PUNE

FOREWORD

I am happy to place on record the 6th Agicultual Census Report of the Maharashtra State for the year 1995-96. The operational holding being the basic unit of decision making in agriculture, detailed data on structures of holdings are absolutely necessary for formulation of any meaningful and effective strategy for its development. The census data fills in this longfelt gap in agricultural statistics. The holding-wise information is of considerable utility in planning of agricultural production programmes.

As like in the previous censuses, it was found that the number of small and marginal holdings have increased accounting for about two third i.e.70 % of the total operational holdings in the state but with hardly 34% share in the total operated area. Another important feature in this census is that the average size of holding has come down from 2.21 ha. in 1990-91 to 1.87 ha. in 1995-96.

The work of Agricultural Census was completed putting hard work by Agriculture department in cooperation with Revenue department and National Informatics Centre, Pune. I place on record my deep appreciation and gratitude to them. I also appreciate the active role and guidance for census work given by the Commissioner Agriculture, Maharashtra State, Pune. The Deputy Commissioner (Agriculture Census) and his staff exerted a great deal in completing the voluminous work of Agricultural Census 1995-96.

I wish this Report will be useful to planners, decision makers, extension workers and researchers.

(J. S. SAHARIA)
Agricultural Census Commissioner
and Secretary (Agriculture)
Government of Maharashtra,

Mantralaya,
Mumbai 400 032.

PREFACE

The sixth Agricultural Census pertaining to the year 1995-96 was conducted with the purpose of collecting data on number and area of operational holdings throughout the State. Fot the first time in this census, the operational holdings details are collected for male and female separately.

Besides data relating to operational holdings in different size classs, type of holdings, tenancy status, land use pattern, irrigation status, area irrigated by different sources and area under different crops was collected.

The results of the Agricultural Census for the State and districts are presented in this report. The results obtained in respect of Scheduled Castes and Scheduled Tribes are also presented .

The Talathis from vidarbh region had boycotted the work of Agricultural Census. This region comprises nine districts . As per instructions from Govt. of India, the results of complete Agricultural Census 1995-96 for 9 districts are based on the ratio of Agril.Census 1990-91 and 1995-96 of remaining 20 districts.The results of sample Agricultural Census of 9 districts are derived on the basis of ratio of sample Agricultural Census 1985-86 and 1990-91 for same districts of Vidarbha region.

The results of the Agricultural Census data are extensively utilised not only by different departments, but also by the Research Workers, Economists and those associated with the agricultural planning and development. The results of Census will be considerably helpful for policy formulation and to assess the impact of different Agricultural projects.

The talathis to whom the responsibility of field work was entrusted have done the job during census period except those from Vidarbh region. Principal Secretary, Revenue and Forest Department, Agril. Census Commissioner and Secretary Agriculture, Animal Husbandry, Dairy Development and Fisheries Department, Divisional Commissioners, Collectors and Deputy Commissioners (Revenue) gave guidance to the field functioneries.Resident Deputy Collectors, Sub-Divisional Officers,Tahasildars, Revenue Inspectors and other Revenue staff gave necessary support in getting the work done .

The initial work of planning and organisation of Agricultural Census 1995-96 was completed during the tenure period of Shri D.A.Takalkar, Ex-Deputy Commissioner,Agricultural Census. Shri A.G.Ghawate, Ex-Deputy Commissioner,Agricultural Census get monitored the field work and computerization work. Dr. H.D.Nandwate, Deputy Commissioner, Agricultural Census and Shri V.B.Auti, Senior Statistical Assistant completed the work of compilation of Tables and drafting of this report.

I would, therefore, like to place on record the excellent services rendered by the present and previous officers and the staff of Agricultural Census Cell.

Mrs. S.P.Sardesai, Technical Director, National Informatics Centre (W.R.) , Pune and her colleagues took personal interest and efforts in the development of computer programme and in giving guidance in electronic processing of the data.

I am grateful to the officers of Government of India for their guidance and help in the conduct of Agricultural Census programme in the State.

Dr. Sudhirkumar Goel
Commissioner, Agriculture,
Maharashtra State,
Pune-411001.

Report On Agricultural Census 1995-96
Maharashtra State

INTRODUCTION :-

The Agricultural Census 1995-96 is the sixth census conducted with 1995-96 as the reference year and methodology adopted is the same as that of previous Census i.e. complete enumeration by retabulation of data already available in the land records. The information was collected on :

a) number and area of operational holdings by size classes,
b) classification of individual , joint and institutional holdings,
c) classification of holdings according to social groups.

Sample Agricultural Census was conducted on 20% of the total villages in the State. In this census information was collected on-

a) tenancy status,
b) land use,
c) sourcewise irrigated area,
d) number of wells in use and that fitted with pump sets
e) number of wells not in use.
f) area under different crops (irrigated and unirrigated),
g) number of farmers growing each of the crop,

Initial field work of the survey commenced late by one year due to the decision of computerization of land record and then by about two years due to non-cooperation of talathis from Vidarbh region of the State. Because of these two reasons the field work was completed in 2001.

The Talathis from Vidarbh Region could not cooperate census work. So the data for Vidarbh Region (which comprises nine districts i.e. Buldhana, Akola, Amraoti, Yaotmal, Wardha, Nagpur, Bhandara, Chandrapur and Gadchiroli) has been prepared according to the suggestions from Government of India. The ratio is derived from 20 districts where the census 1995-96 was completed. This ratio is applied to 1990-91 census results of Vidarbha districts and results were prepared for 1995-96 Census of these districts.

OBJECTIVES :

i) to provide comprehensive information on agriculture at a global level on a uniform and comparable basis,
ii) to collect data on agricultural structures which do not change rapidly from year to year,
iii) to provide a frame for other agricultural surveys on holdings.

Use of Census Data :

The main advantage of data generated by Agricultural Census is that, it is collected separately for different size classes of holdings and according to social groups. The disaggregation of data amongst size classes which has been re-grouped into three major size groups (i.e. marginal, small and others) has been found to be very useful for policy formulation particularly for marginal and small farmers who constitute the overwhelming majority of the farming community.

The data of the Agricultural Census is helpful for -

i) formulating plans of further growth in agriculture, special programmes for marginal and small farmers in general and for Scheduled Casts and Scheduled Tribes farmers, in particular,

ii) preparation of detailed district plans on a long term basis.

Methodology :-

The complete Agril.Census and Sample Agril.Census data were collected by retabulation of the information already maintained in the revenue records for the year 1995-96. The field work was carried out by talathis and supervision was carried out by the higher officers of Revenue and Agriculture Departments.

The information relating to number and area of operational holdings separately for male and female was first time compiled in addition to Schedule Caste and Scheduled Tribe at village level by talathis. Further computerisation work was undertaken to generate prescribed tables by Regional Computer Centre, Kolkata and National Informatics Centre, Pune.

Findings of Agricultural Census 1995-96

a) **Operational Holdings** :-

i) During census of 1995-96 there were 106.53 lakh operational holdings with their operated area of 198.80 lakh hectares. The number of operational holdings in 1995-96 has increased by 12.49 % as compared with that in Agricultural Census 1990-91. The operated area has decreased by 5.00 % as compared with that of Agricultural Census 1990-91. The average size of holding was 1.87 ha. as compared to 2.21 ha. in Agricultural Census 1990-91.

ii) Out of the total 106.53 lakh holdings 102.72 lakh (96.43 %) holdings were individual, 3.66 lakh (3.43%) holdings were joint and remaining 0.15 lakh (0.14 %) holdings were institutional. The area covered by these holdings was 189.09 lakh ha. (95.12%),8.79 lakh ha (4.42 %) and 0.92 lakh ha (0.46 %) respectively.

iii) The number of holdings showed an increase in first three size classes viz; marginal, small and semi-medium and decrease in medium and large size classes. An operated area showed an increase in marginal and small size classes and decrease in semi-medium, medium and large size classes. It was also found that as in 1990-91 census, in present census majority of the holdings are concentrated in first three size classes. These accounted for above 90% of the total holdings in 1995-96. The distribution of operated area in first three size classes was 63 % while in medium and large size classes it was 37 %.

iv) The holdings belonging to Scheduled Castes and Scheduled Tribes were 8.68 lakh and 6.78 lakh respectively, constituting above 8.15 % and 6.37 % of the total holdings respectively. The area covered by these holdings was 12.79 lakh ha. and 14.58 lakh ha. i.e.6.42 % and 7.33 % of the total area of all holdings.

v) Out of 8.68 lakh holdings belonging to Scheduled castes, 8.33 lakh (95.96 %) holdings were individual and the remaining 0.35 lakh (4.04 %) were joint holdings covering an area of 12.09 lakh ha (94.70%) and 0.6 lakh ha (5.30%) respectively.

vi) Out of 6.78 lakh holdings belonging to Schedules Tribes, 6.44 (94.91%) holdings were individual and 0.35 lakh (5.09%) holdings were joint. The area coverd by these holdings was 13.68 lakh ha (93.83%) and 0.90 lakh ha (6.17%) respectively.

vii) The districtwise data indicates that Ahmednagar district had the largest number of holdings i.e.787861 while Gadchiroli had the lowest i.e.121698. The operated area was found to be highest in the Ahmednagar district and lowest in the Gadchiroli district being 13.10 lakh ha. and 2.22 lakh ha. respectively.The average size of holding varied from 2.92 ha in Yeotmal district to 0.91 ha. in Kolhapur district.

viii) The largest number of holdings belonging to Scheduled Caste were located in Ahmednagar district and lowest in Thane district being 0.66 lakh and 0.08 lakh respectively. The operated area covered by Scheduled Caste holdings

was highest in Ahmednagar district being 0.92 lakh ha. and lowest in Sindhudurg district being 0.09 lakh ha. The average size of holding of this category varied from 2.49 ha. in Yeotmal district to 0.53 ha. in Kolhapur district. Similar findings were also observed in the last Agril.Census 1990-91.

ix) The largest concentration of holdings belonging to Scheduled Tribes was in Dhule district being 1.08 lakh and lowest in Sindhudurg district being 210 only. The operated area belonging to Scheduled Tribes holdings was highest in Dhule district being 2.33 lakh ha. and lowest being 119 ha. only in Sindhudurg district. The average size of holding varies from 2.98 ha. in Yeotmal district to 0.57 ha. in Sindhudurg district.

b) <u>Land use</u> :-

The net area sown was 86.75 % to the total operated area . The proportion of area under current fallow was 5.17 % to the operated area.Thus the net cultivated area was 91.92 % to the operated area. While percentage of uncultivated land and land not available for cultivation was 4.63 % and 3.45% respectively.

c) <u>Irrigation</u> :-

Irrigation Status :-

Out of 22.92 lakh irrigated holdings, only 10.33 lakh holdings (45.06 %) were wholly irrigated and 12.59 lakh holdings (54.94 %) were partly irrigated. Wholly irigated and partly irrigated area was 11.20 lakh ha. (50.46 %) and 11.00 lakh ha. (49.54 %) of the total net irrigated area respectively.

Sources of Irrigation :-

Well was the most important source of irrigation covering 56.82 % of number of holdings and 60.57 % of net irrigated area. This was followed by canals. The corresponding proportion was 20.13 % and 19.00 % respectively.

13.95 lakh wells used for irrigation in the State during 1995-96, 13.58 lakh wells (97.37 %) were fitted with pumps. During 1995-96 average area irrigated per well in the State was 0.99 ha.

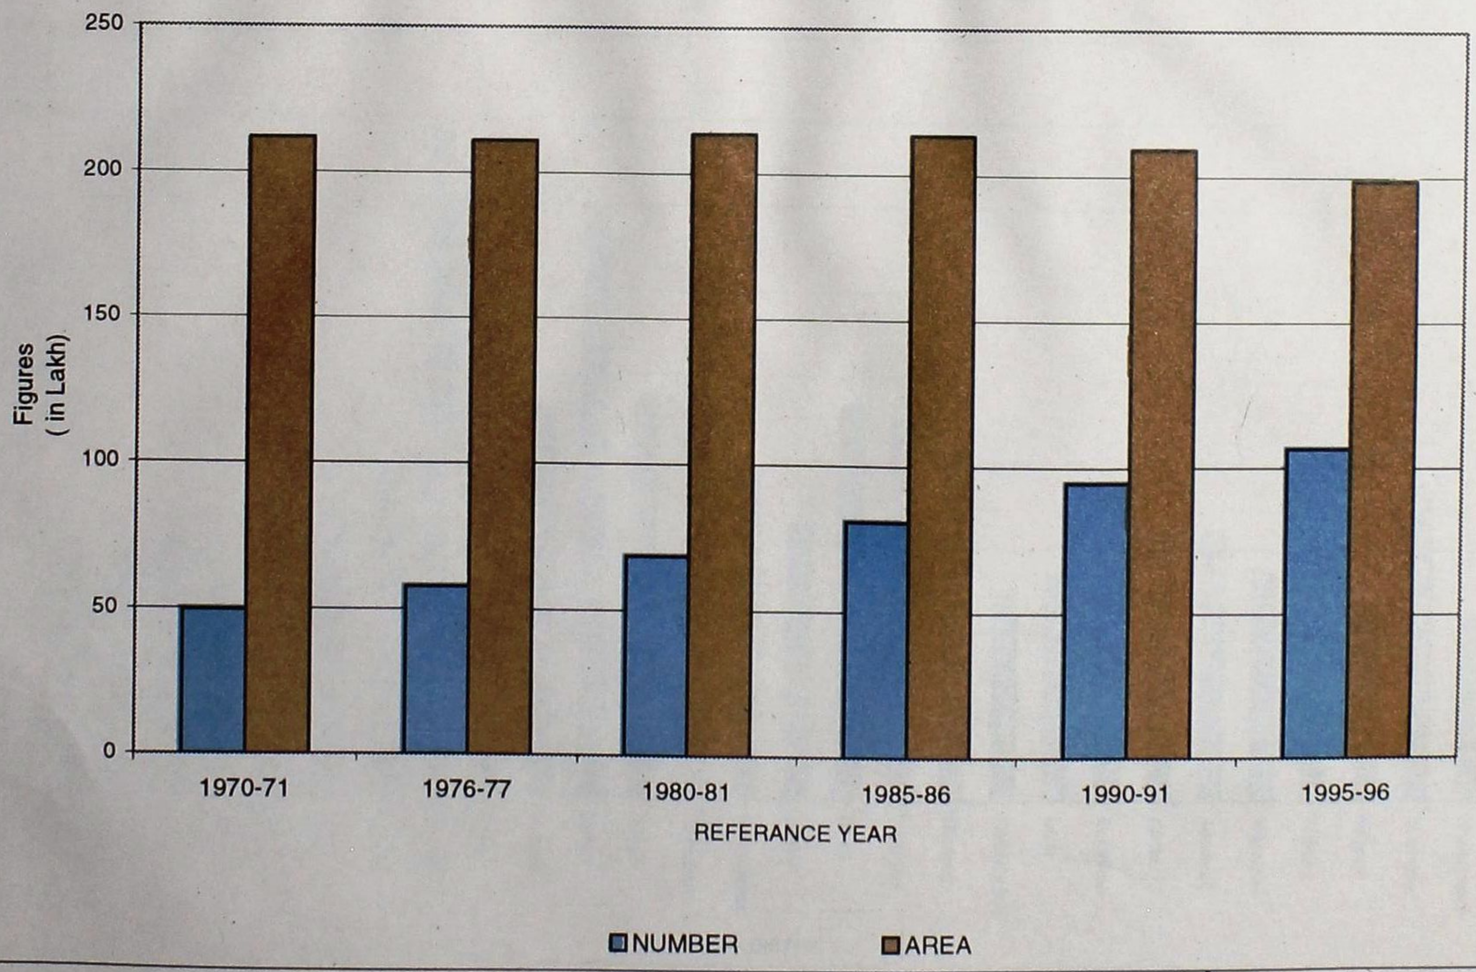

d) <u>Cropping pattern</u> :-

Area under principal crops :-

The net area sown in 1995-96 was 172.45 lakh ha.as against 178.91 lakh ha.in 1990-91 . While gross cropped was 191.13 lakh ha. and 196.36 lakh ha. in 1995-96 and 1990-91 respectively.Food and non-food crops accounted for 73.26 % and 26.74 % to the gross cropped area respectively. Foodgrains accounted for 67.07 % which includes cereals 55.37 % and pulses 11.70 % to the gross cropped area.
