for policy formulation and to assess the impact of different Agricultural projects.

The talathi who was entrusted the responsibility, had done a good job during Census, since he had done this work in addition to his normal duties. Higher Revenue Officers, right from the concerned Secretary to Government, Commissioners, Collectors, Tahsildars and Revenue Inspectors gave necessary support in getting the work done properly. The officers and the staff of the Statistical division of the Agricultural Department, Directorate of Economics and Statistics, rendered assistance to the extent possible in supervising the Census field work. I would like to express my thanks to all these officers and staff.

Since the commencement of Agricultural Census 1990-91 till its completion, the post of Deputy Commissioner (Agricultural Census) was held by three senior officers. Initial work of planning and organisation was done by Shri. J.M. Khaire, Deputy Commissioner (Agricultural Census) and the field work was also completed before his retirement. Thereafter Shri. M.G. Sawant, Statistician (Agriculture Census) held the charge of the post and computerisation work was completed. Shri. S.M. Jiwane is appointed in May 1994 as Deputy Commissioner (Agriculture Census) and the present report is drafted by him. Three other senior officers who were working in Agricultural Census Cell for a long period also retired in succession. The Agricultural Census Cell faced this situation by

exerting more efforts and carried out the work successfully.

I would, therefore, like to place on record the excellent services rendered by the officers and the staff of Agricultural Census Cell.

Mrs S.P. Sardesai, Principal Systems Analyst, National Informatics Centre (Western Region), Pune and her colleagues took personal interest and efforts in the development of computer programme and in giving guidance in electronic processing of the data. I would like to place on record the excellent services rendered by the NIC, Pune.

I am grateful to the officers of the Government of India for their guidance and help in the conduct of Agricultural Census programme in the State.

U. C. SARANGI
Commissioner Agriculture,
Maharashtra State,
Pune - 411 001

REPORT ON
AGRICULTURAL CENSUS, 1990-91
MAHARASHTRA STATE

* * *

SUMMARY OF FINDINGS

(A) OPERATIONAL HOLDINGS

Operational Holdings and their Operated Area

The number of Operational Holdings in the State was 94.70 lakh in 1990-91 as against 81.01 lakh in 1985-86, indicating an increase by 16.9%.

The total operated area in the state in 1990-91 was 209.25 lakh ha as against 213.52 lakh ha in 1985-86, indicating a decline of 2%.

Marginal holdings accounted for 35% to the total number of holdings while small holdings accounted for 29%. Semi-medium and medium holdings accounted for 22% and 12% respectively and large holdings accounted for only 2% in 1990-91.

Marginal holdings and small holdings had the largest number of operational holdings (64%), but it was medium holdings and large holdings which had the highest operated area (45%) to total operated area in the State as against 27% operated area of marginal and small holdings together.

Average size of a Holding

The average size of a holding in the State steadily declined with each successive Agricultural Censuses. While in 1970-71 it was 4.28 ha which came down to 3.66 ha in 1976-77, 3.11 ha in 1980-81, 2.64 ha in 1985-86 which further got reduced to 2.21 ha in 1990-91.

Type of holdings

Individual holdings accounted for 94.8% to the total number of operational holdings and 93.0% to the total operated area. The Joint and Institutional holdings accounted for 5% and 0.2% to the total number of holdings respectively while their operated area to total operated area was 6.4% and 0.6% respectively in 1990-91.

(B) LAND USE

The net area sown was 85.5% to the total operated area. The proportion of area under current fallows was 4.9% to the operated area. Thus the net cultivated area was 90.4% to the operated area. While percentage of uncultivated land and land not available for cultivation was 5.2% and 4.4% respectively.

(C) IRRIGATION

Irrigation Status

Out of 20.94 lakh irrigated holdings, only 7.35 lakh holdings i.e., 35.1% were wholly irrigated and 13.59 lakh holdings i.e. 64.9% were partly irrigated. The net irrigated holding area in wholly irrigated and partly irrigated holdings was 8.23 lakh ha or 39.9% and 12.40 lakh ha or 60.1% of the

total net irrigated area respectively.

The average net area sown per holdings in case of wholly irrigated holdings, wholly unirrigated holdings and partly irrigated holdings was 1.11 ha, 1.83 and 2.73 ha respectively. In respect of net irrigated area, average irrigated area per wholly irrigated holding and partly irrigated holdings was 1.11 ha and 0.91 ha respectively.The average net irrigated area was 0.98 ha per total holding.

Sources of Irrigation

Well was the most important source of irrigation, covering 63.6% of the number of holdings and 65.7% of the net area irrigated. This was followed by Canals, the corrosponding proportions 19.6 and 19.0% respectively.

Out of 9.35 lakh wells used for irrigation in the State during 1990-91, 9.29 lakh wells i.e. 99.3% to the total number of wells were fitted with pumps. Thus, 0.7% wells had traditional mode of lifting water. Average area irrigated per well was 1.45 ha at State level in 1990-91.

(D) CROPPING PATTERN

Area under Principal Crops

The net area sown in 1990-91 was 178.91 lakh ha as against 182.29 lakh ha in 1985-86. While gross cropped area was 196.36 lakh ha and 197.42 lakh ha in 1990-91 and 1985-86 respectively.

Food and non-food crops accounted for 74% and 26% to the gross cropped area respectively. Foodgrains accounted for 68.9%, which includes cereals 57.2% and pulses 11.7% to the gross cropped area.

Jowar occupied the largest area i.e., 31.8% to the gross cropped area. Amonst Cereal crops, wheat covered 62.9% irrigated area to its total area. Fruit crops had 80.9% irrigated area to their total area. Sugarcane occupied 100% area under irrigation to its total area, but the share of Sugarcane area was 23.1% which was the highest, followed by Jowar 18.4%, Rice 14.1% Wheat 13.0% to the total irrigated cropped area in the State.

Cropping Intensity

Cropping intensity during 1990-91 was 110% at State level. It was maximum (116%) for marginal holdings and minimum (107%) for large holdings.

❑❑❑

SUMMARY TABLES

The highest share in percentage of some items in a district to State total is mentioned in the following Table No. 1

TABLE NO. 1

Highest proportion in a district to State total in 1990-91

	Item	Highest %	District concerned
1.	No. of holdings	7.2	Ahmadnagar
2.	Operated area	6.5	Ahmadnagar
3.	Gross cropped area	6.5	Ahmadnagar
4.	Type of Holdings :		
	(a) Individual	7.4	Ahmadnagar
	(b) Joint	12.4	Jalgaon
	(c) Institutional	11.3	Amravati
5.	Net irrigated area	14.5	Ahmadnagar
6.	Well irrigation	18.1	Ahmadnagar
7.	Canal irrigation	21.0	Bhandara
8.	Tank irrigation	44.3	Bhandara
9.	Rice	19.2	Bhandara
10.	Jowar	10.0	Solapur
11.	Bajri	19.2	Nasik
12.	Wheat	10.8	Ahmadnagar
13.	Tur	10.7	Usmanabad
14.	Sugarcane	14.3	Ahmadnagar
15.	Fruit Crops	20.9	Jalgaon
16.	Banana	60.5	Jalgaon
17.	Citrus fruits	42.2	Amravati
18.	Mango	26.0	Sindhudurg
19.	Grapes	59.4	Nasik
29.	Onion	33.0	Nasik
21.	Chillies	22.9	Nagpur
22.	Groundnut	11.5	Dhule
23.	Cotton	15.0	Yavatmal
24.	Cropping intensity	132	Bhandara

The highest average area per holding of important items of a district in the State is shown in the following Table No. 2

TABLE NO. 2

State level average and highest average area in a district in 1990-91

Item	: Average area in ha per holding	
	State	: Highest District
1. Average size of a holding :		
i) By Size classes		
a) Marginal (Upto 1ha)	0.49 ha	0.74 ha Wardha
b) Small (1 to 2 ha)	1.46 ha	1.63 ha Chandrapur
c) Semi-medium (2 to 4 ha)	2.77 ha	2.85 ha Ratnagiri & Sindhudurg each
d) Medium (4 to 10 ha)	5.86 ha	6.08 Ratnagiri
e) Large (10 ha & above)	15.17 ha	20.61 Satara
f) Overall holding	2.21 ha	3.29 ha Yavatmal
ii) By Type of Holding		
a) Individual	2.17 ha	2.98 ha Wardha
b) Joint	2.85 ha	8.96 ha Sindhudurg
c) Institutional	7.50 ha	30.51 ha Sindhudurg
2. Average net irrigated area :		
(a) Wholly irrigated	1.11 ha	2.44 ha Bhandara
(b) Partly irrigated	0.91 ha	1.32 ha Buldhana
(c) Overall irrigated	0.98 ha	1.46 ha Buldhana
3. Average area by source of irrigation :		
(a) Irrigation by Well	1.01 ha	1.54 ha Buldhana
(b) Irrigation by Canal	0.95 ha	1.31 ha Jalna
(c) Irrigation by Tank	1.05 ha	1.76 ha Jalgaon

REPORT ON AGRICULTURAL CENSUS 1990-91 MAHARASHTRA STATE

PART I

CHAPTER I

INTRODUCTION

Historical Background

1.1 Agricultural Census on a global scale was first attempted in 1924 by the International Institute of Agriculture, Rome. Initially, the response was not very satisfactory and the unit of enumeration was also different in different countries. Even then the information was found very useful and it was decided to have Agricultural Census after every ten years. Subsequently, on establishment of United Nations Organisation in 1945, the first World Agricultural Census was conducted by the Food and Agriculture Organisation (FAO) of the United Nations in 1950 and thereafter in 1960, 1970, 1980 and 1990, World Agricultural Censuses were conducted regularly.

Participation of Maharashtra in Agricultural Census

1.2 Government of Maharashtra conducted the first Agricultural Census in the State, as a part of All India Programme with 1970-71 (July 1970 to June 1971) as the reference year. This census was conducted on the basis of complete enumeration of all the holdings in all the villages in the State, with operational holding as a unit of enumeration. The methodology adopted was complete enumeration by retabulation of data already available in the land records. The information was collected on :

(a) number and area of operational holdings by size classes,
(b) classification of individual and joint holdings,
(c) tenancy and tenure,
(d) land utilisation,
(e) sourcewise irrigated area and
(f) area under different crops (irrigated and unirrigated).

1.3 In accordance with the recommendations of the National Commission on Agriculture in 1976, next Agricultural Census was to be carried out after an interval of five years. Accordingly, the second Agricultural Census which was planned for the reference period 1975-76, but was postponed by a year, due to some administrative reasons, was carried out with 1976-77, as the reference year. In this census, methodology adopted was slightly different from that of first Agricultural Census. In 1976-77, only information on number of holdings and operated area was collected on the basis of complete enumeration, while data on other characteristics of holdings viz. tenancy status, land utilisation, sourcewise irrigated area and area under different crops (irrigated and unirrigated) were collected through sample survey in 20% of the total villages in the State. In addition, for the first time, data was also collected on :

(1) number of farmers growing each of the crop,

(2) number of wells in use and that fitted with pumps and

(3) number of wells not in use.

It may also be mentioned that in this Census, information on institutional holdings on the basis of complete enumeration was also collected for the first time. As a part of second Agricutural Census, an Input Survey on sample survey basis with sample of 2% villages was introduced with the reference year as 1976-77. The information on use of various inputs viz. fertilizers, manures, pesticides, agricultural implements and machinery, livestock in each of the five broad groups of operational holdings was collected.

1.4 The third Agricultural Census was conducted with 1980-81 as the reference year and the methodology adopted was complete enumeration of all the operational holdings and operated area by size class of holdings, tenancy status, land utilisation, cropping pattern etc. Major feature of Census of 1980-81 related to data collected separately for Scheduled Castes and Scheduled Tribes holdings. In case of Input Survey 1981-82, sample size was increased from two per cent in 1976-77 to seven per cent of the total villages in 1981-82. The sample size was increased with a view to provide realistic estimation at district level. Further, the data of credit facility availed by the farmers was introduced for the first time in this survey.

1.5 The fourth Agricultural Census was conducted in the State with 1985-86 as the reference year and was conducted on sample basis. The methodology adopted for this census was same as that of 1976-77. As an integral part of the Agricultural Census, an Input Survey 1986-87 was also conducted. The methodology adopted was the same as that for previous Input Survey, 1981-82.

1.6 The current Agricultural Census is the fifth, conducted with 1990-91 as the reference year and methodology adopted is the same as that of previous Census. The field work of the survey commenced late due to some administrative reasons by about a year, and the work was completed in 1992. As was done in the last Agricultural Census, an Input Survey 1991-92 was also conducted as an integral part of Agricultural Census.

Objectives

1.7 The basic object of the World Agricultural Census is to provide comprehensive information on agriculture at a global level on a uniform and comparable basis.

1.8 According to Food and Agriculture Organisation (FAO), the Agricultural Census has two basic objectives :

(i) to collect data on agricultural structures which do not change rapidly from year to year;

(ii) to provide a frame for other agricultural surveys on holdings.

Use of Census Data

1.9 The main advantage of data generated by Agricultural Census is that, they are collected separately for different size classes of holdings and according to social status. The disaggregation of data amongst size classes, which have been re-grouped into five major size groups for facility of presentation, has been found to be very useful for policy formulation particularly for marginal and small farmers who constitute the overwhelming majority of the farming community. Separate programmes have been drawn-up by the State Government for the welfare of this economically handicapped class of population, and also particularly for Scheduled Castes and Scheduled Tribes.

The data of the Agricultural Census is helpful to :

(i) formulating plans for further growth in agriculture and for formulating special programmes for marginal and small holders in general and for Scheduled Castes and Scheduled Tribes farmers, falling in this group, in particular,

(ii) preparation of detailed district plans on a long range basis.

Population

1.10 The population census 1991 showed that the State population had increased from 627.8 lakh in 1981 to 789.4 lakh in 1991 i.e. by 25% increase in the decade. The proportion of the urban population of the State increased from 35% in 1981 to 39% in 1991. With the exception of the Greater Bombay district which is entirely urban, urbanisation was found to be comparatively much more in the districts of Thane, Nasik, Aurangabad and Nagpur with 65 per cent 36 per cent, 33 per cent and 62 per cent urban population respectively. The districtwise figures of rural and urban population are given in the Table No.1 of Appendix I.

Agricultural Workers

1.11 There were 337.4 lakh total workers in Maharashtra in 1991. Of them 184.4 lakh or 55% were agricultural workers as cultivators and agricultural labourers. The districtwise figures are given in the Table No. 2 of Appendix I. It is seen from this Table that the percentage of total workers to Agricultural workers was the highest in Buldhana (78%) and the lowest in Thane (28%) district in the State in 1991.

Land-man Ratio

1.12 Rural population of Maharashtra in 1961 and 1971 was respectively 283.9 and 347.0 lakh and cultivated area was respectively 190.8 and 184.9 lakh hectares. Thus, land-man ratio for 1961 and 1971 was 0.67 and 0.53 respectively. See the Table No. 3(A) of Appendix I. Further studies for decinnial period 1981 and 1991, presented in the Table No. 3(B) of Appendix I shows that the land-man ratio had further decreased to 0.46 and 0.40 respectively. The per capita availability of cultivated land was comparatively much low in the rice growing areas of the State viz. Thane, Raigad, Ratnagiri, Sindhudurg, Kolhapur and Bhandara districts. This confirms the previous findings.

Land Use

1.13 The entire land in the State has been cadastrally surveyed and is under the reporting system. The land use pattern under the nine-fold classification adopted in non-census agricultural statistics i.e. the Annual Season and Crop Report as well as six-fold classification of those in broad groups (I to VI) adopted in the Census is presented in the Table No. 1.1 for Maharashtra State and All India, based on the official statistics.

TABLE NO. 1.1

Land Use Pattern : Maharashtra and All India in 1990-91

Area in lakh hectares

Land Use		Maharashtra		All India (P) *	
		Area	Percentage of area in Col. 2 to total reporting area	Area	Precentage of area in Col. 4 to total reporting area
1		2	3	4	5
(I) Land not available for cultivation					
(a) *Forests*	..	51.28	16.67	679.9	22.29
(b) *Area under non-agricultural use*	..	10.91	3.55	212.2	6.96
(c) *Barren and uncultivable land*	..	16.22	5.27	196.6	6.45
	Total	78.41	25.49	1088.7	35.70
(II) Other uncultivated lands excluding fallows					
(a) *Permanent pastures and other grazing lands*	..	11.25	3.65	118.0	3.87
(b) *Lands under miscellaneous tree crops and groves not included in the net area sown*	..	3.00	0.97	37.0	1.21
	Total	14.25	4.62	155.0	5.08
(III) Other fallows	..	10.63	3.47	95.9	3.14
(IV) Culturable waste	..	9.66	3.14	150.1	4.92
(V) Current fallows	..	8.98	2.92	138.1	4.53
(VI) Net area sown	..	185.65	60.36	1422.4	46.63
Total reporting area		307.58	100.00	3050.2	100.00

Note: (P) = Provisional *Source*: * Agricultural Statistics at a Glance, published by Government of India in 1994.

The total geographical area (Reported) of the State is about 1/10th of the corresponding area in the country. The proportions of *net area sown* in the State and to some extent that of the area of *land not available for cultivation* were markedly different from the corresponding proportions in All India as a whole. Thus, the proportion of the net area sown to the geographical area in the State was relatively large as compared with that in the country. On the other hand, the percentages of the area covered by forests, area under non-agricultural use, barren and uncultivable land in the State were smaller than those of the corresponding items of the land use in the country.

1.14 The details of land use as per official statistics viz. Annual Season and Crop Report are furnished in the Table No. 1.2 as below.

TABLE NO. 1.2

Land Use Pattern : Maharashtra in 1985-86 and 1990-91

Area in lakh hectares

Land Use		1985-86	1990-91
(1) Total Geographical area (Reported)	..	307.58	307.58
(2) Forests	..	53.39	51.28
(3) Land not available for cultivation (i.e. area under non-agricultural use, barren and uncultivable land)	..	28.47	27.13
(4) Other uncultivated lands excluding fallows			
(a) *Permanent pastures and other grazing lands and lands under miscellaneous tree crops and groves not included in the net area sown*	..	15.76	14.25
(b) *Culturable waste*	..	10.56	9.66
(5) Fallow lands			
(a) *Current fallows*	..	6.09	8.98
(b) *Other fallows*	..	11.08	10.63
(6) Net area sown	..	182.23	185.65

It is seen from the above Table that net area sown had increased from 182.23 lakh hectares in 1985-86 to 185.65 lakh hectares in 1990-91.

Crop Seasons and Cropping Pattern

(a) ***Crop Seasons***

1.15 There are only two principal crop seasons in Maharashtra namely, the Kharif season commencing with the South-west monsoon in June followed by the Rabi season in the winter. Crops are also raised in the Summer season but on an extremely restricted scale due to the meagre irrigation facilities, available after meeting the requirements of long duration crops like Sugarcane, Banana and other Horticultural crops.

(b) ***Cropping pattern***

1.16 The details of area under principal crops in 1985-86 and 1990-91 as per official statistics i.e. Season and Crop Report are presented in the Table No. 1.3.

TABLE No. 1.3

Area under Principal Crops in Maharashtra during the two Census periods

Area in lakh hectares

	Crop		1985-86	1990-91
(1)	Rice	..	15.36	15.97
(2)	Wheat	..	8.88	8.67
(3)	Kharif Jowar	..	28.89	27.69
(4)	Rabi Jowar	..	37.39	35.32
(5)	Bajri	..	17.17	19.40
(6)	Total Cereals	..	112.09	111.36
(7)	Total Pulses	..	28.40	32.57
(8)	Total foodgrains	..	140.49	143.93
(9)	Sugarcane	..	3.55	5.36
(10)	Cotton	..	27.09	27.21
(11)	Groundnut	..	6.70	8.64
	Gross Cropped area	..	205.69	218.59

From the above Table, it is seen that the area under Pulses, Sugarcane and Groundnut had increased considerably in 1990-91 due to favourable climatic conditions as compared to drought conditions in 1985-86. Again the net area sown, as can be seen from Table No. 1.2 had increased, the gross cropped area had also increased because of favourable climate in 1990-91.

Irrigation

1.17 The table as mentioned below gives the progress made in the sourcewise net irrigated area during the five year period.

TABLE No. 1.4

Sourcewise Net Irrigated Area

Area in lakh hectares

	Source particulars		1985-86		1990-91		Percentage increase in 1990-91 over 1985-86
(1)	Surface irrigation	..	7.87	(40%)	9.99	(37%)	(+) 27%
(2)	Well irrigation	..	11.62	(60%)	16.72	(63%)	(+) 44%
	Total	..	19.49	(100%)	26.71	(100%)	(+) 37%

From the above data, it is seen that as per official statistics (Season and Crop Report), in the last five years i.e. from 1985-86 to 1990-91, the net irrigated area in the State had increased from 19.49 lakh ha to 26.71 lakh ha. This showed that 7.22 lakh ha area i.e. 37% had increased during the five year period. Well is still the major source of irrigation covering 63% of the net irrigated area. The net irrigated area by surface irrigation in the five year period has increased by about 2 lakh hectares.

❑❑❑

CHAPTER II

CONCEPTS AND DEFINITIONS

2.1 The concepts and definitions adopted in the Agricultural Census are mentioned briefly in the following paragraphs.

Operational Holding

2.2 All land which is used wholly or partly for agricultural production and is operated as one technical unit by one person alone or with others without regard to the title, legal form, size or location.

More details for criteria followed in determining an operational holding in the Census are stated in the paragraph 3.10 of Chapter III.

Technical Unit

2.3 A technical unit has been defined as that unit which is under the same management and has the same means of production such as labour force, machinery and animals.

Agricultural Production

2.4 Agricultural production includes growing of field crops, fruits, grapes, seeds, tree nurseries (except those of forest trees), bulbs, vegetables and flowers, production of coffee, tea, cocoa, rubber, jute, oilseeds, fodder, grass, etc.

Grass would be treated as a crop if special efforts are made to raise it.

Operated area

2.5 Operated area would include both cultivated and uncultivated area, provided part of it is put to agricultural production during the reference period.

It would also cover the land occupied by the farm buildings, including the house of the holder, provided such buildings are within the cultivated area. If the farm buildings are located outside the cultivated area and are covered under *Abadi* (residential) area, then such buildings would not be included in the operated area of the holding.

Operated area would exclude Goverment forest land, Government waste land, village common grazing land, Abadi area etc. If Government waste land is allotted to an individual, then it will be included in the operated area of the holding.

If the entire area of the holding (the area of all the survey numbers of an operational holding) is put to non-agricultural use and /or it is under old fallow, it will not be considered as operated area. If, however, the entire area of an operational holding is under current fallow during the refernce year, this would still be considered as operated area.

The operated area may comprise of :

(a) Land owned and self-operated,

(b) Land leased-in,

(c) Land otherwise operated.

(a) *Land owned and self-operated*

Land owned

Land for which the cultivator has the right of permanent heritable possession would be considered as owned. This would include :

(i) land held from Government or others under a grant or lease or assignment with right of permanent heritable possession with or withour right of transfer,

(ii) land operated under perpetual lease.

Self-operated land

This would include :

(i) self-cultivation,

(ii) land cultivated through members of the family and

(iii) land cultivated with the help of hired labour. .

Note: Land owned and self-operated should not include land leased-out to others.

(b) *Leased-in*

Area leased-in is defined as land taken on lease from others without any permanent right of possession for the lessee. Land may be leased-in for :

(i) Fixed money

(ii) Fixed produce

(iii) Share of produce

(iv) Usufructuary mortgage

Under (iv), the ownership of the property is with the mortgagor but the possession is with the mortgagee (i.e. the person to whom the mortgage is made or given). Income from the property accrues to the *mortgagee* and the mortgage is terminated as soon as the full amount is released.

(v) Other terms

Under (v), in case the land has been leased-in for combination of two or more terms, such cases may be treated as land leased-in for other terms. Others would include areas for which lessee has been partly paid in cash and partly in kind or area given on the conditions of rendering service either to the village community or the Government and/or area held free of lease etc. It would also include cases where labourers are given some land for cultivation without permanent right.

(c) *Area otherwise operated*

This would include land encroached, land forcibly occupied, unauthorised or land in dispute etc. which cannot be treated as owned or leased-in, as per the definitions given above.

Operational Holder

2.6 An operational holder is the person who has the responsibility for the operation of the agricultural holding and who exercises the technical initiative and is responsible for its operation. He may have full economic responsibilitiy or may share it with others. The operational holder may be Individual/Joint/Institutional.

(a) *Individual*

If the holding is being operated either by one person alone or by a group of persons, who are the members of the same household, it will be considered as an individual holding.

(b) *Joint*

If two or more persons belonging to different households, share jointly as partners in the economic and technical responsibility for the operation of an agricultural holding, such holding would be considered as a joint holding.

(c) *Institutional*

Land held by an institution such as Government farms, sugar factory's farms, co-operative society farms, trust, devasthan or temple and other cultivated under its management would be included under the categary of institutional holding.

Resident and Non-resident operational holder

All the cultivators residing in a particular village, cultivat ng some land are resident operational holders of that village, irrespective of the fact whether they are cultivating land within that village or outside. A resident operational holder may have :

(i) entire area of the holding located in the village of his residence,

(ii) partly within the village of residence and partly outside and

(iii) entirely outside the village of residence.

A cultivator who is not residing in the village but is residing within the boundaries of the Tahsil and operating some land in that village is called as non-resident operational holder.

Complete/Part Holding

A holding is said to be a complete holding, if the entire operated area of that holding is located in the same village. If the operated area is spread over in more than one village, it would be considered as a part holding.

Wholly irrigated, partly irrigated and wholly unirrigated holding

If the entire net area sown in an operational holding is equal to net area irrigated, such holding is considered as wholly irrigated holding. In case part of the net area sown is irrigated, it will be partly irrigated, and if the entire sown area has not received any irrigation during the year of reference, such holding would be wholly unirrigated.

Land Utilisation

2.7 The operated area of an operational holding would be classified into six broad categories:

(i) Net area sown,

(ii) Current fallows,

(iii) Fallows other than current fallows,

(iv) Other uncultivated land excluding fallow,

(v) Culturable waste and

(vi) Not available for cultivation.

The total of all the six categories as mentioned above comprised the total geographical area of the holding in question. The definitions of these six categories of land use are given in the following paragraphs:

(i) *Net area sown*

Total area sown with crops and/or orchards counting (area sown more than once) in the same year only once.

(ii) *Current fallows*

Cropped areas which are kept fallow during the current year. For example, if any seedling area is not cropped in the same year, it may be treated as current fallow.

(iii) *Fallows other than current fallows*

All lands which are taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years. The reasons for keeping such lands fallow may be one or more of the following :

(i) poverty of the cultivators,
(ii) inadequate supply of water,
(iii) malarial climate,
(iv) silting of canals and rivers, and
(v) unremunerative nature of farming.

(iv) *Other uncultivated land excluding fallow land*

This will include :

(a) *Permanent pastures and other grazing lands*

All grazing lands, whether they are permanent pastures and meadows or not. Village common grazing lands would, however, be excluded for the purpose of Agricultural Census.

(b) *Lands under miscellaneous tree crops and groves*

Cultivable land which is not included in the net area sown but is put to some agricultural use. Lands under casurina trees, thatching grasses, bamboo bushes and other groves used for fuel etc. which are not included under 'orchards' would be covered under this category.

(v) *Culturable Waste*

All lands available for cultivation, whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or the other. Such lands may be either fallow or covered wholly or partly with shrubs and jungles which are not put to any use. Land once cultivated but not cultivated for five years in succession would also be included. Culturable waste land within the holding is alone covered by the Census.

(vi) *Land not available for cultivation*

This would include (a) forests, (b) area under non-agricultural use, (c) barren and uncultivable land.

(a) *Forests*

All land classed as 'Forests' under any legal enactment dealing with forests or administered as forests, whether State-owned or private and whether wooded or maintained as potential forest land. The area of crops raised in the forests and grazing lands or areas open for grazing within the forests would be included under the forest area. Only private forests would be covered for the purposes of the Agricultural Census.

(b) *Area under non-agricultural use*

All lands occupied by buildings, roads and railways or under water, canals and land put to uses other than agriculture. However, such lands within the cultivated holdings should be covered in the census.

(c) *Barren and uncultivable land*

All barren and uncultivable land like mountain, desert, etc. which cannot be brought under cultivation unless at a high cost or under Pot-kharab* is classed as uncultivable whether such land is in the isolated blocks or within cultivated holdings. For the purpose of Agricultural Census, uncultivable lands within the cultivated holdings alone are covered by the Census.

Irrigated crop

2.8 A crop receiving water from a source in addition to natural precipitation is classed as irrigated crop, irrespective of the source and number of irrigations given.

Net area irrigated

2.9 Net area irrigated is the area of land irrigated during a part or the whole year and on which one or more crops are grown during the year. In other words, it is the part of the net area sown.

Gross irrigated area

2.10 It is the total area under crops grown under irrigation during the year; thus an area of land which has grown two irrigated crops during the year is counted twice and so on.

Land not covered by the Census

2.11 The basic unit for which the information is collected in the Census, is an operational holding. Consequently, land not belonging to an operational holding is excluded from the coverage of the Census. Thus lands under the following categories are excluded from the Census :-

(a) Government forests and barren lands,
(b) Government waste land not leased-out, not allotted or granted to individuals or institutions for cultivation,
(c) Land under village site and village common lands, such as those maintained as common pastures or grazing lands,
(d) Land under non-agricultural use, such as those covered by buildings, houses and factories and those covered by the public roads, railways, rivers, tanks, etc.

However, lands covered by private forests, pastures or grazing land and those put to non-agricultural use *within the operational holdings* are included in the Census. *More details of the lands to be included in an operational holding are given in the paragraph 2.5 of this Chapter.*

❑❑❑

Note: * = Pot-kharab refers to uncultivable land within a survey number/pot.hissa.

CHAPTER III

AGRICULTURAL CENSUS 1990-91: METHODOLOGY AND ORGANISATION

Sampling design

(a) *Complete Census*

3.1 In the State, information was collected on complete enumeration basis for all villages in respect of number and area of operational holdings, by retabulation method from the land records.

(b) *Sample Survey of Agricultural Census*

3.2 For collection of data on other characteristics namely tenancy status, land use, irrigation, area under different crops etc. the sampling design adopted was stratified unistage with tahsils as strata and from each stratum 20 per cent of the villages (8594 villages) were selected randomly. All the operational holdings in these villages were covered.

Methodology

3.3 As the information required under the Agricultural Census was already contained in the village revenue records, the collection of census data for 1990-91 was done, as in the previous censuses of 1970-71,1976-77, 1980-81 and 1985-86 by the method of retabulation of the information from the village records.

The methodology used in the previous census of 1985-86 was adopted, with the resident cultivators'* approach. In doing so, even if an operator had no land in the village of his residence, his holding was still included in that village only. The tahsil was taken as the boundary while accounting for operated area by the plural holders.

Organisation

3.4 The Secretary to Government, Agriculture, Animal Husbandry, Dairy Development and Fisheries Department, Bombay was nominated as the State Agricultural Census Commissioner and was assisted by the Deputy Commissioner (Agricultural Census) posted in the Commissionerate of Agriculture, Pune. A small cell was created with the above officer as its head in the Commissionerate of Agriculture, Maharashtra State, Pune.

The Divisional Assistant Statisticians of the State Department of Agriculture and the District Statistical officers of the Directorate of Economics and Statistics rendered assistance in imparting training to the field staff and to the supervisory staff at district and tahsil levels.

In each district, one (senior) Deputy Collector in the Collectorate, mostly Resident Deputy Collector was designated as Assistant Agricultural Census Commissioner and was entrusted with the responsibility of getting the census work completed in time and co-ordinating the census work in the district on behalf of the Collector. The Tahsildars were designated as Tahsil Agricultural Census Officers and Revenue Sub-divisional Officers were also associated with the supervision and co-ordination of the census work in their respective sub-divisions, particularly for speeding up completion of the field work.

In order to supplement the quantum of supervision carried out by the revenue officers and to check certain intricate technical details relating to the census enumerations, the Statistical Officers and Supervisors of the Agricultural Department in the district and District Statistical Officers of the Directorate of Economics and Statistics were also assigned the supervision programme.

Note: * = The concept of a resident cultivator is explained in the paragraph 2.6 of Chapter II.

Appointment of State Advisory Committee

3.5 As was done in the last census, at the instance of Government of India, a State Advisory Committee was appointed for ensuring smooth, efficient and timely execution of the census programme. The Committee consisted of the following members who also rendered assistance in the various aspects of the census programme.

(1)	Agricultural Census Commissioner and Secretary to Government, Agriculture, Animal Husbandry, Dairy Development and Fisheries Department ..	Chairman
(2)	Secretary to Government, Finance Department ..	Member
(3)	Secretary to Government, Planning Development ..	Member
(4)	Secretary to Government, Rural Development Department ..	Member
(5)	Secretary to Government, Revenue and Forests Department ..	Member
(6)	Deputy Secretary/Under Secretary, Agriculture, Animal Husbandry, Dairy Development and Fisheries Department ..	Member
(7)	Director of Economics and Statistics, Bombay ..	Member
(8)	Director, Government Printing & Stationery, Bombay ..	Member
(9)	Chief Statistician, Directorate of Agriculture, Pune ..	Member
(10)	Head, Monitoring and Evaluation, Directorate of Agriculture ..	Member
(11)	Deputy Commissioner (Agricultural Census), Pune Member	Secretary

Updating of land records

3.6 Government (Revenue and Forests Department) issued necessary instructions to the district Collectors to make necessary arrangements for updating the land records, carrying out the crop inspection carefully and in time.

Schedules prescribed for collecting Census data

3.7 As explained earlier, the data for the Agricultural Census were to be collected by retabulation of the information compiled in the village records. For this purpose schedules were prescribed, details of the same are given below.

Registers/Schedules	Information to be collected
(1) Listing Schedule No.1 (Schedule L-1) ..	Parcelwise details of each complete holding of each resident operational holder in the village
(2) Listing Schedule No.1-A (Schedule L-1) ..	Parcelwise details of each incomplete (part) holding of resident operational holder in the village
(3) Listing Schedule No. 2 (Schedule L-2) ..	Parcelwise details of each non-resident operational holder in the village
(4) Green Schedule and Green Schedule-1 ..	Parcelwise details of each incomplete (part) holding of non-resident operational holder in the village
(5) Register D-1 (Schedule-H) ..	Holdingwise abstract of each completed holding in respect of resident operational holder according to different size classes of holding
(6) Table No. 3 (Schedule-3) ..	Village level information of (a) land used for cultivation and kept fallow, (b) cropped area, (c) irrigation statistics and (d) classification of non-operated area

Note: (1) Description in bracket refers to schedules prescribed by Government of India.

(2) Certain modifications were made in the schedules prescribed by Government of India so as to ease the compilation of census data from the existing basic revenue records in the State.

Printing of Schedules

3.8 The programme for printing of Agricultural Census and Input Survey Schedules was finalised in consultation with the Director, Government Printing and Stationery, Bombay and the printing was got done in Government Printing Presses.

Schedules/Registers	No.of copies printed
(1) Listing Schedule No. 1 ..	45,000 Registers
(2) Listing Schedule No. 1-A ..	45,000 Registers
(3) Listing Schedule No. 2 ..	50,000 Registers
(4) Green Schedule and Green Schedule-1 ..	15,00,000 Copies
(5) Form 'F' ..	45,000 Copies
(6) Form 'E' ..	3,000 Copies
(7) Register D-1 ..	45,000 Registers
(8) Table No. 3 (Village Summary) ..	50,000 Copies
(9) Instruction Books ..	17,500 Copies

Source of Data

3.9 In order to collect the required data for an operational holding, the information under various items covered by the Census, for different parcels of land belonging to the holding was required to be first compiled and consolidated in the forms prescribed. This information for individual parcels was available in the village revenue records. Since Maharashtra has an excellent land record system and as the entire area of the State is cadastrally surveyed, the details of the land use statistics along with other particulars such as, name of the holder of the land and mode or status of cultivation with respect to the land, are readily available for each parcel in Village Form VII-XII. Similarly, the ownership register called Village Form VIII-A (Khataoni), contained particulars of lands owned by each farmer. Hence for compiling the census data as required above, the Village Form VII-XII (Khasra) and Village Form VIII-A were mainly made use of in the process of retabulation of the data for the Census.

Criteria adopted for determining an Operational Holding

3.10 With the existing system of land records, a readymade list of operational holdings (i.e. particulars of all the lands cultivated by each farmer) was not available. Moreover, besides the land cultivated by an operator in one village, the lands operated by him in other villages within the same tahsil had also to be found out. In order to ensure the correct determination of each operational holding, the field staff was instructed to adopt the following criteria for identifying the components of an operational holding :-

(a) Only those parcels of land** cultivated (either owned or leased-in) by a farmer under one techincal unit * should be treated as an operational holding. If some parcels of lands of a holding were cultivated under one technical unit and others by another technical unit, they should be treated as two operational holdings.

Note: * = Definition given in paragraph 2.3 of Chapter II. ** = Parcle of land refers to a survey number or pot-hissa.

(b) It should include also those parcels of land (in the possession of the operator) occupied by farm house or land put to other non-agricultural purposes, uncultivable lands and pot-kharab. However, if the entire area of a holding consisted only of such lands (i.e. non-agricultural, uncultivable, etc.), such a holding should be excluded under the Census.

(c) Where some parcels of land of a holding were fallow, they should also be included in the operational holding. However, if the entire holding consisted of fallow land only (other than current fallows), the holding should be excluded. In case the entire holding consisted of *current fallows* (i.e. land kept fallow during 1990-91 only), it should be included in the Census.

(d) Government waste lands given out for cultivation and cultivated by a farmer should be included in his operational holding.

(e) Land belonging to a temple, but cultivated by a farmer as a trustee without incurring any cost of his own and merely as a manager, should be treated as a separate operational holding belonging to the temple and reported as *cultivation managed by the trustee*. Any land, owned or cultivated by the trustee on his own (reaping the benefits of the cultivation therefrom), would form a separate operational holding and the trustee treated as the operator.

(f) In some villages where consolidation of holdings had been done, the previous cultivator might, in a few cases, continue to cultivate the lands, although in the records his name was not shown. In such cases, the *de-jure* position (i.e. the one shown in the records) should be taken as the criterion for determining the operational holding.

(g) Where a farmer had raised a loan by mortgaging his lands to an institution like the Land Mortgage Bank, the Record of Rights might show the Bank as the owner till the loan was repaid. But for all practical purposes, the farmer should be treated as the *de-facto* cultivator. The lands mortgaged should be treated as owned and self-cultivated and form part of his operational holding, if the farmer was actually cultivating his lands.

(h) In case one or more parcels of land of the holding grew grass naturally and bestowed economic benefits, it should be treated as a crop, if its area was included in the net area sown in the Khasra (V.F. VII-XII)

Units for reporting area statistics

3.11 The area statistics were compiled in terms of *hectare and are*, right from the stage of primary compilation of the census data.

Supervision of the Census Operations

3.12 In addition to the quantum of supervision entrusted to the higher officers of the Revenue Department, an attempt was made for increasing the scale of supervision with the assistance of the technical staff of the Statistics Division of the Agricultural Department in districts and divisions, the District Statistical Officers of the Directorate of Economics and Statistics and Extension Officers (Statistics) in the Panchayat Samities.

Prior to the commencement of the Agricultural Census, steps were taken to check whether the crop inspection had been carried out satisfactorily and the relevent particulars of the census recorded in the Village From VII-XII.

Supervision of the census work was divided into two phases.

In the first phase, the emphasis was on giving an appropriate and correct start to the field work and cover as many Talathis in the State as possible and rapid check was organised to see whether

(a) the correct procedure as laid down had been followed in preparing the list of the operational holdings in each village,

(b) the information for part or entire holdings of non-resident operational holders had been despatched to the concerned Talathi/Patwari,

(c) the preliminary schedules i.e. listing schedules, green schedules etc. had been properly canvassed on the basis of the correct understanding of the concepts and definitions and the information to be actually reported.

The second phase of the supervision programme was organised on the rationalised basis, the emphasis being on assessing the quality of the census work.

The deficiencies noticed in the census work under both the phases of the supervision programme were brought to the notice of the revenue officers concerned and got rectified not only in respect of the returns of the village checked, but also those of the other villages where such or other deficiencies were noticed.

Dates of commencement and completion of the Census work

3.13 The census work commenced in September 1991 and field work was completed by September 1992. In accordance with the All India time schedule fixed for the Census Programme,the field work of census was planned to be completed by December 1991.Though it was decided to organise the census on crash programme basis and complete it within a period of about three months, for one reason or the other, the work could not be taken up as desired and it went on lingering for sometime. Some of the local problems also came in the progress of the field work.

Scrutiny of returns

3.14 The census returns (primary and final) for the Agricultural Census were deposited in the tahsil office by the Talathis after the completion of the census work village by village. Immediately thereafter, the scrutiny of the returns and checking of the village level aggregates was organised in each tahsil.

Despatch of returns

3.15 The census returns duly finalised were despatched by the Tahsildars to the district Collectorate along with the list of villages covered by the census. After the returns were received for all tahsils, the district Collectorate then arranged for their transportation along with the above lists to the Deputy Commissioner (Agricultural Census), Department of Agriculture, Maharashtra State, Pune.

Technical deficiencies in the field work and steps taken to remove them

3.16 Besides the administrative and organisational problems mentioned in the previous paragraphs, the following technical deficiencies also caused delay in finalisation of the census data at the field level.

(i) Some of the Talathis, particularly those who were new to this work, did not carry out the retabulation properly.This resulted in incomplete coverage of the census data, both in respect of number of holdings and the parcels thereof and hence it had to be got rectified.

(ii) Some of the Talathis did not fill in all the columns in the respective registers and hence it had to be got done soon after the lapses were detected.

(iii) In some of the villages, the information relating to the part holdings & located in other villages were not recorded. This lapse had to be got corrected.

(iv) Cultivable areas were reported in place of the operated areas by some of the talathis, as the primary compilation was done from the Khata register instead of Khasra register.

(v) In few cases the area under 'pot-kharab'* was included in the column for 'current fallows'.

(vi) Certain columns relating to irrigation and cropwise statistics provided in the census registers were not properly filled in or were left blank. In some cases, posting and aggregation errors were also noticed.

All the above errors and omissions were required to be got corrected by asking the concerned persons to reconcile the observed discrepancies.

In fact special meetings were conducted at each district place where few census returns of each tahsil were scrutinised and final observations pointed out to the assembled staff. In addition, arrangements were made in to form a special checking squad in each tahsil for the scrutiny of census returns of the entire tahsil. Detailed training was given to the members of the special squad in the work of scrutiny of the returns and finalising the census data speedily.

Arrangements for Processing of Data

3.17 A Mechanical Tabulation Cell was created in the Agricultural Census Scheme under the Deputy Commissioner (Agricultural Census) for attending to the processing of the data collected in the main agricultural census, sample survey of agricultural census and input survey. This Cell was headed by the Statistician (Mechanical Tabulation) who was responsible for co-ordinating and supervising pre-data entry scrutiny of the returns, data entry and computerisation of the same for obtaining the out-put tables. He was assisted by two Assistant Statisticians and other subordinate staff who were engaged in the work of scrutiny of the schedules, coding of the data, updating of the data of the registers etc. This staff also attended to the preparation of the test data, carrying out validation checks, testing of the programmes, and final computerisation of the data. The National Informatics Centre, Pune accepted the responsibility of developing the computer programmes and the entire processing of the data was carried out under the technical guidance of the concerned officers of the National Informatics Centre, Pune. Due to paucity of trained technical staff, the entire component of staff under the scheme of mechanical tabulation was not appointed and hence with the help of nucleus staff of the main scheme, the work of computerisation was successfully carried out.

Because of the delay in the field work of Agricultural Census, it became essential to compile urgently the information to be given in the Census Table 1. Separate form 'F' for each village was got printed and relevent information was recorded by Talathi/Patwari. On the basis of information collected in form 'F', Table 1 was prepared as required by the Central Ministry of Agriculture.

Note: * = Pot-kharab refers to uncultivable land within a survey number/pot-hissa.

❑❑❑

CHAPTER IV

ANALYSIS OF CENSUS RESULTS

Introduction

4.1 This was the fifth Agrieultural Census, carried out in the State with 1990-91 as the reference year. The data in respect of number of operational holdings and their operated area was collected on the basis of complete enumeration of all the operational holdings in the State. Based on this data collected in Table 1, a brief report under the title 'Bulletin of Agricultural Census, 1990-91' was published in March 1993 for the use of planners, extension workers and research workers. The data was collected in respect of tenure status, land use, irrigation status, sourcewise irrigation, cropwise irrigated; unirrigated and total area on sample basis on the similar lines on that of Sample Survey of Agricultural Census 1985-86. Since this survey covered a large number of villages (8594), it is possible to provide satisfactory estimates, based on the analysis of the data and study the inter-relationship between the size of holdings, land use, irrigation and similar other characteristics for divisions and districts.

Agricultural Divisions and Districts

4.2 Maharashtra consists of 30 districts and is divided into 8 agricultural divisions viz. Konkan, Nasik, Pune, Kolhapur, Aurangabad, Latur, Amravati and Nagpur. The Konkan division comprises of 5 districts, viz. Greater Bombay or Bombay Suburban, Thane, Raigad, Ratnagiri and Sindhudurg. These 5 districts are the coastal districts which constitute the Konkan region. Nasik division comprises of 3 districts viz. Nasik, Dhule and Jalgaon. Pune division comprises of 3 districts viz. Pune, Solapur and Ahmadnagar while Kolhapur division has 3 districts viz. Kolhapur, Satara and Sangli. These 4 divisions together comprising of 14 districts constitute the Western Maharashtra region. The Aurangabad division comprises of 3 districts viz. Aurangabad, Jalna and Beed, while Latur division has 4 districts viz. Parbhani, Nanded, Latur and Usmanabad. Aurangabad and Latur divisions together is called the Marathwada region. The seven districts of Marathwada region belonged to the former Hyderabad State. The Amravati division comprises of 4 districts viz. Buldhana, Akola, Amravati and Yavatmal. These 4 districts are the Ex-Berar districts. The Nagpur division comprises of Wardha, Nagpur, Bhandara, Chandrapur and Gadchiroli districts. These 5 districts are the Ex-Central Provinces districts of the former Madhya Prant.

Contents of the Census Tables

4.3 In order to understand the analysis of the data, a brief account of the contents of the out-put tables of the census results is given as below :

TABLE 1 gives the distribution of holdings according to 11 size classes, five major size classes and their types as Individual, Joint and Institutional holdings.

TABLE 2 presents the distribution of holdings by size classes according to whether they were wholly owned and self-operated, wholly leased-in, wholly otherwise operated and partly owned, partly leased-in and partly otherwise operated.

TABLE 3 gives the details of land by size classes according to six different types of land use viz. (i) net area sown, (ii) current fallows, (iii) uncultivated land (iv) other fallows, (v) culturable waste land and (vi) land not available for cultivation.

TABLE 4 gives the size classwise information regarding irrigation status i.e. holdings grouped according to wholly irrigated, wholly unirrigated and partly irrigated.

TABLE 5(A) contains size classwise details of operational holdings, receiving irrigation and area irrigated by different sources.

TABLE 5(B) contains size classwise information for number of Wells and Tubewells.

TABLE 6 gives the size classwise number of holdings, irrigated; unirrigated and total area under different crops.

The above out-put Tables are given in Part II of this Report at State level, separately for Total holdings, Scheduled Castes holding and Scheduled Tribes holdings. These tables are also given at district level for Total holdings only.

Presentation of Results

4.4 The results of the current census are presented for the State as a whole and for the individual districts, as was done in the last census report of 1985-86. The findings of census are given in three Sections. Section I deals with the State level findings, which are divided under four items i.e. (a) census coverage, (b) operational holdings, (c) irrigation and (d) cropping pattern. Section II deals with the districtwise findings, which include four items i.e. (a) operational holdings, (b) land use, (c) irrigation and (d) cropping pattern. Section III deals with the findings in relation to the size classwise holdings, which are further divided under four items as above. The findings of this census are compared with that of previous census 1985-86 in respect of total holdings. The findings of the Scheduled Castes and Scheduled Tribes holdings are given separately in Chapter V under four items as mentioned above.

SECTION I

STATE LEVEL FINDINGS

(A) CENSUS COVERAGE

4.5 The Agricultural Census covered lands within the operational holdings. The lands occupied by Government forests and other lands used for public causes viz. area covered under roads, nalahs, rivers, grave-yards, permanent pastures, etc. were excluded from the census. Besides the lands put to non-agricultural use, which consisted mainly of area occupied by houses etc. were not covered under Agricultural Census. In addition, if the entire holding was occupied by other fallows or culturable waste land, such holding, by definition was also not considered in Agricultural Census. Considering these facts, it is observed that the total area covered by the Agricultural Census was, therefore, less than that of the official statistics namely those published in the Annual Season and Crop Report. Hence whereas official statistics covers the entire geographical area of about 308 lakh hectares, giving its break up into nine-fold classification, the Agricultural Census took into account 209 lakh hectares and covered only four items in details of nine-fold classification. The Table below gives comparative statement of official statistics for the two census years together with census results.

TABLE NO. 4.1

Census Coverage and Land Use : Maharashtra

(Area in lakh ha)

Sr. No.	Land Use	Official Statistics		Agricultural Census	
		1985-86	1990-91	1985-86	1990-91
(1)	Land not available for cultivation				
	(a) *Forests* ..	53.39	51.28	*	*
	(b) *Area under non- agricultural use* ..	11.21	10.91	*	*
	(c) *Barren and uncultivable land* ..	17.26	16.22	*	*
	Total ..	81.86	78.41	10.45	9.28
(2)	Other uncultivated lands excluding fallows				
	(a) *Permanent pastures and other grazing lands* ..	13.82	11.25	*	*
	(b) *Lands under miscellaneous tree crops and groves not included in the net area sown* ..	1.94	3.00	*	*
	Total ..	15.76	14.25	3.01	2.47
(3)	Culturable waste ..	10.56	9.66	6.60	4.90
(4)	Other fallows (fallow other than current fallows) ..	11.08	10.63	3.99	3.45
(5)	Current fallows ..	6.09	8.98	6.24	10.24
(6)	Net area sown ..	182.23	185.65	182.29	178.91
	Total ..	209.96	214.91	199.12	197.50
	Grand Total ..	307.58	307.58	212.58	209.25

Note: * = Separate figures not available in Agricultural Census.

The data in the above Table No. 4.1 indicates that figures of official statistics and census were not comparable for the reasons stated above. Vast difference between estimates of official and census under land not available for cultivation and uncultivated lands was observed. Census was, therefore, done for coverage of only area operated by individual holders, excluding Government land which was also covered under official statistics. Under item, net area sown, there was increase in official statistics and decline in census figures for the two census years 1985-86 and 1990-91. Broad reasons for such decline studied in census, indicate that this was due to (i) conversion of agricultural land into non-agricultural use for construction of houses, industries etc., particularly areas near big cities (ii) large area covered by big irrigation projects. Percentage distribution of area under different land use according to census findings is given in Table No. 6 of Appendix II.

(B) OPERATIONAL HOLDINGS

4.6 In Agricultural Census, Operational Holdings and Operated Areas are important indicators. Details regarding the same are given in the following paragraphs.

Distribution of Operational Holdings

4.7 The detailed results regarding number and area of operational holdings and also average size of a holding, since first Agricultural Census 1970-71 in Maharashtra for total holdings are shown in the following Table No. 4.2.

TABLE NO. 4.2

Operational Holdings and Operated Area during Agricultural Censuses

Census Year	Operational Holdings		Operated area		Average size of a holding	
	In Lakh	Per cent difference *	In Lakh ha	Per cent difference *		Per cent in ha difference *
1970-71 ..	49.51		211.79		4.28	
1976-77 ..	57.64	(+) 16.4	211.05	(-) 0.4	3.66	(-)14.5
1980-81 ..	68.62	(+) 19.0	213.62	(+)1.2	3.11	(-)15.0
1985-86 ..	81.01	(+) 18.1	213.52	(-) ng.	2.64	(-)15.1
1990-91 ..	94.70	(+) 16.9	209.25	(-) 2.0	2.21	(-)16.3

Note : (1) * = Per cent difference is Increase (+) or Decrease (-) over last census. (2) ng. = negligible.

The data in the above Table indicates that number of operational holdings in each successive Agricultural Census, since the first Agricultural Census in 1970-71 had been consistently going up. In respect of operated area, the difference in percentages indicates irregular trends. Operated area during 1990-91 has decreased by 2% as compared with the last Agricultural Census of 1985-86. The average size of a holding had shown a steady decline. In 1970-71 it was 4.28 ha which came down to 3.66 ha in 1976-77, 3.11 ha in 1980-81, 2.64 ha in 1985-86 which was further reduced to 2.21 ha in 1990-91.

Distribution by Size Classwise Holdings

4.8 The size classwise distribution of number of operational holdings and their operated area is shown in the following Table No. 4.3.

TABLE NO. 4.3

Size classwise distribution of Operational Holdings and Operated Area

Major Size Classes	Number of holdings (in lakh)		% increase (+) or decrease (-) over 1985-86	Operated area (in lakh ha)		% increase (+) or decrease(-) over 1985-86
	1985-86	1990-91		1985-86	1990-91	
Marginal .. (Upto 1 ha)	24.88 (31)	32.75 (35)	(+) 31.6 (6)	12.32 (8)	16.18	(+) 31.3
Small .. (1 to 2 ha)	21.03 (26)	27.27 (29)	(+) 29.7 (14)	31.35 (19)	39.83	(+) 27.0
Semi-medium .. (2 to 4 ha)	19.57 (24)	21.26 (22)	(+) 8.6 (26)	55.20 (28)	58.80	(+) 6.5
Medium .. (4 to 10 ha)	13.17 (16)	11.71 (12)	(-) 11.1 (36)	78.62 (33)	68.56	(-) 12.8
Large .. (10 ha & above)	2.36 (3)	1.71 (2)	(-) 27.5 (18)	36.03 (12)	25.88	(-) 28.2
All Size .. Classes	81.01 (100)	94.70 (100)	(+) 16.9 (100)	213.52 (100)	209.25	(-) 2.0

Note: Figures in the bracket are percentages based on the corresponding total of the respective columns.

It reveals from the above Table that during census of 1990-91, there were 94.70 lakh operational holdings with their operated area as 209.25 lakh ha. The number of operational holdings in 1990-91 had increased by 16.9% as compared to the Agricultural.Census 1985-86. The operated area had declined by 2% as compared with the Agricultural Census 1985-86. The number of holdings and operated area showed increase in the first three size classes viz. marginal, small and semi-medium and decrease in the last two size classes viz. medium and large. Similar trend was also noticed in the previous Agricultural Census. It was also found that as in 1985-86 census, in present census also, majority of holdings were concentrated in the first three size classes. These accounted for about 86% of the total holdings in 1990-91. However, the distribution of operated area amongst the five major size classes was completely different. Medium and large size classes accounted for 45% to the total operated area while first three size classes accounted for 55% to the total operated area.

Distribution by Type of Holdings

4.9 The results according to type of holdings are summarised in the following Table No. 4.4.

TABLE NO. 4.4

Distribution of Operational Holdings and Operated Area by Type of Holdings

Type of holdings	Number of holdings (in lakh)		% increase (+) or decrease (-) over 1985-86	Operated area (in lakh ha)		% increase (+) or decrease (-) over 1985-86
	1985-86	1990-91		1985-86	1990-91	
Individual ..	77.89 (96.2)	89.83 (94.8)	(+) 15.3	202.40 (94.8)	194.53 (93.0)	(-) 3.9
Joint ..	3.02 (3.7)	4.69 (5.0)	(+) 55.3	9.69 (4.6)	13.37 (6.4)	(+) 38.0
Institutional ..	0.10 (0.1)	0.18 (0.2)	(+) 80.0	1.34 (0.6)	1.35 (0.6)	(+) 0.7
All Types	81.01 (100)	94.70 (100)	(+) 16.9	213.52 (100)	209.25 (100)	(-) 2.0

Note: Figures in the bracket are percentages based on the corresponding total of respective columns.

From the above Table, it is seen that according to Agricultural Census 1990-91 more than four-fifth of holdings (94.8%) were Individual holdings. The Individual holdings covered more than four-fifth operated area (93%). The percentage of Joint holdings was 5.0 to the total holdings. The proportion of their operated area was 6.4% to the total operated area. The number of Institutional holdings were 0.18 lakh, their percentage was 0.2. Institutional holdings covered 0.6% operated area to the total operated area.

Average Size of a Holding

4.10 The average size of a holding during the last two censuses according to size class of holdings is mentioned in the following Table No. 4.5.

TABLE NO. 4.5

Average Size of a Holding By Major Size Classes

Major Size Classes	1985-86 (Ha)	1990-91 (Ha)	% difference over 1985-86
Marginal ..	0.50	0.49	(-) 2.0
Small ..	1.49	1.46	(-) 2.0
Semi-medium ..	2.82	2.77	(-) 1.8
Medium ..	5.97	5.86	(-) 1.8
Large ..	15.28	15.17	(-) 0.7
All Size Classes ..	2.64	2.21	(-) 16.3

The data in the above Table shows that the average size of a holding for all size classes registered a decline by about 16% as compared with last census. According to size class of holdings, the average size of a holding had declined in 1990-91 as compared to Agricultural Census 1985-86 in all five major size classes. The lowest decline viz. 0.7% was in case of large holdings, with slightly larger decline 1.8% each in case of semi-medium and medium holdings. Marginal and small holdings showed much larger decline i.e. 2% each. These findings indicate that per cent decrease rate over last census for average size of a holding in respect of smaller holdings was higher than larger holdings. The districtwise distribution according to size classes is given in Table No. 1(A) of Appendix II.

Tenancy of Operational Holdings

4.11 Operational holdings are categorised according to type of ownership and operation. They are wholly owned and self-operated, wholly leased-in, wholly otherwise operated, partly owned, partly leased-in and partly otherwise operated. The area otherwise operated relates to area occupied and operated by the operational holder by encroachment or through forcible occupation of Government or private land. This category was noticed from Agricultural Census 1980-81. Distribution of number of operational holdings by tenancy status is shown in the Table No. 4.6 as below.

TABLE NO. 4.6

Distribution of Operational Holdings and Operated Area by Tenancy Status

Category	Operational holdings (in lakh)		Operated area (in lakh ha)	
	1985-86	1990-91	1985-86	1990-91
(1) Wholly owned and self-operated ..	80.02 (98.93)	94.29 (99.57)	209.11 (98.37)	208.04 (99.42)
(2) Wholly leased-in ..	0.26 (0.31)	0.08 (0.08)	0.98 (0.45)	0.19 (0.09)
(3) Wholly otherwise operated ..	0.18 (0.22)	0.15 (0.16)	0.39 (0.18)	0.32 (0.15)
(4) (a) Partly owned ..	*	*	1.28 (0.60)	0.41 (0.20)
(b) Partly leased-in ..	*	*	0.82 (0.38)	0.16 (0.07)
(c) Partly otherwise operated ..	*	*	0	0.13 (0.06)
Total (a)+(b)+(c) ..	0.43 (0.53)	0.18 (0.19)	2.10 (0.98)	0.70 (0.33)
All categories	80.89 (100)	94.70 (100.0)	212.58 (100)	209.25 (100.0)

Note: (1) Figures in the bracket are percentages. (2) * = Separate figures not available.

From the above Table, it is seen that out of total 94.70 lakh holdings, 94.29 lakh holdings were wholly owned and self-operated, accounting for 99.6%. This proportion was higher than the corresponding proportion observed in the last census of 1985-86. In the remaining categories, the proportions of holdings were meagre which showed decreased trend. In term of operated area, 99.4% area was wholly owned and self-operated. The percentages of the remaining categories were negligible which indicated decreased trend. The information on tenancy collected during Agricultural Census 1990-91 as also earlier Agricultural Censuses, may not represent the full picture. Collection of information on subject like tenancy which is rather sensitive has been quite a difficult task. The cases of recorded tenancy have been very few and no information could be collected regarding concealed tenancy. The information on tenancy has, therefore, to be viewed keeping this limitation in mind.

(C) IRRIGATION

Irrigation Status

4.12 During the current census, information has been collected regarding number of holdings, receiving irrigation either partly or wholly and also area covered by such holdings. The results of this irrigation statistics are given at State level in the following Table.

TABLE NO. 4.7

State Level Irrigation Status

Item	Wholly irrigated		Wholly unirrigated		Partly irrigated		Total	
	1985-86	1990-91	1985-86	1990-91	1985-86	1990-91	1985-86	1990-91
(1) Number of operational holdings (in lakh) ..	3.69 (4.5)	7.35 (7.8)	65.59 (81.1)	72.77 (77.7)	11.61 (14.3)	13.59 (14.5)	80.89 (100.0)	93.71 (100.0)
(2) Number of operational holdings receiving irrigation (in lakh) ..	3.69 (24.1)	7.35 (35.1)			11.61 (75.9)	13.59 (64.9)	15.30 (100.0)	20.94 (100.0)
(3) Net area sown (in lakh ha) ..	4.33 (2.4)	8.23 (4.6)	141.63 (77.7)	133.53 (74.6)	36.33 (19.9)	37.15 (20.8)	182.29 (100.0)	178.91 (100.0)
(4) Net area irrigated (in lakh ha) ..	4.33 (30.8)	8.23 (39.9)			9.75 (69.2)	12.40 (60.1)	14.08 (100.0)	20.63 (100.0)
(5) Average net area sown per holding (ha)	1.17	1.11	2.15	1.83	3.12	2.73	2.33	1.91
(6) Average net area irrigated per holding (ha)	1.17	1.11			0.83	0.91	0.92	0.98

Note: Figures in the bracket are percentages to total.

From the above Table, it is seen that out of 178.91 lakh ha of net area sown in 1990-91 in the State, only 20.63 lakh ha i.e. 11.5% of the net area sown received irrigation from one source or the other. This irrigation was distributed in 20.94 lakh holdings i.e. 22.3% of the total number of holdings in the State. It is revealed that 88.5% of the net area sown and 77.7% of the total number of holdings in the State did not receive any irrigation.

Out of 20.94 lakh irrigated holdings in 1990-91, only 7.35 lakh holdings i.e. 35.1% were wholly irrigated and 13.59 lakh holdings i.e. 64.9% were partly irrigated. The net irrigated area covered by wholly irrigated holdings was 8.23 lakh ha or 39.9% and by partly irrigated holdings, it was 12.40 lakh ha or 60.1%.

The average net area sown per holding in case of wholly irrigated holdings, wholly unirrigated holdings and partly irrigated holdings was 1.11 ha, 1.83 ha and 2.73 ha respectively in 1990-91.

Average net area sown in case of partly irrigated holdings was higher than that of wholly unirrigated holdings. Overall average irrigated area per irrigated holding taking together the first and the third category of holdings referred to above was 0.98 ha in 1990-91.

It is seen that at State level, the total number of wholly irrigated holdings increased from 3.69 lakh in 1985-86 to 7.35 lakh in 1990-91. Wholly unirrigated holdings had increased from 65.59 lakh in 1985-86 to 72.77 lakh in 1990-91. In case of partly irrigated holdings also, the number of holdings had increased from 11.61 lakh in 1985-96 to 13.59 lakh in 1990-91. In the last five years i.e. from 1985-86 to 1990-91, the net irrigated area in the state had increased from 14.08 lakh ha to 20.63 lakh ha. This indicates 47% increase in the net irrigaed area.

Sources of Irrigation

4.13 The data in respect of sources of irrigation viz. Wells, Canals, Tanks and Others was collected. The Table No. 4.8, given below indicates the State level figures of the number of holdings receiving irrigation and net irrigated area covered by each source.

TABLE NO. 4.8

Number of Holdings and Area Irrigated by Different Sources

Source	No. of holdings (in lakh)				Net irrigated area (in lakh ha)			
	1985-86		1990-91		1985-86		1990-91	
	No.	%	No.	%	Area	%	Area	%
Wells ..	9.24	60.4	13.31	63.6	8.16	57.9	13.55	65.7
Canals ..	2.85	18.6	4.11	19.6	2.97	21.0	3.92	19.0
Tanks ..	1.34	8.8	0.97	4.6	1.49	10.6	1.01	4.9
Others ..	2.35	15.3	2.81	13.4	1.47	10.5	2.15	10.4
All Sources ..	15.30 *		20.94 *		14.08	100.0	20.63	100.0

Note: * = Exclusive No. of Holdings receiving irrigation.

From the above Table, it is revealed that the number of holdings receiving irrigation by Wells, Canals and Others had increased as compared with the last census. Corresponding number in respect of irrigation by Tanks had decreased. Well was important source of irrigation accounting for 65.7% to the total irrigated area in the State in 1990-91. The districtwise distribution according to different sources of irrigation is given in the Table No. 9 of Appendix II.

Wells in Use

4.14 The data in respect of number of Wells in use, area irrigated by Wells etc. is shown in the following Table No. 4.9.

TABLE NO. 4.9

Number of Wells and Average Area Irrigated per Well

Item	1985-86		1990-90	
(1) Number of Wells in use				
(a) Fitted with pumps ..	6,15,225	(99.1%)	9,28,864	(99.3%)
(b) Without pumps ..	5,619	(00.9%)	6,254	(00.7%)
Total ..	6,20,844	(100.0%)	9,35,118	(100.0%)
(2) Area irrigated by Wells (ha) ..	8,16,042		13,54,771	
(3) Average area irrigated per Well (ha) ..	1.31		1.45	
(4) Number of Wells not in use ..	3,13,413		76,979	

The data in the above Table indicates that out of 9.35 lakh wells used for irrigation in the State during 1990-91, 9.29 lakh wells i.e. 99.3% of the total number of wells were fitted with pumps. Thus, only 0.7% of the wells had traditional mode of lifting water. The average area irrigated per well was estimated at 1.45 ha at State level during current census. Compared to last census this average had increased. The number of wells not in use had decreased as compared with the last census.

(D) CROPPING PATTERN

Cropwise Holdings

4.15 The details about number of holdings, growing principal crops are presented in the following Table No. 4.10.

TABLE NO. 4.10

Number of Holdings growing Principal Crops

(No. of holdings in lakh)

	Crops	1985-86	1990-91
(1)	Rice ..	22.68	24.91
(2)	Kharif Jowar ..	27.87	30.45
(3)	Rabi Jowar ..	21.39	22.59
(4)	Jowar (Kh. & Rabi) ..	49.26	47.31
(5)	Bajri ..	15.18	18.71
(6)	Wheat ..	7.24	7.54
(7)	Sugarcane ..	5.08	8.21
(8)	Cotton ..	16.99	19.25
(9)	Groundnut ..	7.82	7.48
(10)	Banana ..	0.61	0.87
(11)	Citrus fruits ..	0.67	0.75
(12)	Mango ..	0.25	0.58
(13)	Grapes ..	0.16	0.27
(14)	Onion ..	1.09	1.44
(15)	Chillies ..	4.12	3.09

The data in the above Table revealed that maximum number of holdings in 1990-91were observed for Jowar (47.31 lakh), followed by Rice (24.91 lakh) and Cotton (19.25 lakh) crops. Among the Fruit crops, largest number of holdings were observed in Banana (0.87 lakh). Among the vegetable crops, Onion had the highest number of holdings. Chillies had the highest number of holdings, among the condiments and spices crops. Compared to last census the number of holdings growing Jowar, Groundnut and Chillies had decreased. They were increased in the remaining crops as mentioned in the above table.

Area under Principal Crops

4.16 The details of area under principal crops grown in Maharashtra are presented in the following Table No. 4.11.

TABLE NO. 4.11

Cropping Pattern : Maharashtra

Crop	Area (Thousand hectares)				Cropwise percentage :			
	Total		Irrigated		of its Total area to Gross Cropped Area		of Irrigated area to its total area	
	1985-86	1990-91	1985-86	1990-91	1985-86	1990-91	1985-86	1990-91
Rice ..	*1753*	*1816*	*384*	*325*	*8.9*	*9.2*	*21.9*	*17.9*
Kharif Jowar ..	*32.76*	*31.98*	*55*	*37*	*16.6*	*16.3*	*1.7*	*1.2*
Rabi Jowar ..	*37.15*	*30.38*	*325*	*388*	*18.8*	*15.5*	*8.8*	*12.8*
Jowar (Kh. & Rabi) ..	*6992*	*6236*	*380*	*425*	*35.4*	*31.8*	*5.4*	*6.8*
Bajri ..	*1998*	*2325*	*71*	*139*	*10.1*	*11.8*	*3.9*	*6.0*
Wheat ..	*914*	*477*	*513*	*300*	*4.6*	*2.4*	*56.1*	*62.9*
Total Cereals ..	12102	11239	1359	1205	61.3	57.2	11.2	10.7
Tur ..	*689*	*902*	*5*	*16*	*3.5*	*4.6*	*0.7*	*1.8*
Total Pulses ..	2380	2299	140	85	12.1	11.7	5.9	3.7
Total Foodgrains ..	14482	13538	1500	1289	73.4	68.9	10.4	9.5
Sugarcane ..	*287*	*533*	*287*	*533*	*1.5*	*2.7*	*100.0*	*100.0*
Total Fruit Crops ..	139	230	110	186	0.7	1.2	79.1	80.9
Total Food Crops ..	15124	14524	1984	2120	76.6	74.0	13.1	14.6
Groundnut ..	*665*	*544*	*54*	*70*	*3.4*	*2.8*	*8.1*	*12.9*
Total Oilseeds ..	1254	1248	63	99	6.4	6.4	5.0	7.9
Cotton ..	*2702*	*3034*	*116*	*51*	*13.7*	*15.5*	*4.3*	*1.7*
Total Fodder Crops ..	571	773	29	31	2.9	4.0	5.1	4.0
Total Non-food Crops ..	4618	5112	215	186	23.4	26.0	4.7	3.6
Gross Cropped Area ..	19742	19636	2199	2307	100.0	100.0	11.1	11.7
Area Cropped More Than Ones	1513	1745	791	244			52.3	14.0
Net Area Sown ..	18229	17891	1408	2063			7.7	11.5

From the above Table, it is seen that the gross cropped area was 196.36 lakh ha in 1990-91 as against 197.42 lakh ha in 1985-86, indicating slight decrease in gross cropped area. During 1990-91, the net area sown was 178.91 lakh ha as against 182.29 lakh ha in 1985-86. This also indicates decrease in the net area sown. During the current census 1990-91 maximum cropped area was covered under food crops, accounting for 74% of the gross cropped area. The remaining 26% of the gross cropped area was covered under non-food crops. Amongst the food crops, foodgrains covered about 69% of the cropped area comprising 57% cereals and 12% pulses. Amongst cereals, Jowar occupied maximum area of about 32% of the gross cropped area in the State. In order of importance among cereals next to Jowar was Bajri followed by Rice covering about 12% and 9% of the gross cropped area respectively. Wheat which is one of the main food crop covered only about 2% of the gross cropped area. Among pulses crops, Tur occupied maximum area of about 5% of the gross cropped area. Sugarcane, the important commercial crop of the State covered only about 3% of the gross cropped area. Fruit crops occupied about 1% of the gross cropped area in the State. Among the fruit crops maximum area was under Banana, followed by Citrus fruits, Mango and Grapes. Among the non-food crops, Cotton occupied about 15% of the gross cropped area. Leading oilseeds crop of Maharashtra is Groundnut which occupied about 3% of the gross cropped area .Thus, the important crops of Maharashtra are Jowar, Bajri, Rice,Wheat, Tur, Sugarcane, Cotton and Groundnut. Chillies and Onion are the other important commercial crops. As compared to the last census, the proportion of cropped area was increased in respect of Rice, Bajri, Tur, Sugarcane, Cotton and decreased in respect of Jowar, Wheat, Groundnut. It is also seen from the above table that gross cropped irrigated area was only 11.7% to the total gross cropped area during current census. The entire area of Sugarcane was under irrigation. Amongst the cereals, Wheat covered about 63% to its total area under irrigation. The percentage of the area irrigated under Cotton to

its total area was very less being only about 2%. The irrigated area under Fruit crops occupied about 81% to their total area.

Cropping Intensity

4.17 The cropping intensity is measured by gross cropped area, divided by net area sown and multiplied by 100 and generally expressed as percentage. Cropping intensity according to major size classes is shown in the following Table No. 4.12.

TABLE NO. 4.12

Cropping Intensity by Major Size Classes in 1990-91

Major Size Classes	Gross cropped area (ha)	Net area sown (ha)	Cropping Intensity (%)
Marginal ..	1706449	1475667	116
Small ..	4064851	3631239	112
Semi-medium ..	5715067	5202392	110
Medium ..	6204776	5759270	108
Large ..	1944920	1821853	107
All Size Classes ..	19636063	17890421	110

From the above Table, it is seen that cropping intensity at State level was 110%. It was maximum for marginal holdings and minimum for large holdings. It further indicates that cropping intensity was decreased with increase in size class of holdings.

SECTION II

DISTRICTWISE FINDINGS

(A) OPERATIONAL HOLDINGS

Operational Holdings and Operated Area

4.18 While discussing the results of two Censuses i.e. 1985-86 and 1990-91 in both Section II and III, pertaining to Bombay Suburban district had been excluded since it consists mostly of urban area, but the census figures have been just presented for that district wherever necessary. Districtwise distribution of number and area of operational holdings as revealed by the Agricultural Census 1990-91 and 1985-86 is shown in the following Table N0. 4.13.

TABLE NO. 4.13

Districtwise Operational Holdings and Operated Area in 1985-86 and 1990-91

Sr. No.	District	Operational Holdings (No.)		% Increase(+) Or Decrease(-) over	Operated area (ha)		% Increase(+) Or Decrease(-) over	Average size of ha Holding (In ha)		% Increase(+) Or Decrease(-) over	Percentage of holdings below 2 ha			
											Number		Area	
		85-86	90-91	85-86	85-86	90-91	85-86	85-86	90-91	85-86	85-86	90-91	85-86	90-91

Note: ng = negligible.

From the data in the Table No. 4.13 it is seen that during the current census 1990-91, the districtwise number of holdings were varied from 1.09 lakh in Gadchiroli district to 6.81 lakh in Ahmadnagar district. The proportion of number of holdings for concerned district to State total was 1.1% and 7.2% respectively. The distribution of operated area among the different districts ranged from 2.27 lakh ha in Gadchiroli district to 13.56 lakh ha in Ahmadnagar district. The proportion of this area to State total was 1.1% and 6.5% respectively. The districtwise percentage distribution to State total in this respect is shown in the Table No.1 of Appendix II.

As compared with last census 1985-86, it is observed that number of operational holdings were increased in 27 districts and decreased in 2 districts i.e. Ratnagiri and Dhule. The maximum percentage of increase in operational holdings was in Ahmadnagar district (44.9%) and minimum in Yavatmal district (3.7%) as compared to last census. In respect of operated area, it is revealed that it had decreased in 20 districts and increased in remaining 9 districts i.e. Thane, Sindhudurg, Jalgaon, Ahmadnagar, Satara, Sangli, Parbhani, Buldhana and Gadchiroli. The proportion of maximum increase in operated area was in Sindhudurg district (5.4%) and minimum in Gadchiroli district (0.1%) over last census 1985-86.

Districtwise Average Size of a Holding

4.19 The districtwise average size of a holding is mentioned in the Table No. 4.13. The average size of a holding was the lowest in Kolhapur district (1.11 ha) and the highest in Yavatmal district (3.29 ha). The corresponding average size of a holding during last census 1985-86 was 1.33 ha in Kolhapur and 3.89 ha in Usmanabad district. In the remaining 27 districts, it varied from 1.31 ha to 3.10 ha in 1990-91 and 1.50 ha to 3.79 ha in 1985-86. The average size of a holding had decreased in all the districts in 1990-91 as compared with that in 1985-86. The proportion of decrease in average size of a holding was the highest (28.2%) in Ahmadnagar district and the lowest (0.4%) in Ratnagiri district over last census. The average size of a holding was quite less in Paddy growing districts (1.11 ha to 1.79 ha) viz. Thane, Raigad, Sindhudurg, Satara, Sangli, Kolhapur and Bhandara, but in Ratnagiri district, this average size of a holding was 2.39 ha.

Districtwise Proportion of Small Holdings

4.20 Districtwise percentage of holdings having small size of below 2 hectares is given in the Table No. 4.13. The data in this Table revealed that proportion of small holdings was large (65% to 85%) in Paddy growing districts. In the predominantly cotton and millet growing districts, it varied from 40% to 62% and 48% to 81% respectively. The data in the above mentioned Table revealed that majority of small holdings i.e. 65% or more were concentrated in each district of Thane, Raigad, Ratnagiri, Sindhudurg, Satara, Sangli, Kolhapur and Bhandara. However, the operated area of the holdings was relatively quite low being about 18% to 49% of the total operated area in the respective above mentioned districts. The proportion of operated area of small holdings was the lowest in the two districts of Solapur and Yavatmal i.e. 17% each.

Districtwise Distribution by Type of Holdings

4.21 The districtwise distribution in percentage of number of holdings and operated area by type of holdings in 1985-86 and 1990-91 is shown in the Table No. 2 of Appendix II. The data in this Table revealed that districts having very high proportion of Individual holdings were Jalna (99.7%), Beed (99.6%), Nanded (98.3%), Ahmadnagar (98.2%) and Yavatmal (98.1%). Gadchiroli had the lowest proportion of Individual holdings accounting for 83.4%. As compared with last census 1985-86, the proportion of 22 districts out of 29 districts had slightly decreased for individual holdings.

In respect of Joint holdings, highest proportion was in Gadchiroli (16.5%), followed by Jalgaon (15.5%), Thane (14.6%) and Bhandara (13.7%) districts.

Institutional holdings, which accounted for very little proportion in terms of number of holdings varying between negligible per cent to 0.7% in different districts. In terms of operated area, the same trend was observed for Individual and Joint holdings. However, Institutional holdings, which accounted for very little proportion of operated area, varying between 0.1% to 1.3%.

Districtwise Distribution by Tenancy Status

4.22 The districtwise percentage distribution of number of operational holdings by tenancy status is given in the Table No. 5 of Appendix II. This Table indicates that more than 99% of the holdings in the State were entirely owned. The districtwise percentage of such holdings was more than 98% in all the districts except Thane and Gadchiroli where it was 97.8% each. The percentage of wholly leased-in holdings in all the districts was less than 1 per cent. The proportion of the overall leased-in area in the State was only 0.2%. The highest proportion of overall leased-in area was in Yavatmal district (0.7%), followed by Gadchiroli and Kolhapur (0.6% each), Sindhudurg and Amravati (0.5% each) districts. As compared with 1985-86, the proportion of overall leased-in area in the current census was decreased, in all the districts.

(B) LAND USE

4.23 From the data in the Table No. 6 of Appendix II, it is seen that the extent of utilisation of land for agriculture in 1990-91 i.e. proportion of the net area sown to the total operated area varied very widely from 32.3% in Sindhudurg district to 95% in Parbhani district. But in several districts i.e. 25 out of 29 districts the net area sown exceeded 80%, while in only Sangli district, it was less than 80%. In 3 districts of Raigad, Ratnagiri and Sindhudurg (i.e. Konkan division), the percentage of the net area sown was relatively very low being 54.7, 33.8 and 32.3 respectively.

As compared with the percentage of the net area sown in 1985-86, that in 1990-91 deferred slightly in almost all the districts. The district level proportionate area under 5 items of land utilisation viz. uncultivated land, current fallows, other fallows, culturable waste and land not available for cultivation slighly changed in 1990-91 as compared with 1985-86.

The relative area under culturable waste land was appreciably high in the 3 Konkan districts viz. Raigad. Ratnagiri and Sindhudurg being 11%, 19.7% and 11.5% respectively. This is attributed to the fact that as the 3 districts are situated around the mountainous area of the Western Ghats, the area under cultivation was comparatively lower.

(C) IRRIGATION

Districtwise Distribution of Irrigation

4.24 The information on the districtwise distribution of irrigation is summarised in respect of (1) area irrigated, (2) number of irrigated holdings and (3) sourcewise area irrigated.

Area Irrigated

4.25 Percentage of the net irrigated area in each district is shown in the Table No. 7 of Appendix II. Eventhough the percentage net irrigated area for the State was low (11.5%), yet some districts were better placed having appreciably higher percentage of area irrigated while other districts had practically negligible irrigation.The districts of the State can be divided into two broad categories according to (i) those having percentage irrigated area above that at the State level (i.e. 11.5%) and

(ii) below that at the State level in 1990-91.The first category comprising of 11 districts ramely Nasik, Ahmadnagar, Pune, Solapur, Satara, Sangli, Kolhapur, Nagpur, Bhandara, Chandrapur and Gadchiroli with 71% of the total irrigated area in the State. Thus less than half the number of districts of the State accounted for nearly three-fourth of the total net irrigated area in the State. Similar trend was observed in the last census of 1985-86. The percentage net irrigated area of the wholly irrgated holdings was higher in 1990-91 in comparison with that in 1985-86, particularly in Nasik, Ahmadnagar, Pune, Solapur, Satara, Sangli, Kolhapur, Nagpur, Bhandara and Chandrapur.

Districtwise average area irrigated in case of wholly irrigated, partly irrigated and overall irrigated is shown in the Table No.8 of Appendix II.The data in this table indicates that the State level average of these items was 1.11 ha, 0.91 ha and 0.98 ha respectively.The district having highest average irrigated area was Buldhana for each category 2.44 ha,1.32 ha and 1.46 ha respectvely.

Number of Irrigated Holdings

4.26 The number of holdings according to the 3 categories (i) wholly irrigated (ii) wholly unirrigated and (iii) partly irrigated, expressed as percentage of the total number of holdings ineach district is shown in the Table No. 7 of Appendix II. In the 11 districts having 75% of the State irrigated holdings where the percentage irrigated area was higher than State level (11.5%), the proportion of wholly irrigated holdings ranged from 0.2% in Sindhudurg district to about 21% in Ahmadnagar and Pune district each.While that of partly irrigated holdings varied from 0.6% in Thane district to about 29% in Bhandara district. In the individual districts the percentage number of wholly irrigated holdings was higher in 1990-91 as compared with those in 1985-86 in Nasik, Ahmadnagar, Pune, Solapur, Satara, Sangli, Kolhapur, Nagpur, Bhandara and Chandrapur districts.

Sources of Irrigation

Irrigation by Wells

4.27 Out of 13.31 lakh holdings having well irrigation facilities,10.03 lakh i.e. over 75 per cent of them were distributed in 13 districts namely Nasik, Dhule, Jalgaon, Ahmadnagar, Pune, Solapur, Satara, Sangli, Kolhapur, Aurangabad, Beed, Amravati and Nagpur.

Ahmadnagar district had the largest number of holdings using well irrigation, being nearly 2.38 lakh or 18 per cent of the State total number of holdings.The highest area benefitted was also in Ahmadnagar district, to the extent of 2.14 lakh ha i.e. nearly 16 per cent of the total area under well irrigation in the State.The average area irrigated per irrigated holding by well was 1.01 ha at the State level. It was highest in Buldhana district being 1.54 ha following by other districts like Akola (1.29 ha), Bhandara (1.25 ha), Nagpur (1.21 ha), Jalgaon & Wardha (1.20 ha each).

Estimated number of Wells in Use

4.28 About 80 per cent of the wells fitted with pumps were located in 12 districts, namely Nasik, Dhule, Jalgaon, Ahmadnagar, Pune, Solapur, Satara, Sangli, Kolhapur, Aurangabad, Beed and Nagpur. In these individual districts generally above 99 per cent of the wells were fitted with pumps. Among the above districts, Ahmadnagar district had the largest average area irrigated per well being 2.13 ha.

Irrigation by Canal

4.29 4.11 lakh holdings in the State were benefitted by canal irrigation. Out of them 3.17 lakh or 77% were located in the 14 districts i.e. Nasik, Ahmadnagar, Pune, Solapur, Satara, Sangli, Aurangabad, Jalna, Beed, Parbhani, Nanded, Nagpur, Bhandara and Chandrapur. Bhandara district had the largest number of holding (about 0.81 lakh) using canal for irrigation. Out of 3.92 lakh ha

net irrigated area under canal irrigation in the State, 3.67 lakh ha or 94% was contributed by 14 districts mentioned above. Out of 3.67 lakh ha area mentioned as above, Bhandara district contributed highest area 0.83 lakh ha or 21% followed by Pune district 0.53 lakh ha or 13% net irrigated area. The average area irrigated per irrigated holding by canal was 0.95 ha at the State level. It was the highest (1.31 ha) in Jalna district.

Irrigation by Tanks

4.30 0.97 lakh holdings in the State used tanks as the source of irrigation. Out of these 0.83 lakh holdings or 86% were located in Bhandara, Chandrapur and Gadchiroli districts alone. The remaining being distributed mostly in Nagpur, Usmanabad and Solapur districts. Out of 1.01 lakh ha net area irrigated by tanks, 0.97 lakh ha or 89% was located in Bhandara, Chandrapur and Gadchiroli districts. The average area irrigated per irrigated holding by tanks was 1.05 ha, which was the highest (1.76 ha) in Jalgaon district.

(D) CROPPING PATTERN

Distribution of Area Under Principal Crops

4.31 In the Table No.11(A) of Appendix II, the area distributed in terms of percentage by each district to the State total under principal crops has been given. On the basis of this Table, the findings are summarised as below.

Gross Cropped Area

4.32 Taking all crops together amongst all the districts, Ahmadnagar district had the largest share accounting for 6.5% to the gross cropped area in the State. This was followed by Solapur (5.2%), Pune and Parbhani (5.1% each). These four districts together accounted for about 22% of the gross cropped area in the State. The percentage distribution of the gross cropped area of the State in the remaining 25 districts ranged from 0.7% to 4.8%. The lowest proportion of the gross cropped area was in Sindhudurg district i.e. 0.7%.

Food Crops

4.33 As regards food crops, again Ahmadnagar district had the highest proportion i.e. 8.1% to the total food crops area in the State. As in the case of gross cropped area, Solapur district followed Ahmadnagar. Another noteworthy districts were Beed (5.8%), Nasik (5.6%) and Pune (5.5%). Food crops percentage to the State total for the remaining districts ranged from 0.9% to 4.7%. As in the case of gross cropped area, Sindhudurg district had the lowest proportion in respect of food crops also i.e. 0.9% in the State.

Cereals

4.34 Ahmadnagar district had the highest share of cereals i.e. 8.9% in the State, followed by Solapur (6.6%), Beed (6.4%), Nasik and Pune (6.1% each).These five districts together accounted for about 34% of the cereals in the State.

Pulses

4.35 In respect of pulses, Akola district had the highest share accounting for 7.9% to the total pulses area in the State, followed by Latur (7.4%), Parbhani (6.8%), Usmanabad (6.3%), Jalna (5.5%) and Buldhana (5.3%). The other important pulses growing districts were Solapur (4.4%), Nanded (4.2%), Dhule and Beed (4.1% each) and Jalgaon (4%). These eleven districts together accounted for 60% of the pulses crop in the State.

Fruit Crops

4.36 Jalgaon district had the highest share accounting for 20.9% of the total fruit crops area in the State, followed by Amravati (11.8%); Sindhudurg (10.1%), Nagpur (7.5%), Nasik (5.4%), Ratnagiri (4.8%).These six districts together covered about 60% of the fruit crops area in the State.

Oilseeds

4.37 As regards to area under oilseeds, Solapur district had the largest share covering 7.9% to the total area under oilseeds in the State. This was followed by Nagpur (7.5%), Jalgaon (6.2%), Usmanabad (6.1%), Latur (6%), Dhule (5.7%) and Kolhapur (5.3%). These seven districts occupied about 45% area under oilseeds in the State.

Fibre Crops

4.38 Yavatmal district had the highest proportion of about 15% to the total area under fibre crops in the State, followed by Amravati (12.2%), Akola (11.6%), Parbhani (11.4%), Nanded (10%), Buldhana (8.5%), Wardha (6.5%), Jalgaon (6.3%) and Jalna (4.4%). These nine districts together accounted for about 86% of the fibre crops in the State.

Fodder Crops

4.39 Thane district topped the list with 20.8% to the total area under fodder crops in the State. The other important districts were Pune (18.2%), Satara (15.4%), Kolhapur (12.6%) and Ratnagiri (12.5%). These five districts together occupied 79% area to the State total under fodder crops.

Distribution of Area Under Important Crops

4.40 Distribution of area under important crops in percentage is given in the Table No. 11(B) of Appendix II. On the basis of this Table, the findings are summarised as follows.

Rice

4.41 Rice is taken in four Coastal districts and three districts of Eastern Vidarbha. In addition to these districts, this crop is appreciably grown in Kolhapur district. Thus, these eight districts covered about 73% to the total area under Rice in the State. In Raigad, Bhandara, Gadchiroli, Sindhudurg, Thane and Ratnagiri districts, the proportion to district level gross cropped area under Rice ranged from 42% to 84%. See the Table No.10(B) of Appendix II. Raigad district had the highest (84%) proportion of Rice to the gross cropped area with in this district. Rice crop covered 17.9% irrigated area to its total area in the State. In Eastern Vidarbha districts, Rice is grown under irrigation. The highest share of irrigated area in the State was in Bhandara district i.e. 52.8% followed by Chandrapur (21.9%), Nagpur (8.9%) and Gadchiroli (7.4%). These four districts covered 91% of the irrigated area to State total irrigated area under Irrigated Rice crop. See the Table No.11(C) of Appendix II.

Jowar

4.42 Jowar is relatively the most important cereals in the State. Jowar crop occupied the largest area amongst all crops in the State. This crop covered about 32% of the gross cropped area in the State. Proportions of its area to the gross cropped area in each district in respect of 21 districts as shown in the Table No.10(B) of Appendix II, were appreciably high ranging from 21.8% to 60.7%. Amongst these districts, in Solapur district the proportion of gross cropped area under Jowar was highest i.e. 60.7%. Percentage share of this crop to the State total was also the highest in Solapur district i.e. 10% followed by Ahmadnagar (8.4%), Beed (6.6%), Parbhani (6.2%), Usmanabad (5.9%), Pune (5.6%), Nanded (5.3%), Latur (5.2%), Aurangabed and Sangli (4.7%) each, Jalgaon

(4.6%), Satara (4.2%), Jalna and Buldhana (4% each), Akola (3.8%), Yavatmal (3.1%), Dhule (2.8%), Amravait (2.5%), Nagpur and Chandrapur (2.1% each), Wardha (1.6%). See the Table No.11(B) of Appendix II. These 21 districts covered about 97% to the total area under Jowar in the State. From the Table No. 11(C) of Appendix II, it is seen that the highest irrigated Jowar area was in Ahmadnagar (23.8%), followed by Solapur (19.4%) to the state total irrigated Jowar area. The other important districts covering irrigated Jowar area were Pune (17.5%) and Satara (16.5%).

Bajri

4.43 Bajri is also important cereals grown on relatively large scale in 10 districts of the State. Nasik had the highest area under Bajri, accounting for 19.2% of the total area in the State. Ahmadnagar stood second with 17.3% followed by Beed (11.9%), Aurangabad (9.7%), Dhule (7.9%), Pune (7.6%), Satara (6.1%), Sangli (4.8%), Jalna (4.3%), Jalgaon (4.2%). Districtwise data is presented in Table No.11(B) of Appendix II. These ten districts covered 93% of the total Bajri area in the State. This crop is grown on relatively appreciable scale i.e. exceeding 25% of the gross cropped area of the districts of Nasik, Ahmadnagar, Beed, Aurangabad and Dhule. Among these districts Nasik district had the highest proportion i.e. 48% area under Bajri to the gross cropped area in that district.

Wheat

4.44 Wheat is an important cereal crop of the State, occupying 2.4% to the gross cropped area in the State. It is taken in 25 districts excluding Paddy growing coastal districts. From the Table No.11 (B) of Appendix II, it is seen that Ahmadnagar district had the highest proportionate area under Wheat i.e. 10.8%, followed by Nagpur (9.4%) and Pune (7.9%). The other important Wheat growing districts were Nasik (6.3%), Chandrapur (5.8%), Solapur (5.2%), Satara (4.7%), Usmanabad (4.6%), Aurangabad (4.3%), Beed (4.1%) and Bhandara (4%). These eleven districts covered about 67% of total cropped area in the State. In respect of irrigated area, wheat crop covered 62.9% irrigated area to its total area in the State. From the Table No.11(C) of Appendix II, it is seen that the highest irrigated area was in Ahmadnagar district (15.7%), followed by Pune (10.7%). The other important districts covering irrigated Wheat area were Nagpur (7.7%), Solapur (6.8%), Nasik (6.3%), Satara (5.5%) and Buldhana (5%).

Tur

4.45 Tur is the main pulses crop in the State. Proportionate area covered under this crop in the State was the highest in Usmanabad district (10.7%), followed by Aurangabad (6.5%), Solapur (6.4%), Jalna (6.1%) and Beed (6%). These eight districts covered about 59% of the total cropped area in the State. See the Table No.11(B) of Appendix II.

Sugarcane

4.46 Sugarcane is an important cash crop grown in the State. It is grown comparatively on large scale in eight districts. The proportionate area covered amongst these districts was the highest in Ahmadnagar district (14.3%) followed by Solapur (12%), Kolhapur (11.3%), Pune (9.4%), Sangli (9.1%), Satara (8.5%), Aurangabad (5%) and Nasik (4.3%) districts. The other important districts growing this crop were Usmanabad (3.5%), Beed (3.4%), Dhule (3.2%) and Latur (3.1%). See the Table No.11(B) of Appendix II. These twelve districts covered about 87% area under this crop to the State total Sugarcane area. The entire area of Sugarcane grown in the State is under irrigation condition.

Fruit Crops

4.47 Amongst the fruit crops, Banana, Citrus fruits, Mango and Grapes are grown on large scale in the State. Under these four fruit crops, Banana covered the highest area in the State. Citrus

fruits ranked second, Mango stood third and Grapes ranked fourth in respect of the area covered in the State. Districtwise percentage distribution for these fruit crops is given in the Table No.11(D) of Appendix II.

Banana

4.48 Banana covered the highest area in Jalgaon district i.e. about 60% to the State total area under this crop. The other district i.e. Nanded covered 10.8% area under this crop. But the percentage difference, growing this crop was high among these two districts.

Citrus fruits

4.49 Amravati district was covered the highest area i.e.42.2% to the State total, followed by Nagpur (24.6%). These two districts occupied about 67% of the area under Citrus fruits in the State. The other districts growing Citrus fruits relatively on large scale were Aurangabad (5.7%), Wardha (5.3%).

Mango

4.50 This crop is grown mostly in Sindhudurg, Ratnagiri and Buldhana districts. Sindhudurg district had the highest area i.e. 26% in the State, followed by Ratnagiri (22.8%), Buldhana (18.2%). These three districts together covered 67% area of this fruit crop in the State.

Grapes

4.51 Nasik district covered the highest area in the State i.e. 59.4%, followed by Sangli (14.9%). These two districts covered 74.3% area under this crop in the State. The other important grapes growing districts were Solapur (6.7%), Ahmadnagar (3.8%) and Pune (3.5%).

Cotton

4.52 Cotton is the most important cash crop of the State. This crop is very popular in four districts of Amravati division and also in the districts of Parbhani, Nanded, Wardha, Jalgaon and Jalna. Yavatmal district had the highest share of Cotton area i.e. 15% in the State followed by Akola (12.3%), Amravati (12.2%), Parbhani (11.5%), Nanded (10.2%), Buldhana (8.5%), Wardha (6.5%), Jalgaon (6.2%) and Jalna (4.4%). See the Table No. 11(B) of Appendix II.

These nine districts covered together about 87% to the total area under this crop in the State. These individual districts covered appreciable proportionate area under cotton to gross cropped area in each district ranged from 19.5% to 56.2%. See the Table No. 10(B) of Appendix II. The proportionate area occupied by Cotton was relativly very small in the districts of Nasik, Ahmadnagar, Pune, Solapur, Satara, Sangli, Kolhapur. However, this crop in these districts was mostly irrigated. Out of the total area under Cotton, about 2% area in the State was under irrigation. Major districts growing irrigated cotton were Buldhana, Jalgaon, Jalna, Akola, Amravati and Yavatmal. Buldhana district covered highest proportion (16.6%) followed by Jalgaon (9.4%), Jalna (9.3%), Akola (7.7%), Amravati (7.6%) and Yavatmal (7.5%). See the Table No. 11(C) of Appendix II. These six districts covered about 58% irrigated Cotton to State total Cotton irrigated area.

Groundnut

4.53 Groundnut is one of the most important oilseeds crop grown in the State. Dhule district covered the highest area i.e. 11.5% in the State, followed by Satara (9.4%), Kolhapur (9.2%), Pune (7.8%), Sangli and Nasik (7.4% each), Solapur (6.4%) and Jalgaon (5.1%). These eight districts together occupied about 64% area under this crop in the State. See the Table No. 11(B) of Appendix II.

Other Commercial Crops

4.54 Nasik district had the highest share of vegetables i.e. 24.9% in the State, followed by Pune (22.2%), Ahmadnagar (7%), Satara (6.9%) and Nagpur (5.6%). These five districts together covered about 67% to the State total vegetable area. See the Table No. 11(D) of Appendix II. Amongst the vegetable crops, Onion had the highest area in the State.

Onion

4.55 Nasik district had the highest area under Onion in the State, accounting for 33%, followed by Pune (23.8%). These two districts covered about 57% area under this crop in the State. The other districts growing this crop were Ahmadnagar (9.6%), Dhule (7.1%), Satara (6.4%) and Solapur (4.6%).

Chillies

4.56 Among the condiments and spices, Chillies covered the highest area in the State. Nagpur district had the highest area accounting for 22.9% to the total area under Chillies in the State. Nanded district stood second (10.8%), followed by Amravati (8.7%), Chandrapur (8.6%), Kolhapur (6.3%), Dhule (5.6%). These six districts covered about 63% area to the total area under Chillies in the State.

Distribution of Districts

4.57 The broad classification of the districts had been made on the basis of percentage of districtwise area under crop or group of crops to respective total crop area in the State as given below.

Distribution of Districts according to Major crops

Predominantly *Cotton* growing districts	%	Predominantly *Paddy* growing districts	%	Predominantly *Millet* growing districts	%
(1) Yavatmal	15.0	(1) Bhandara	19.2	(1) Ahmadnagar	10.5
(2) Akola	12.3	(2) Thane	9.2	(2) Beed	7.7
(3) Amravati	12.2	(3) Chandrapur	9.1	(3) Solapur	7.9
(4) Parbhani	11.5	(4) Raigad	9.1	(4) Nasik	6.7
(5) Nanded	10.2	(5) Gadchiroli	8.2	(5) Pune	6.1
(6) Buldhana	8.5	(6) Kolhapur	7.0	(6) Aurangabad	5.9
(7) Wardha	6.5	(7) Ratnagiri	5.7	(7) Satara	4.8
(8) Jalgaon	6.2	(8) Sindhudurg	5.0	(8) Sangli	4.6
(9) Jalna	4.4			(9) Usmanabad	4.4
				(10) Dhule	4.5
				(11) Latur	4.5
				(12) Nagpur	1.5
	86.8		72.5		69.1

From the above presentation, all districts were grouped into 3 categories according to districts which were predominantly Cotton, Paddy or Millet growing districts. If the valuation of the percentage was high for the crop in the district, then that district was recognised as one of the predominantly growing that crop or group of crops. Predominantly Cotton growing districts covered nine districts as above covering 86.8% Cotton area to the State total of the crop. Predominantly Paddy growing eight districts covered 72.5% area of Paddy crop in the State. Millet includes Jowar, Bajri, Nagli and other millet crops, predominantly grown in twelve districts covering 69.1% of area under this category in the State.

Cropping Intensity

4.58 Districtwise cropping intensity is given in the Table No. 11(E) of Appendix II. Bhandara district had recorded the highest cropping intensity i.e. 131% in 1990-91. Usmanabad had the next highest cropping intensity (116%). The other districts which had cropping intensity higher than the State were Satara and Kolhapur (113% each), Jalna , Beed and Akola (114% each), Buldhana, Nanded, Parbhani and Gadchiroli (111% each), Latur and Wardha (112% each). Cropping intensity of Nasik and Sangli district was 110%, which was equal to the State level. In the remaining fourteen districts it was lower than the State level. The lowest cropping intensity was in Thane and Ratnagiri district (102% each). As compared to last census i.e.1985-86, the cropping intensity was constant in Amravati and Bhandara districts while it had increased in Thane, Ratnagiri, Sindhudurg, Nasik, Satara, Kolhapur, Beed, Parbhani, Nanded, Usmanabad, Latur, Buldhana, Akola, Yavatmal, Wardha, Nagpur and Gadchiroli districts.

SECTION III

SIZE CLASSWISE FINDINGS

(A) OPERATIONAL HOLDINGS

Distribution of Operational Holdings

4.59 Percentage distribution of districtwise number of operational holdings is given according to major size classes in the Table No. 3 of Appendix II. Data in this table revealed that Kolhapur district had the highest proportion (66.3%) of marginal holdings followed by Raigad (63.8%), Sindhudurg (61.6%), Satara (57.5%) and Bhandara (55.7%). Districts like Yavatmal and Wardha had much lower proportion of only 4.2% and 13.4% respectively. Compared to last census 1985-86, the proportion of marginal holdings had increased during the current census in all the districts except Yavatmal.

The large holdings accounted for the highest proportion of 4.2% of the total number of holdings in Solapur, followed by Ratnagiri (3.8%), Yavatmal (3.6%) and Usmanabad (3.2%). The proportion of large holdings had decreased during current census as compared with the last census 1985-86.

It further revealed that with increas in size classes, the proportion of holdings declined during the current census in Thane, Raigad, Ratnagiri, Sindhudurg, Ahmadnagar, Pune, Satara, Sangli, Kolhapur, Bhandara, Gadchiroil and Chandrapur districts. Districtwise distribution of area of operational holdings by major size classes is shown in the Table No. 3 of Appendix II.

In terms of operated area for marginal holdings, Kolhapur district had the highest proportion (23%) among all the districts as in the case of operational holdings in 1990-91. This was followed by Bhandara (20.5%), Raigad (19%) and Satara (17.2%). The lowest proportion as in the case of number of holdings, was in Yavatmal (0.9%) district.

The operated area covered by large holdings as a percentage to total area in each district was the highest in Sindhudurg (26.2%) followed by Ratnagiri (25.7%), Solapur (20.4%), Thane (18.5%) and Pune (17.1%). Nanded and Bhandara districts had the lowest proportion of 4.3% each of large holdings. Compared to last census the proportion of large holdings had decreased in all the districts. Districtwise distribution of operated of area by major size classes is shown in the Table No.4 of Appendix II.

Distribution by Tenancy Status

4.60 Percentage distribution of leased-in area in selected districts according to major size classes is presented in the following Table No. 4.14.

TABLE NO. 4.14

Percentage of Leased-in Area to Operated Area in selected Districts in 1990-91

(Area in Hectares)

District	Marginal Upto 1 ha	Small 1 to 2 ha	Semi-medium 2 to 4 ha	Medium 4 to 10 ha	Large 10 ha & above	All size classes
(1) Thane ..	280	247	471	446	269	1713
	(0.5)	(0.3)	(0.5)	(0.4)	(0.3)	(0.4)
(2) Raigad ..	170	364	310	289	134	1267
	(0.3)	(0.5)	(0.4)	(0.3)	(0.3)	(0.4)
(3) Sindhudurg ..	146	179	183	394	1197	2099
	(0.3)	(0.3)	(0.2)	(0.3)	(1.1)	(0.5)
(4) Solapur ..	38	193	490	1322	1351	3394
	(0.1)	(0.1)	(0.2)	(0.3)	(0.5)	(0.3)
(5) Kolhapur ..	580	499	733	689	469	2972
	(0.5)	(0.4)	(0.6)	(0.7)	(1.2)	(0.6)
(6) Amravati ..	35	393	702	1567	678	3375
	(0.1)	(0.3)	(0.4)	(0.6)	(0.8)	(0.5)
(7) Yavatmal ..	40	700	1368	2863	1623	6594
	(0.5)	(0.5)	(0.5)	(0.8)	(1.2)	(0.7)
(8) Gadchiroli ..	61	227	595	425	0	1308
	(0.3)	(0.5)	(0.9)	(0.6)	(0.0)	(0.6)
State ..	1803	3763	7743	12471	9202	34982
	(0.1)	(0.1)	(0.1)	(0.2)	(0.4)	(0.2)

Note : Figures in the brackets are percentages.

The above Table indicates the districts where the proportion of leased-in area was higher than State level percentage (0.2). 8 districts in the above Table accounted for about 0.24 lakh ha leased-in area out of State total (0.35 lakh ha) leased-in area. The proportion of this leased-in area for 8 districts to State total was 65%. Thus, about two-third leased-in area had covered in these districts. Maximum proportion of leased-in area was in large holdings of Sindhudurg, Solapur, Kolhapur, Amravati and Yavatmal districts. The proportion of leased-in area in different size classes showed an upward trend in Solapur, Amravati and Yavatmal districts with increase in size class of holdings. In the remaining five districts, the trend was irregular.

(B) LAND USE

4.61 The most important item of land use is the net area sown which accounted for 85.5 per cent of the total operated area in the State. Districtwise findings are given in the Table No. 12 of Appendix II. The State level distribution of this area according to major size classes is presented in the following Table No. 4.15.

TABLE NO. 4.15

Percentage of Main Land Use to Operated Area in 1990-91

(Area in lakh ha)

Major Size Classes	Operated area	Net area sown		Uncultivated land		Land not available for cultivation	
		Area	%	Area	%	Area	%
Marginal ..	16.18	14.76	91.2	0.45	2.8	0.51	3.2
Small ..	39.83	36.31	91.2	1.14	2.8	1.13	2.8
Semi-medium ..	58.80	52.02	88.5	2.30	3.9	2.12	3.6
Medium ..	68.56	57.59	84.0	4.00	5.8	3.28	4.8
Large ..	25.88	18.22	70.4	2.93	11.3	2.24	8.6
All Size Classes ..	209.25	178.90	85.5	10.82	5.2	9.28	4.4

Note : Area under current fallows 10.25 lakh ha i.e. 4.9% not shown in the above table.

Data in the above Table reveals that the percentage net area sown in the individual size classes showed a downward trend from 91.2% to 70.4% with increase in the size class of holdings. This indicates that in the larger holdings, the proportionate area devoted to agricultural production was comparatively lower. This is attributed to the fact that the percentage area under total uncultivated land (i.e. lands include other fallow land, culturable waste and other uncultivated land) showed a gradual upward trend with increase in the size class of holdings. Similar trend was also observed in case of land not available for cultivation (i.e. lands include forests, non-agricultural use and also barren and uncultivable land), particularly in the larger size groups, where the percentage area under each of these two items of land use was relatively high.

(C) IRRIGATION

4.62 As already stated in Section II, the percentage of net irrigated area in 11 districts was higher than the State (11.5%). To study the relationship between the extent of irrigation and the size of holdings, the percentage distribution of net irrigated area to net area sown in these districts is presented in the following Table No. 4.16.

TABLE NO. 4.16

Percentage of Net Irrigated Area to Net Area Sown in 1990-91

District	Size class of holdings in hectares					
	Marginal (Upto 1)	Small (1 to 2)	Semi-medium (2 to 4)	Medium (4 to 10)	Large (10 and above)	All size Classes
(1) Nasik ..	18.7	17.1	14.0	9.8	2.6	12.5
(2) Ahmadnagar ..	34.6	31.1	24.8	18.4	15.8	25.0
(3) Pune ..	34.1	33.2	26.7	16.5	10.4	22.9
(4) Solapur ..	34.4	29.0	23.4	17.7	11.3	20.7
(5) Satara ..	27.1	27.7	21.5	16.0	15.3	22.5
(6) Sangli ..	23.0	21.0	16.3	11.2	7.8	16.1
(7) Kolhapur ..	20.2	18.1	14.1	11.1	6.2	15.5
(8) Nagpur ..	22.3	16.4	15.4	14.4	14.9	15.7
(9) Bhandara ..	40.9	41.1	41.1	38.3	6.5	40.1
(10) Chandrapur ..	41.1	22.2	13.7	9.3	7.7	14.8
(11) Gadchiroli ..	16.3	14.3	11.1	11.0	9.1	12.1
State ..	17.9	13.7	11.8	9.4	8.0	11.5

Data in the above Table reveals that the percentage of net irrigated area to net area sown showed a downward trend with the increase in the size of holdings at state level. The same trend was observed in almost all the districts except Nagpur and Bhandara districts.

(D) CROPPING PATTERN

According to Size Class of Holdings

The percentage details regarding area under important crops according to size class of holdings to gross cropped area separately for irrigated, unirrigated and total area are given as follows.

Rice

4.63 The percentage distribution of area under Rice to gross cropped area is shown in the following Table No. 4.17.

TABLE NO. 4.17

Percentage of area under Rice to gross cropped area in 1990-91

Major Size Classes	Percentage area under Rice		
	Irrigated	Unirrigated	Total
(1) Marginal ..	21.0 (37.4)	20.4 (20.3)	20.5 (24.7)
(2) Small ..	16.4 (11.7)	9.4 (9.7)	10.3 (10.0)
(3) Semi-medium ..	12.8 (11.2)	7.3 (7.1)	8.0 (7.6)
(4) Medium ..	11.2 (17.3)	6.5 (5.9)	6.9 (6.6)
(5) Large ..	9.2 (16.9)	8.1 (6.5)	8.1 (7.0)
All Size Classes ..	14.1 (17.4)	8.6 (7.8)	9.2 (8.9)

Note : Figures in the bracket indicate percentage of last census.

It is revealed from the above Table that the percentage of *Irrigated Rice* area to irrigated gross cropped area was 14.1%. This proportion was decreased as compared to 1985-86. The largest proportion of 21.0 per cent was accounted for marginal holdings. With increase in the size class of holdings, the proportions decreased in Irrigated Rice. The large holdings were accounted for only 9.2 per cent. The proportion of irrigated area under Rice to irrigated gross cropped area showed decrease in the case of marginal, medium and large hodings in 1990-91 as compared to 1985-86. In case of *Unirrigated Rice*, the proportion for current census (8.6%) was higher than last census (7.8%) for all size classes. As in irrigated area, the highest proportion 20.4% and 20.5% was noticed in marginal holdings for unirrigated and total area respectively. The districtwise distribution for total area of Rice is shown in the Table No.16 of Appendix II. It is observed that the proportionate area under this crop in different size classes showed a downward trend in all the districts except Gadchiroli with the increase in the size class of holdings.

Jowar

4.64 In respect of Jowar the data is shown in the following Table No. 4.18.

TABLE NO. 4.18

Percentage of area under Jowar to gross cropped area in 1990-91

Major Size Classes	Percentage area under Jowar		
	Irrigated	Unirrigated	Total
(1) Marginal ..	18.2 (22.1)	32.6 (31.5)	30.1 (29.1)
(2) Small ..	19.1 (12.4)	34.9 (35.7)	32.7 (31.9)
(3) Semi-medium ..	19.6 (13.6)	34.6 (38.0)	32.8 (34.9)
(4) Medium ..	17.0 (23.3)	33.0 (39.3)	31.4 (38.2)
(5) Large ..	17.2 (24.7)	30.1 (38.0)	29.0 (37.4)
All Size Classes ..	18.4 (17.3)	33.5 (37.7)	31.8 (35.4)

Note : Figures in the bracket indicate percentage of last census.

The data in the above Table indicates that the highest proportion (19.6%) was observed in semi-medium holdings for *Irrigated Jowar* during current census. In respect of *Unirrigated Jowar*, the highest proportion (34.9%) was observed in small holdings. The proportion was decreased in semi-medium, medium and large holdings in current census as compared to last census. The same trend was observed for total area of this crop.The districtwise distribution is shown in the Table No.17 of Appendix II. Downward trend with increase in size class of holdings was observed in Satara, Sangli, Jalna, Beed, Parbhani, Usmanabad, Amravati and Yavatmal districts. Regular trend was not observed in the remaining districts.

Bajri

4.65 The size class of holdingwise figures are presented in the following Table No. 4.19.

TABLE NO. 4.19

Percentage of area under Bajri to gross cropped area in 1990-91

Major Size Classes	Percentage area under Bajri		
	Irrigated	Unirrigated	Total
(1) Marginal ..	7.1 (2.0)	12.9 (9.8)	11.9 (7.8)
(2) Small ..	7.2 (2.8)	13.4 (10.7)	12.6 (9.4)
(3) Semi-medium ..	6.3 (3.0)	13.5 (11.5)	12.7 (10.4)
(4) Medium ..	4.6 (4.5)	11.8 (11.1)	11.1 (10.7)
(5) Large ..	4.5 (5.8)	10.9 (10.6)	10.3 (10.4)
All Size Classes ..	6.0 (3.2)	12.6 (11.0)	11.8 (10.1)

Note : Figures in the bracket indicate percentage of last census.

Data in the above Table shows that proportions for irrigated, unirrigated and total area had increased respectively for all size classes as compared to the corresponding proportions of last census 1985-86. Small holdings had the highest proportion (7.2%) of irrigated area. Semi-medium holdings had the highest proportion for unirrigated and total area both i.e. 13.5% and 12.7% respectively. The districtwise distribution for total area of this crop is shown in the Table No.18 of Appendix II. The increased trend with increase in size class of holdings was observed for Sangli district. It showed downward trend in Ahmadnagar, Pune, Aurangabad and Jalna districts with increase in the size of holdings. In the remaining districts, the trend was irregular.

Wheat

4.66 The percentage distribution of area under Wheat is shown in the following Table No. 4.20.

TABLE NO. 4.20

Percentage of area under Wheat to gross cropped area in 1990-91

Major Size Classes	Percentage area under Wheat		
	Irrigated	Unirrigated	Total
(1) Marginal ..	9.0 (11.4)	0.9 (2.6)	2.3 (4.9)
(2) Small ..	10.9 (32.9)	0.8 (3.1)	2.2 (8.0)
(3) Semi-medium ..	12.7 (31.0)	0.9 (2.7)	2.3 (6.3)
(4) Medium ..	15.5 (12.3)	1.2 (1.8)	2.6 (2.4)
(5) Large ..	19.7 (12.1)	1.3 (1.8)	2.8 (2.3)
All Size Classes ..	13.0 (23.3)	1.0 (2.3)	2.4 (4.6)

Note : Figures in the bracket indicate percentage of last census.

The date in the above Table indicates that proportion had decreased in respect of irrigated, unirrigated and total area of this crop, as compared to last census 1985-86. According to size classes the proportion for first three size classes had decreased but it had increased for the last two size classes i.e. medium and large holdings in respect of irrigated area of this crop.The proportion had increased with increase in size class of holdings in irrigated area. The highest proportion in large holdings was 19.7% for irrigated crop. Districtwise distribution is shown in the Table No.19 of Appendix II for total area. Beed, Usmanabad, Wardha, Chandrapur districts had the increased trend of proportion with increase in the size class of holdings while Pune district had the downward trend with increase in the size class of holdings. In the remaining districts it had irregular trend.

Tur

4.67 In respect of Tur, the percentage distribution of area to gross cropped area is shown in the following Table No. 4.21.

TABLE NO. 4.21

Percentage of area under Tur to gross cropped area in 1990-91

Major Size Classes	Percentage area under Tur		
	Irrigated	Unirrigated	Total
(1) Marginal ..	0.5 (0.1)	2.9 (2.3)	2.5 (1.7)
(2) Small ..	0.7 (0.2)	4.8 (3.5)	4.3 (3.0)
(3) Semi-medium ..	0.8 (0.2)	5.2 (3.8)	4.6 (3.4)
(4) Medium ..	0.7 (0.3)	5.6 (4.3)	5.1 (4.1)
(5) Large ..	0.6 (0.6)	5.7 (4.1)	5.3 (3.9)
All Size Classes ..	0.7 (0.2)	5.1 (3.9)	4.6 (3.5)

Note : Figures in the bracket indicate percentage of last census.

It reveals from the above Table that the proportion of each irrigated, unirrigated and total area was higher than the corresponding proportion of last census for all size classes. The same trend was observed in each of the five size classes of holdings. During current census, highest proportion (0.8%) of semi-medium holdings in respect of irrigated area was observed. For unirrigated and total area in large holdings, it was 5.7% and 5.3% respectivey. Districtwise distribution is shown in the Table No. 20 of Appendix II. In Solapur, Aurangabad, Jalna, Latur, Beed, Usmanabad districts the proportions had increased with increase in the size class of holdings. In the remaining districts the trend was irregular.

Fruit Crops

4.68 Percentage distribution of area under Fruit crops to gross cropped area is shown in the following Table.

TABLE NO. 4.22

Percentage of area under Fruit crops to gross cropped area in 1990-91

Major Size Classes	Percentage area under Fruit Crops		
	Irrigated	Unirrigated	Total
(1) Marginal ..	4.3 (2.0)	0.3 (0.2)	1.0 (0.6)
(2) Small ..	6.7 (3.9)	0.2 (0.1)	1.1 (0.7)
(3) Semi-medium ..	9.1 (4.5)	0.2 (0.1)	1.3 (0.7)
(4) Medium ..	9.9 (9.0)	0.3 (0.2)	1.2 (0.7)
(5) Large ..	8.1 (8.2)	0.5 (0.3)	1.2 (0.7)
All Size Classes ..	8.1 (5.0)	0.3 (0.2)	1.2 (0.7)

Note : Figures in the bracket indicate percentage of last census.

Figures in the above Table show that the proportion had increased in all size classes in respect of irrigated area (except large holdings), unirrigated area and total area of fruit crops as compared to last census, 1985-86. Highest proportion (9.9%) was observed for medium holdings under area of irrigated fruit crops. Districtwise distribution for total area is shown in the Table No. 21 of Appendix II. From this Table for unirrigated and total fruit crops, the highest proportion was observed in large and semi-midium holdings i. e. 0.5% and 1.3 % respectively. It reveals that in Ratnagiri district, the proportion had increased with increase in size class of holdings, while it had decreased in Nasik district. In the remaining districts this trend was irregular.

Sugarcane

4.69 The percentage distribution of area under Sugarcane to gross cropped area is shown in the following Table No. 4.23.

TABLE NO. 4.23

Percentage of area under Sugarcane to gross cropped area in 1990-91

Major Size Classes	Percentage area under Sugarcane		
	Irrigated	Unirrigated	Total
1. Marginal ..	27.4 (10.1)	--	4.8 (2.6)
2. Small ..	24.5 (12.0)	--	3.4 (2.0)
3. Semi-medium ..	22.6 (12.8)	--	2.7 (1.6)
4. Medium ..	21.4 (16.6)	--	2.1 (1.0)
5. Large ..	19.0 (16.0)	--	1.6 (0.8)
All Size Classes ..	23.1 (13.1)	--	2.7 (1.5)

Note : Figures in the bracket indicate percentage of last census.

The figures in the above Table indicate that Sugarcane crop occupied the highest irrigated area (23.1%) to the total irrigated area of all crops in the State. The proportion of irrigated area was the highest (27.4%) in case of marginal holdings and lowest (19.0%) in case of large holdings. As compared to last census, the proportions in all the five size classes had increased for this crop. The same trend was observed for the proportion of total area of this crop to gross cropped area. The districtwise distribution is shown in the Table No. 22 of Appendix II. In the districts of Ahmadnagar, Pune, Solapur, Sangli and Kolhapur, there was declining trend in proportionate area under the crop with increase in the size of holdings. This trend was irregular in the remaining districts.

Cotton

4.70 Percentage of area under Cotton to gross cropped area is shown in the following Table No. 4.24.

TABLE NO. 4.24

Percentage of area under Cotton to gross cropped area in 1990-91

Major Size Classes	Percentage area under Cotton		
	Irrigated	Unirrigated	Total
(1) Marginal ..	0.7 (6.8)	10.3 (10.0)	8.7 (8.5)
(2) Small ..	1.1 (7.7)	17.5 (15.4)	15.3 (14.1)
(3) Semi-medium ..	1.3 (5.7)	18.3 (15.9)	16.2 (14.6)
(4) Medium ..	3.9 (1.3)	18.6 (15.7)	17.2 (14.6)
(5) Large ..	6.2 (1.2)	14.6 (11.8)	13.9 (11.3)
All Size Classes ..	2.2 (5.3)	17.2 (14.8)	15.5 (13.7)

Note : Figures in the bracket indicate percentage of last census.

From the above Table, it is seen that in respect of *Irrigated Cotton*, the proportion of marginal, small and semi-medium holdings was very less i.e. 0.7 %, 1.1% and 1.3% respectively as against corresponding proportions of last census. The highest proportion for irrigated area was for large holdings (6.2%). In respect of unirrigated and total area, it was 18.6% and 17.2% for medium holdings each respectively. The districtwise distribution is shown in the Table No. 23 of Appendix II. In Wardha district, the proportion decreased with increase in size classes. The increase trend was observed upto 10 ha in Jalgaon and Jalna districts. The trend was irregular in the remaining districts.

Groundnut

4.71 Percentage distribution of area under Groundnut is shown in the following Table No. 4.25.

TABLE NO. 4.25

Percentage of area under Groundnut to gross cropped area in 1990-91

Major Size Classes	Percentage area under Groundnut		
	Irrigated	Unirrigated	Total
(1) Marginal ..	1.5 (2.1)	3.2 (8.2)	2.9 (6.6)
(2) Small ..	1.9 (3.2)	2.6 (6.6)	2.5 (6.0)
(3) Semi-medium ..	2.8 (2.2)	2.3 (3.6)	2.4 (3.4)
(4) Medium ..	4.5 (2.4)	2.7 (2.0)	2.9 (2.0)
(5) Large ..	5.3 (1.9)	3.9 (1.3)	4.0 (1.4)
All Size Classes ..	3.1 (2.5)	2.7 (3.5)	2.8 (3.4)

Note : Figures in the bracket indicate percentage of last census.

It is seen from the above figures that the proportion was increased in irrigated area, but decreased in unirrigated and total area for all size classes during the current census, as compared to the last

census.The highest proportion was 5.3%, 3.9% and 4.0% for large holdings in case of irrigated, unirrigated and total holdings. Districtwise distribution is shown in the Table No. 24 of Appendix II. The proportion increased with increase in size class of holdings in Dhule, Jalgaon and Solapur districts for this crop. It had decreased in Nasik district. In the remaining districts, the trend was irregular.

Fodder Crops

4.72 Percentage distribution is shown in the following Table No. 4.26.

TABLE NO. 4.26

Percentage of area under Fodder crops to gross cropped area in 1990-91

Major Size Classes	Percentage area under Fodder crops		
	Irrigated	Unirrigated	Total
(1) Marginal ..	1.8 (0.9)	4.0 (3.1)	3.6 (2.6)
(2) Small ..	1.7 (1.2)	3.1 (2.4)	2.9 (2.2)
(3) Semi-medium ..	1.3 (1.4)	3.5 (2.5)	3.3 (2.3)
(4) Medium ..	0.8 (1.7)	4.5 (3.0)	4.1 (2.9)
(5) Large ..	0.6 (1.6)	8.5 (5.2)	7.9 (5.0)
All Size Classes ..	1.3 (1.3)	4.3 (3.1)	4.0 (2.9)

Note : Figures in the bracket indicate percentage of last census.

It reveals from the data in the above Table that proportion of *Irrigated fodder* for marginal holdings was highest (1.8%). In respect of unirrigated and total fodder crops area, this proportion was highest i.e. 8.5% and 7.9% respectively in large holdings each. The districtwise distribution of area under fodder crops is shown in the Table No. 25 of Appendix II. The proportion to the gross cropped area showed increasing trend as the size of holdings increased in all the districts.

Food Crops and Non-food Crops

4.73 Data further analysed according to the size class of holdings for food crops revealed that the proportions of area covered decrease with increase in the size class of holdings for irrigated, unirrigated and total area. The percentages of food crops for the total area, according to size class of holdings in 1990-91 were indicated for marginal holdings (81.8%), small holdings (75.7%), semi-medium holdings (74.2%), medium holdings (71.6%) and large holdings (70.1%). This indicates that the percentage of food crops area was higher in case of small holdings than large holdings. This trend was opposite in case of the remaining percentage of each size class, in respect of non-food crops, accounting 100 per cent of gross cropped area.

Cropping Intensity

4.74 Districtwise cropping intensity according to size class of holdings is shown in the Table No. 26 of Appendix II. From the data in this Table, it is seen that highest cropping intensity (142%) for marginal holdings was observed in Usmanabad district. Bhandara district had the highest cropping intensity for the remaining four size classes i.e. small (135%), semi-medium (131%), medium (124%)

and large (115%) in the State. In most of the districts, the cropping intensity decreased with increase in the size class of holdings.

Area under Fruit Crops

4.75 Horticultural Development programme under Employment Guarantee Scheme is started from the year 1990-91 in Maharashtra. To know the effect about increased area due to this Scheme regarding fruit crops plantation in future, the information is given separately in Appendix III. Appendix III indicates irrigated, unirrigated and total area of important fruit crops in 1990-91. From this Table, it is seen that the proportion of fruit crop in respect of irrigated and unirrigated crops to total fruit crops area was 80.7% and 19.3% respectively at the State level in 1990-91. The corresponding proportion for coastal region i.e. Thane, Raigad, Ratnagiri and Sindhudurg districts was 3.9% and 96.1% respectively during current census. This region had the largest unirrigated fruit crops area (35681 ha) out of the unirrigated fruit crops area of State total (44404 ha) which accounted for 80.4% to State total unirrigated fruit crops area.

❑❑❑

CHAPTER V

ANALYSIS OF CENSUS RESULTS FOR SCHEDULED CASTES AND SCHEDULED TRIBES HOLDINGS

Introduction

5.1 The stratification of holdings by Social groups, namely Scheduled Castes and Scheduled Tribes was undertaken for the first time during the Agricultural Census 1980-81. This was done with the specific purpose of getting the data on various parametres covered by the Agricultural Census, separately for Scheduled Castes and Scheduled Tribes, which could facilitate policy decisions for the welfare of these Social groups.

In complete enumeration, the data in respect of number of operational holdings and their operated area of all the operational holdings according to Scheduled Castes, Scheduled Tribes and Other Social groups was collected. Based on this data collected findings for Scheduled Castes and Scheduled Tribes holdings in respect of operational holdings and type of holdings etc. at State, District and Taluka level also are given in the 'Bulletin of Agricultural Census, 1990-91,' published in March 1993. The data collected in respect of tenure status, land use, irrigation status, sourcewise irrigation, cropwise irrigated and unirrigated area was collected on sample basis, separately for Scheduled Castes and Scheduled Tribes holdings in the Sample Survey of Agricultural Census, 1990-91. On the basis of this information, findings for Scheduled Castes and Scheduled Tribes holdings are summarised in the following paragraphs.

(A) OPERATIONAL HOLDINGS

Distribution of Operational Holdings

5.2 The Scheduled Castes holdings were 7.60 Lakh in 1990-91 and 6.45 Lakh in 1985-86. The Scheduled Tribes holdings were 6.34 lakh in 1990-91 and 5.49 lakh in 1985-86. The Total holdings were 94.70 lakh in 1990-91 and 80.01 lakh in 1985-86. Scheduled Castes and Scheduled Tribes holdings accounted for 8.0 per cent and 6.7 per cent of the total number of operational holdings in 1990-91. This represented increase of 17.8 per cent and 15.5 per cent in 1990-91 over the number of holdings for these two social groups in 1985-86. The opereted area of Scheduled Castes holdings was 12.62 lakh ha and 11.83 lakh ha in 1990-91 and 1985-86 respectively. In respect of Scheduled Tribes holdings the operated area was 15.32 lakh ha and 14.55 lakh ha in 1990-91 and 1985-86 respectively. The operated area of Total holdings was 209.25 lakh ha and 213.52 lakh ha in 1990-91 and 1985-86 respectively. In terms of operated area, Scheduled Castes and Scheduled Tribes holdings had shares of 6.1 per cent and 7.3 per cent respectively in 1990-91 to the total operated area.

Average Size of a Holding

5.3 Average size of a holding for Scheduled Castes and Scheduled Tribes was 1.66 hectares and 2.42 hectares respectively as against 2.21 hectares for total holdings in 1990-91. Corresponding average size of a holding in 1985-86 was 1.83 ha and 2.65 ha respectively which indicated decrease by 9.3 per cent and 8.7 per cent respectively.

Distribution by Type of Holdings

5.4 Among the Scheduled Castes holdings, Individual and Joint holdings were 7.19 lakh and 0.41 lakh respectively in 1990-91. Among the Scheduled Tribes holdings Individual and Joint

holdings were 5. 77 lakh and 0.57 lakh respectively in 1990-91. About 95 per cent of the operational holding of Scheduled Castes were Individual holdings, while the corresponding proportion for Scheduled Tribes was 91 per cent. Thus the remaining proportions 5 per cent and 9 per cent were Joint holdings respectively. Among Scheduled Castes holdings, the operated area of Individual and Joint holdings was 11.72 lakh ha and 0.90 lakh ha respectively in 1990-91. Among the Scheduled Tribes holdings, the operated area of Individual and Joint holdings was 13.57 lakh ha and 1.75 lakh ha respectively in 1990-91. Among scheduled castes holdings, the proportions of Individual and Joint holdings in respect of operated area were 93 per cent and 7 per cent respectively in 1990-91. Among Scheduled Tribes holdings, the proportions of operated area for individual and Joint holdings were 89 per cent and 11 per cent respectively in 1990-91.

Tenancy of Operational Holdings

5.5 Percentage distribution of operational holdings by tenancy status in 1990-91 is shown in the following Table No. 5.1

TABLE NO. 5.1

Distribution of Operational Holdings and operated area by Tenancy Status in 1990-91

Category	Operational Holdings (in lakh)		Operated Area (in lakh ha)	
	S. C.	S. T.	S. C.	S. T.
(1) Wholly owned and self-operated ..	7.55 (99.34)	6.24 (98.42)	12.50 (99.12)	15.06 (98.30)
(2) Wholly leased-in ..	0.01 (0.13)	0.02 (0.32)	0.02 (0.16)	0.05 (0.33)
(3) Wholly otherwise operated ..	0.03 (0.40)	0.05 (0.79)	0.05 (0.40)	0.10 (0.65)
(4) (a) Partly owned ..	*	*	0.02 (0.16)	0.06 (0.39)
(b) Partly leased-in ..	*	*	0.01 (0.08)	0.02 (0.13)
(c) Partly otherwise operated ..	*	*	0.01 (0.08)	0.03 (0.20)
Total (a)+(b)+(c) ..	0.01 (0.13)	0.03 (0.47)	0.04 (0.32)	0.11 (0.72)
All Categories ..	7.60 (100)	6.34 (100)	12.61 (100)	15.32 (100)

Note : (1) Figures in the bracket indicate percentages. (2) * = Separate figures not available.

It is seen from the data in the above Table that about 99 per cent Scheduled Castes and about 98 per cent Scheduled Tribes holdings were wholly owned and self-operated. In terms of operated area, the proportions were about 99 and 98 per cent respectively for both Social groups. The proportions of area leased-in both wholly and partly for Scheduled Castes and Scheduled Tribes formed 0.24 per cent and 0.46 per cent respectively.

(B) LAND USE

Land Utilisation

5.6 Percentage distribution under land use is given in the Table No. 5.2 as below.

TABLE NO. 5.2

Percentage Distribution under Main Land Use to Operated Area in 1990-91 (According to Social Groups)

(Area in lakh hectares)

Social groups	Operated Area	Net Area Sown		Uncultivated Land		Land not available for cultivation	
		Area	%	Area	%	Area	%
1. Total Holdings	209.25	178.90	85.5	10.82	5.2	9.28	4.4
2. Scheduled Castes	12.62	11.12	88.1	0.48	3.8	0.38	3.0
3. Scheduled Tribes	15.32	13.40	87.5	0.34	2.2	0.64	4.2

Note : Area under current fallow 10.25 lakh ha (i.e. 4.9%) for total holdings, 0.63 lakh ha (i.e. 5.0%) for Scheduled Castes and 0.93 lakh ha (i.e. 6.0%) for Scheduled Tribes holdings not shown in the above Table.

From the data in the above Table, it is seen that the net area sown formed 88.1 per cent and 87.5 per cent to operated area for Scheduled Castes and Scheduled Tribes holdings respectively. These proportions were higher than total holdings. The land uncultivated accounted for 3.8 per cent and 2.2 per cent to operated area for these two groups repsectively as against 5.2 per cent for total holdings. This indicates that the proportion of net area sown for Scheduled Castes and Scheduled Tribes holdings was higher than total holdings.

(C) IRRIGATION

Irrigation Status

5.7 The percentage of net irrigated area to net area sown for Scheduled Castes and Scheduled Tribes holdings was 13.1 per cent and 8.8 per cent respectively. Much larger proportion of Scheduled Tribes holdings was concentrated in dry land area.

Sources of Irrigation

5.8 The State level figures of number of holdings receiving irrigation with net irrigated area covered by each source are given in the following Table No. 5.3

TABLE NO. 5.3

Number of Holdings and Area Irrigated by Different Sources in 1990-91

Source	No. of holdings (in lakh)				Net irrigated area (in lakh ha)			
	Scheduled Castes		Scheduled Tribes		Scheduled Castes		Scheduled Tribes	
	No.	%	No.	%	Area	%	Area	%
Wells	0.76	55.5	0.51	63.0	1.01	68.7	0.88	75.2
Canals	0.31	22.6	0.11	13.6	0.27	18.4	0.11	9.4
Tanks	0.12	8.8	0.10	12.3	0.11	7.5	0.11	9.4
Others	0.19	13.9	0.09	11.1	0.08	5.4	0.07	6.0
Total	1.37*		0.81*		1.47	100.0	1.17	100.0

Note : *= Exclusive number of holdings receiving irrigation

It is revelaed from the above Table that in terms of net irrigated area, Well was the most important source of irrigation, both for Scheduled Castes and Scheduled Tribes (68.7 per cent and 75.2 per cent of net irrigated area respectively).

5.9 Number of wells in use and average area irrigated per well is shown in the following Table.

TABLE NO. 5.4

Number of Wells and Average Area Irrigated per Well in 1990-91

Item	Scheduled Castes		Scheduled Tribes	
1. Number of Wells in use				
(a) Fitted with pumps	45602	(99.2%)	25717	(97.0%)
(b) Without pumps	354	(00.8%)	777	(03.0%)
Total	*45956*	*(100.0%)*	*26494*	*(100.0%)*
2. Area irrigated by Wells (ha)	101220		88011	
Average area irrigated per Well (ha)	2.20		3.32	
Number of Wells not in use	5789		3680	

From the above Table, it is seen that about 99 per cent and 97 per cent wells were fitted with pumps and the average area irrigated per well was estimated 2.20 ha and 3.32 ha for Scheduled Castes and Scheduled Tribes holdings respectively.

(D) CROPPING PATTERN

5.10 The percentage distribution of principal crops and important crops for Scheduled Castes and Scheduled Tribes holdings is given in Table No. 5.5

TABLE NO. 5.5

Cropping Pattern : Comparison (Scheduled Castes & Scheduled Tribes Holdings) with Total Holdings in 1990-91

Crop	Cropwise Percentage : of its Total area to Gross Cropped Area			of Irrigated area to its Total Area		
	Total	S.C.	S.T.	Total	S.C.	S.T.
Rice	*9.2*	*10.7*	*21.8*	*17.9*	*24.4*	*8.9*
Jowar	*31.8*	*30.4*	*19.0*	*6.8*	*5.4*	*1.8*
Bajri	*11.8*	*10.0*	*6.6*	*6.0*	*4.9*	*2.1*
Wheat	*2.4*	*3.6*	*2.8*	*62.9*	*75.0*	*80.0*
Total Cereals	57.2	55.9	60.0	10.7	13.6	7.6
Tur	*4.6*	*4.1*	*3.1*	*1.8*	*2.0*	*0.0*
Total Pulses	11.7	11.8	10.9	3.7	4.8	3.8
Total Foodgrains	68.9	67.6	70.9	9.5	12.1	7.0
Sugarcane	*2.7*	*2.6*	*2.0*	*100.0*	*100.0*	*100.0*
Total Fruit Crops	1.2	1.2	0.9	80.9	100	92.3
Total Food Crops	74.0	72.5	74.5	14.6	16.9	10.9
Groundnut	*2.8*	*4.3*	*4.8*	*12.9*	*24.5*	*20.3*
Total Oilseeds	6.4	7.8	7.3	7.9	14.6	13.3
Cotton	*15.5*	*16.6*	*11.1*	*1.7*	*3.9*	*5.0*
Total Fodder Crops	4.0	2.9	6.9	4.0	2.8	1.0
Total Non-food Crops	26.0	27.5	25.5	3.6	7.1	6.0
Gross Cropped Area	100.0	100.0	100.0	11.7	14.1	9.7
Area Cropped More Than Once				14.0	24.1	21.0
Net Area Sown				11.5	13.1	8.8

Distribution of Area Under Crops

5.11 It is seen from the Table No. 5.5 that the food crops accounted for 72.5 per cent and 74.5 per cent to the gross cropped area for Scheduled Castes and Scheduled Tribes. Among Scheduled Castes and Scheduled Tribes holdings, Wheat had higher proportion of irrigated area to its total area accounting for 75.0 per cent and 80.0 per cent respectively as compared to Total holdings. In respect of Rice crop, Scheduled Tribes holdings had the highest proportion of its total area to gross cropped area i.e. 21.8 per cent as compared to Total and Scheduled Castes holdings.

Cropping Intensity

5.12 The cropping intensity for Scheduled Castes and Scheduled Tribes holdings was 110 per cent and 108 per cent respectively.

❑❑❑

CHAPTER VI

SUGGESTIONS FOR FUTURE CENSUS BASED ON THE EXPERIENCE OF THE LAST FIVE CENSUSES

Suggestions for future Agricultural Census are given below :

(i) Statutory provisions, formulating part of normal duties of the field agency may be made for conduct of census.

(ii) Provision has to be made in the Revenue Manual giving necessary particulars of the census, nature of work and duties involved and making particular mention that the field work should be carried out by the Patwaris/Talalthis. In a similar manner, specific responsibilities should be assigned to the higher revenue officers at the tahsil, sub-divisional and district levels. More specifically, the district Collector be entrusted with the responsibility of getting the census completed satisfactorily and in time. The progress of the census has to be reviewed at divisional level every month and the timely completion of the field work ensured.

iii) It is necessary to ensure the satisfactory conduct of the census, timely completion of the field-work and availability of finalised census data free from discrepancies and deficiencies etc. For this purpose, it will be necessary to make available the services of the statistical agencies dealing with the Agricultural Statistics, directly or indirectly, during the period of the census.These agencies need to be made specifically responsible for the following items of work :

(a) Training the field staff,

(b) Giving technical guidance,

(c) Supervising the field work and removing the technical lapses,

(d) Scrutiny and finalisation of the census data at the field level after applying all the cross checks so as to ensure the completion of the coverage, consistency of the data on all the relevant items and checking the correctness of the aggregations at the village level,

(e) Reviewing the progress of the census work every fortnight and taking steps for the timely completion of the work in (d) above.

(iv) The supervisory staff of the Revenue Department such as Circle Inspector/Revenue Inspector, Tahsildar, Naib Tahsildar may be made responsible for supervisory duty at the time of collection in order to ensure its credibility and timely submission. So also supervisory staff of the implementing department be increased. In this State Agricultural Department may also be made responsible for supervision of the data at the time of data collection itself, particularly in respect of Input Survey.

(v) Formulation of software programme takes much time and hence software programme of last census for the analysis of data based on standard formats may not be changed for future census. If additional information is required, separate proforma may be prescribed for collection of data.

(vi) The data in respect of women for their operational holdings and operated area may be collected in complete enumeration of Agricultural Census to take policy decisions for the welfare of women in agriculture.

REPORT ON AGRICULTURAL CENSUS
1990-91
MAHARASHTRA STATE

PART II

EXPLANATORY NOTE ON THE STATISTICAL TABLES

The data collected under the Agricultural Census have been summarised in six tables separately for the State and each district, in accordance with the format specified by the Government of India. For proper understanding of these Tables, it is necessary to explain in brief the background and the contents of each Table as also to the meaning of certain figures appearing in the Tables. Accordingly, a brief description of the contents and the clarification of certain figures is given below. Tables 1 to 6 give the information in each of the 11 size classes including five major size classes as follows.

Major Size Classes	Size Classes	Major Size Classes	Size Classes
(1) Marginal	(1) Below 0.02 ha	(4) Medium	(7) 4.0 to 5.0 ha
	(2) 0.02 to 0.5 ha		(8) 5.0 to 7.5 ha
	(3) 0.5 to 1.0 ha		(9) 7.5 to 10.0 ha
(2) Small	(4) 1.0 to 2.0 ha	(5) Large	(10) 10.0 to 20.0 ha
			(11) 20.0 ha and above
(3) Semi-medium	(5) 2.0 to 3.0 ha		
	(6) 3.0 to 4.0 ha		

At State level, these Tables have been presented separately for Toal Holdings, Scheduled Castes and Scheduled Tribes holdings in 11 major size classes. In case of district level, the same Tables are given in 5 major size classes, viz. marginal, small, semi-medium, medium and large.

(1) Description and background of the contents of each Table

The results of Agricultural Census are presented in Tables 1 to 6 in this Part.The results in Table 1 are based on the data of complete enumeration of all the operational holdings in the State; while the results given in the remaining tables viz. 2 to 6 are the estimates of the respective characteristics based on the sample survey of Agricultural Census, carried out in 8594 villages.

TABLE 1

Number and Area of Operational Holdings

This table gives the number of operational holdings and their operated area in each of the 11 size classes, including 5 major size classes, based on complete enumeration of all the holdings in the State. It also shows the split-up of the holdings into individual, joint and institutional holdings and the area thereunder.

TABLE 2

Estimated Number and Area of Operational Holdings by Tenancy Status

This Table gives the estimated number and area of operational holdings classified according to tenancy status in each size class. A holding whose entire area was owned and self-operated by the operator is classified as a *Wholly owned and self-operated holding.* A holding taken entirely on lease or rent is classified as *a Wholly leased-in holding.* A holding whose entire area relates to area occupied and operated by the operational holder by encroachment or through forcible occupation of Government or private land is classified as a *Wholly otherwise operated holding.* If part of a holding was taken on lease, and the rest was otherwise operated and owned, it has been classified as a *Partly owned, partly leased-in and partly otherwise operated holding.*

TABLE 3

Estimated Area Under Different Land Use

This Table shows the estimated area under different land use, in each of the size class viz. (i) Net area sown, (ii) Area under current fallows, (iii) Net cultivated area (i.e.net area sown + area under current fallows), (iv) Other uncultivated land excluding fallow land, (v) Fallow land other than current fallows, (vi) Culturable waste land, (vii) Total uncultivated land and (viii) Land not available for cultivation.

TABLE 4

Estimated Number of Operational Holdings by Irrigation Status

This Table gives the estimated number and area of operational holdings classified according to three categories viz. Wholly irrigated holdings, Wholly unirrigated holdings and Partly irrigated holdings. A *Wholly irrigated holding* is one whose net area sown was entirely irrigated. When the net area sown of a holding was all unirrigated, it has been termed as a *Wholly unirrigated holding.* If the land under crop in a holding was partly irrigated and the rest unirrigated, it has been classified as a *Partly irrigated holding.* This Table also gives the number of irrigated holdings and net irrigated area, taking into account the first and third categories of holdings and their area irrigated.

TABLE 5(A)

Estimated Number of Operational Holdings, receiving Irrigation and Area Irrigated by Different Sources

This Table gives the estimated number of operational Holdings, receiving irrigation and area irrigated by different sources. It also furnishes the information in respect of exclusive number of irrigated holdings i.e. holdings having one or more sources of irrigation, but counted only once.

TABLE 5(B)

Estimated Number of Wells and Tubewells

This Table gives the information about number of Wells and Tubewells. It also shows the break up of Wells as In use and Not in use. The wells in use further split up into with Pumpsets and without Pumpsets etc. The wells with Pumpsets and Tubewells further classified as Electric and Diesel.

TABLE 6

Estimated Irrigated and Unirrigated Area under Different Crops

This Table gives the estimated irrigated, unirrigated and total area under different crops and that under categorised aggregates like cereals, pulses, foodgrains, condiments and spices, fruit crops, vegetables, food crops, oilseeds, fibres crops and others along with number of holdings growing the crop.

(2) **Limits of size class of holdings**

The value of the upper limit of each size class belongs to the next higher size class.

(3) **Effect of rounding on corresponding total**

The total operated area in column 4 of the census Tables may not agree with the corresponding totals of these items given under catagorywise distribution of these figures, as they have been recorded to the nearest integer at the size class level as well as at the various other levels. For similar reason, size groupwise area figures, given in Table 6 may not add upto the corresponding total gross cropped area given in columns 5, 6 and 7 of that Table. This disparity may become more in case of smaller size groups of holdings, due to the the above two reasons.
