GOVERNMENT OF MAHARASHTRA

REPORT ON AGRICULTURAL CENSUS

2000-01

MAHARASHTRA STATE

AGRICULTURAL CENSUS CELL
COMMISSIONERATE OF AGRICULTURE
PUNE - 411005.

FOREWORD

I am happy to place on record the 7th Agricultural Census Report of the Maharashtra State for the year 2000-01. Operational holding is the basic unit of decision making in agriculture and therefore, for formulation of any meaningful and effective strategy for agriculture development, detailed data on structure of agricultural holdings are absolutely necessary. The Census data fills in this longfelt gap in agricultural statistics. The holdingwise information is of considerable utility in planning of agricultural production programmes.

The agricultural Census 2000-01 is the seventh one in the State. As in the previous Censuses, in this Census also it was found that the number of small and marginal holdings increased and that now they accounted for about two-third i.e. 73.42 per cent of the total operational holdings in the State, but with a share hardly 39 percent in the total operated area. Another important feature in this Census was that the average size of holdings has come down from 1.87 ha. in 1995-96 to 1.66 ha. in 2000-01.

The staff of Revenue Department was entrusted with the field work and supervision. Without their active cooperation, it would have been difficult to complete the Census. I place on record my deep appreciation and gratitude to them.

The work of computerization was carried out by National Informatics Centre, New Delhi. I recall with gratitude the valuable services rendered by the staff of NIC, New Delhi associated with Agricultural Census computerization and tabulation work.

The Commissioner, Agriculture, Maharashtra State, Pune and Ex. Commissioner, Agriculture, Maharashtra State, Pune Dr. S. K. Goyal, Dr. K. B. Lavekar, Pune has taken deep interest in the activity and provided useful guidance from time to time. Mr. Shankarrao Ghodekar, Deputy Commissioner (Agricultural Census) and his staff in the Agricultural Census Cell exerted a great deal in organizing and completing the voluminous work of Agricultural Census 2000-01.

I hope that this Report will be useful to planners, decision-makers, extension workers and researchers.

(Nanasaheb Patil)
Agricultural Census Commissioner
and Principal Secretary (Agriculture)
Govt. of Maharashtra, Mantralaya,
Mumbai - 400 032.

PREFACE

The seventh Agricultural Census pertaining to the year 2000-01 was conducted with the purpose of collecting data on number and area of operational holdings throughout the State.

Besides data relating to operational holdings in different size classes, type of holdings, tenancy status, land use pattern, irrigation status, area irrigated by different sources and area under different crops was collected.

The results of the Agricultural Census for the State and districts are presented in this report. The results obtained in respect of Scheduled Castes and Scheduled Tribes are also presented.

For the first time, attempt has been made to incorporate tahsilwise information in this report.

The results of the Agricultural Census data are extensively utilized not only by different departments, but also by the Research Workers, Economists and those associated with the agricultural planning and development. The results of Census will be considerably helpful for policy formulation and to assess the impact of different Agricultural projects.

The talathis to whom the responsibility of field work was entrusted have done the job during census period. Principal Secretary, Revenue and Forest Department, Agril. Census Commissioner and Principal Secretary Agriculture, Animal Husbandry, Dairy Development and Fisheries Department, Divisional Commissioners, Collectors and Deputy Commissioners (Revenue) gave guidance to the field functioneries Resident Deputy Collectors, Sub-Divisional Officers, Tahasildars, Revenue Inspectors and other Revenue staff gave necessary support in getting the work done.

The initial work of planning and organisation of Agricultural Census 2000-01 was completed during the tenure of Dr. H. D. Nandwate, Ex. Deputy Commissioner, While successfully monitoring of the field work and computerization was carried by Shri Shankarrao Ghodekar, Deputy Commissioner, Agricultural Census and Agril. Census Officer/Staff completed the work of compilation of Tables and drafting of this report.

I would, therefore, like to place on record the excellent services rendered by the present and previous officers and the staff of Agricultural Census Cell.

The NIC, New Delhi, and C-DAC, New Delhi took keen interest and efforts in the development of computer programme and in giving guidance in electronic processing of the data.

I am grateful to the officers of Government of India for their guidance and help in the conduct of Agricultural Census programme in the State.

(Prabhakar K. Deshmukh)
Commissioner, Agriculture,
Maharashtra State,
Pune-411001.

Highlights in Agricultural Census – 2000-01

Sr. No.	Item	Name of highest district in state / district figure / % to State	Name of Lowest district in state/district figure / % to State	State figures
1	Total Operational holdings (Number)	Ahmednagar 916724 (7.55)	Gadchiroli 115396 (0.95)	12137627
2	Total Operated Area (Ha.)	Ahmednagar 1337248 (6.65)	Gondiya 202872 (1.01)	20102804
3	Schedule Caste Operational holdings (Number)	Ahmednagar 69270 (7.34)	Nandurbar 2582 (0.27)	944099
4	Schedule Caste Operated Area (Ha.)	Ahmednagar 85752 (6.91)	Nandurbar 4303 (0.35)	1240563
5	Schedule Tribes Operational holdings (Number)	Nasik 115827 (14.89)	Sindhudurg 884 (0.11)	777790
6	Schedule Tribe Operated Area (Ha.)	Nasik 220417 (14.37)	Sangli 843 (0.05)	1534040
7	Other Operational holdings (Number)	Ahmednagar 794295(7.65)	Nandurbar 57027 (0.54)	10382484
8	Other Operated Area (Ha.)	Ahmednagar 1139232 (6.65)	Gadchiroli 94160 (0.55)	17141035
9	Institutional Operational holdings (Number)	Kolhapur 6073 (18.26)	Gadchiroli 56 (0.17)	33254
10	Institutional Operated Area (Ha.)	Ahmednagar 21936 (11.72)	Gondiya 244 (0.13)	187166
11	Individual Operational holdings (Number)	Ahmednagar 911720 (7.61)	Gadchiroli 115318 (0.96)	11978991
12	Individual Operated Area (Ha.)	Ahmednagar 1308078 (6.65)	Gondiya 198172 (1.01)	19661312

Average size of Operational Holdings 2000-01

Chapter I

Report on Agricultural Census 2000-2001 Maharashtra State.

1.1 Introduction :-

Agricultural Census is a quinquennial census conducted in the state once in five years since its inception in 1970-71. So far, the seventh Agricultural Census has been conducted, latest as 2000-01 census. Agricultural Census is conducted in all States and Union territories in the country, at the instances of Ministry of Agriculture and Co-Operation, Govt. of India, which provides cent per cent financial assistance. This census was introduced in the country with the main object of knowing the number and size of operational holdings of the cultivators, land utilization, area under different crops, area irrigated by different sources etc.

Thus, seventh Agricultural Census with the reference year 2000-01 and as reference period (1st July 2000 to 30th June 2001) conducted. Before the commencement of the Agricultural Census, the year 2000-01 was declared as " Land Records Year'' with a view to update all the village level records by the Revenue authorities, which is required for correct and authentic information on land holding to be reflected during the conduct of the census.

1.2 Objectives :-

The importance of Agricultural Census is to know the structure and characteristics of agriculture holdings. Besides the data of agricultural holdings ,on land use, source of irrigation, cropping pattern and dispersal of operated area were also collected on sample basis.

As a follow-up of Agricultural Census, Input Survey is conducted to the next year.

Thus, three stages involved in conduct of the Agricultural Census are, the number and area of entire operational holdings collected through complete census method constitute the first stage, the details of land particulars and other agricultural characteristics collected on 20 % sampling basis constitute the second stage and the conduct of input survey on 7 % sampling basis constitute the third stage.

1.3 Organization :-

Agricultural Census is a central sector plan scheme being implemented by the Ministry of Agriculture, Deptt. of Agriculture & Co-Operation , Krishi Bhavan, New Delhi. The Joint Secretary to the Govt. of India, Ministry of Agriculture, is designated as Agricultural Census Commissioner.

In Maharashtra, the Principal Secretary to the Govt. of Maharashtra , Agricultural Department is nominated as Agricultural Census Commissioner for the State. The entire Agricultural Census operations in the State were carried out under his guidance by census branch, headed by the Deputy Commissioner, Agricultural Census and supporting technical / ministerial Staff.

In each district, Deputy Collector in the Collectorate , mostly Resident Deputy Collector is designated as Assistant Agricultural Census Commissioner and is entrusted with responsibility of getting the census work completed in time and co-ordinating the census work in the district on behalf of the Collector. The Tahsildar is designated as Tahsil Agricultural Census Officer and Sub-Divisional Officer is also associated with the supervision and co-ordination of the census work in their sub divisions, particularly for speeding up and completion of field work.

1.4 Finance :-

The scheme is 100 % financed by the Govt. of India, thus the entire expenditure on the salaries and other allowances of the headquarter staff to the State are borne by the Centre. This further includes the expenditure on printings of instructions and schedules, tabulation of census data , honorarium, and printing of report.

1.5 Methodology :-

The information with regard to the number and area of operational holdings is collected on complete enumeration, for all the villages having operated area in the State, through the method of retabulation of information available in the village land records. The method of collecting all the relevant information needed is obtained villagewise through the schedules listed below.

L-1 : In this schedule, the list of operational holders residing & operating within the village and outside the same taluka is collected .

L-2 : In this schedule, the list of non resident operational holders operating within the village is collected.

L-3: In this schedule , the village summary for the purpose of tallying the figures of operational holdings at village level and also other basic infrastructure facilities in the village are compiled.

T-1: In this main schedule, the number and area of operational holdings according to sex, size classes, social groups and type of holdings are computed.

H : In this schedule, the details of operational holdings, like land utilization , tenancy status , sources of irrigation, type of crops grown etc., are collected in the 20 % sampled villages selected under " Timely Reporting of Agricultural Intelligence " Scheme.

The major size classes adopted for compiling information are as follows:

Marginal holdings	-	Operational holdings with an area less than a 1 hectare.
Small Holdings	-	Operational holdings with an area 1 hectare and above , but below 2 hectares.
Semi-medium holdings	-	Operational holdings with an area 2 hectares and above , but less than 4 hectares.
Medium holdings	-	Operational holdings with an area 4 hectares and above , but less than 10 hectares.
Large holdings	-	Operational holdings with an area 10 hectares and above.

1.6 Fieldwork and Supervision :-

The actual fieldwork of the Agricultural Census was carried out by the Village Talathi / Patwari of the Revenue department. Effective supervision of the field work was done by the concerned district / Tahsil level Revenue Officers like Sub Divisional Officer, Tahsildar, Residential Naib Tahsildar and Circle Inspector etc. under the overall charge of the District Collector.

Chapter II

Technical Notes : Concept and Definitions

1. Operational Holding :-

All and which is used wholly or partly for agricultural production and is operated as one technical unit by one person alone or with others without regard to the title, legal form, size or location.

2. Complete / Part -Holding :-

A holding is said to be complete holding if his entire operated area is located in one village. If the operated area is spread over more than one villages, it would be considered as part-holdings.

Taluka would be taken as the outer limit for consolidation of part holdings.

3. Technical Unit :-

An unit of land which is under the same management and has the same means of production such as labour force, machinery and animals.

4. Operated area :-

Operated area includes both cultivated and uncultivated area, provided part of it is put to agricultural production during the reference period, if, for instance, an operational holding consists of four survey numbers out of which one survey number is put to non-agricultural uses, the total area of the operational holding will be equal to the total geographical area of all the four survey numbers.

a) Land Owned and Self-operated :-

Land for which the cultivator has the right to permanent heritable possession would be considered as owned. This would include:

i) Land held from Government or others under grant or lease or assignment with right of permanent heritable possession with or without right of transfer.

ii) Land operated under perpetual lease.

b) Self-Operated land would include :-

i) Self cultivation.

ii) Land cultivated through members of the family.

iii) Land cultivated with the help of hired labour. Land owned and self operated should not; include land leased out to others.

Leased in :- Area leased in is defined as land taken on lease from others without any permanent right of possession for the lease. Land may by leased in for

i) Fixed money

ii) Fixed produce

iii) Share of produce

iv) Usufructuary mortgage :- Ownership of the property remains with the mortgager but the possession is with the mortgagee (i.e.the person to whom the mortgage is made or given). Income from the property accrues to the mortgagee and the mortgage is terminated as soon as the full amount is realized.

v) Other terms to be specified.

c) Area Otherwise operated : This would include encroachment, lands forcibly occupied, unauthorized or land in dispute etc., which cannot be treated as owned or leased in, as per the definitions given above.

5. Operational holder :

A person who has the responsibility for the operation of the agricultural holding and who exercises the technical initiative and is responsible for its operation. He may have full economic responsibility or may share it with others. The Operational holder may be Individual / Joint / Institutional.

i) **Individual :** If the holding is being operated either by one person or by a group of persons who are the members of the same household, such holding will be considered as an individual holding.

ii) **Joint :** If two or more persons belonging to different households, share jointly as partners in the economic and technical responsibility for the operation of an agricultural holding, such holding will be considered as joint holding.

iii) **Institutional :** Holdings such as government farms, farms of sugarcane factories, cooperative farms, lands managed by trusts would be treated as institutional holdings.

iv) **Resident and non- Resident operational holdings :**

a) Resident operational holder: All the cultivators residing in a particular village and cultivating some land within the same Tahsil are considered resident cultivators of that village irrespective of whether they are cultivating in that village or not.

b) Non Resident Operational holder : An Operational holder operating area in particular village but who reside outside that particular village but within a same Tahsil he is a non resident operational holder for that particular area.

6. **Wholly Irrigated, Partly Irrigated and Wholly Unirrigated Holdings :**

If the entire net sown area of an operational holding is equal to net area irrigated, such holding is considered as wholly irrigated holding. In case part of the net sown area is irrigated, it will be partly irrigated and if the entire sown area has not received any irrigation during the reference year, such holding would be wholly unirrigated.

7. **Land Utilization:**

1. **Net sown area :** Total area sown with crops and orchards may be sown more than once in the same year but counted only once.
2. **Current fallow:** Cultivated area, which is kept fallow during the current year but was cropped in the previous year. For example, any seeding area is not cropped in the same year, it may be treated as current fallow.
3. **Fallow land other than current fallow:** All lands, which are taken up for cultivation but are temporarily out of cultivation for a period not less than one year and not more than five years.
4. **Other uncultivated land excluding fallow:** This will include :-
   i) **Permanent pastures and other grazing lands:** All grazing lands, whether they are permanent pastures and meadows or not. Village common grazing lands would, however, be excluded.
   ii) **Land under Miscellaneous Tree Crops:** Cultivable land, which is not included in the net area sown but is put to some agricultural use. Land under casuarinas trees, thatching,

Grasses, bamboo bushes and other groves for fuel which are not included under ' Orchards ' would be covered under this category.

5. **Culturable Waste :** All lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or other. Such lands may be either wholly or partly covered with shrubs and jungles, which are not put to any use. Land once cultivated but not cultivated for five years in succession would also be included in this category.
6. **Not available for cultivation:** This would include forest area under non-agricultural use, barren and uncultivable land.

Chapter III

Findings of Agricultural Census 2000-01

Distribution of operational holdings: -

3.1 Distribution of the number of operational holdings and area operated based on sex and major size classes in 1995-96 and 2000-01 and percentage variations in 2000-01 over 1995-96 is given in Table-2 of Appendix-I.

3.1.1 The total number of operational holdings in the state has increased from 106.53 lakhs in 1995-96 to 121.38 lakhs in 2000-01 showing an increase of 13.94 percent. The number of operational holdings in the size classes marginal, small, semi-medium has increased, whereas the same has decreased in medium and large size classes in 2000-01 over 1995-96. The percentage decrease in medium and large size class is of the order of 8.26 percent and 25.11 percent respectively. The possible reasons attributed to increase in holdings could be, fragmentation of holdings due to inheritance.

3.1.2 The total operated area of holding has increased from 198.80 lakh hectares in 1995-96 to 201.03 lakh hectares in 2000-01, thus registering a rise of 1.12 percent. The percentage increase in marginal, small and semi-medium size classes observed is 26.93 percent, 11.31 percent and 4.03 percent respectively. The percentage decrease observed in medium and large size classes is 10.23 percent and 28.79 percent respectively.

3.1.3 Of the total holding in the state in 2000-01, 84 percent are male holdings and 16 percent are female holdings, representing an area of 86 percent and 14 percent respectively out of the total operated area in the State.

3.1.4. The number of male operational holdings in the state as per the 2000-01 Agricultural Census is 102.24 lakhs. Compared to the previous Agricultural Census 1995-96, this number registered an increase of 10.40 percent. However, for the same period a rise in female operational holding is of 36.57 percent. Although the number of operational holdings in male category has gone up, the area operated by them has declined by 2.25 percent. Reverse is true of Female holdings; where the area operated has increased by 24 percent.

3.2 Distribution of the number and area of operational holdings by sex and social groups in 1995-96 and 2000-01 and percent variations in 2000-01 over 1995-96 is given in Table No.-3 of Appendix-I.

3.2.1 In 2000-01 Census, the share of scheduled caste holdings is 7.80 percent scheduled tribe holdings is 6.43 percent and other communities is 85.77 percent. Increases in number of holdings has been observed in all social groups in 2000-01over 1995-96. The rise in number of holdings of scheduled caste and scheduled tribe groups in 2000-01 is of the ordered of 8.72 percent and 14.65 percent respectively over 1995-96.

3.2.2 The share of area operated by scheduled caste and scheduled tribe is 6.23 percent and 7.70 percent respectively in the state. The area operated by scheduled tribe in 2000-01 has increased in all groups except scheduled caste, where it has decline by 2.85 percent between 1995-96 and 2000-01.

3.2.3 The proportion of male and female holdings in all social groups except Scheduled tribes is almost same i.e.84 percent male and 16 percent female. In the case of Scheduled tribes the proportion observed is 85 percent male and 15 percent female.

3.3 The distribution of number of operational holdings and area according to social groups for major size classes in 1995-96 and 2000-01 and percentage variations in 2000-01 over 1995-96 is given in Table No.4 and Table No.5 of Appendix-I.

3.3.1 The size class wise number and area of operational holdings has increased in marginal, small and semi-medium size classes in 2000-01 over 1995-96.

3.3.2 The increase in number of operational holdings in marginal, small and semi medium classes observed is 24.37 percent, 13.54 percent and 5.68 percent respectively. The decline observed in number of holdings in medium size class is 8.26 and large size class is 25.11 between 1995-96 and 2000-01. The area operated also shows the same trend .The decline observed in area operated in medium and large size class is to the extent of 10.23 percent and 28.79 percent respectively for the same period.

3.3.3 The analysis of size class for schedule caste shows increase in number and area of operational holding for marginal and small size classes between 1995-96 to 2000-01. However, the decline is observed in semi medium, medium and large size classes.

3.3.4 The share of number of holding for marginal class, is 43.71 percent, small class, 29.71 percent, semi medium class, 18.73 percent, medium class, 7.13 percent and large class, 0.72 percent. The corresponding share of area for marginal class is 13.18 percent, small class 25.50 percent, semi medium class, 30.39 percent, medium class, 24.27 percent and large class, 6.66 percent in the year 2000-01.

3.4 Average size of holding :

3.4.1 Table No. 6 & 9 of Appendix-I gives the distribution of the average size of a operational holding according to the social groups for major size classes during the year 1995-96 and 2000-01.

The average size of a holding for all social groups decreased from 1.87 ha. in 1995-96 to 1.66 hectares in 2000-01, thus, registering a decrease of 11.23 percent. The size class wise average size of holding in most of the classes declined, whereas it increased slightly in Scheduled caste and Scheduled tribe for marginal size class only.

3.4.2. The average size of holdings of scheduled caste declined from 1.47 ha. in 1995-96 to 1.31 ha. in 2000-01. In the scheduled tribe also the average holdings decreased from 2.15 hectares to 1.97 hectares.

3.4.3. It would be seen from Table No. 9 of Appendix -I, related to distribution of average size of operational holdings according to types of holdings, that for major size classes the average size of holding decreased for all types of holdings in 2000-01 over 1995-96. The average size of holding decreased in individual holdings from 1.84 ha. to 1.64 ha.,in the case of joint holdings, from 2.40 ha. to 2.03 ha. and in institutional holdings it decreased from 6.21 ha. to 5.63 ha. The percentage decrease for individual, joint and institutional holdings observed is 10.87 percent, 15.42 percent and 9.34 percent respectively .

3.5 Operational holdings by types :

3.5.1 Tables No. 7 & 8 of Appendix-I, shows the number and area of operational holdings according to types of holding for different size classes. It is found that the total number of operational holdings in the State is 121.38 lakhs.

It comprises individual holdings : 119.79 lakhs (98.69 %), joint holdings 1.25 lakh (1.03%) and institutional holdings : 33,254 (0.28 %).

3.5.2 The growth is observed in individual and institutional number of holdings by 16.62 percent and 125.18 percent respectively, The number in joint holdings decreased by 65.74 percent between 1995-96 to 2000-01. Similar trend was also found in area operated. The increase in area operated in the case of individual holding is, 3.98 percent, institutional holdings 103.99 percent ; The decrease in area registered in five year period in joint holdings is 71.07 percent.

3.5.3 In the case of individual type of holdings, the size class wise percentage share of area is; marginal : 13.32 percent ; small: 25.82 percent semi medium: 30.66 percent, medium: 24.24 percent and large:5.95 percent .In the case of joint type of holdings, the size class wise share of area is;marginal:9.53 percent, small:16.53 percent , semi medium: 26.20 percent , medium :32.92 percent and large:14.82 percent .

3.6 Distribution of Number of operational holding according to types of holding for social groups :

3.6.1 Distribution of operational holdings and operated area among social groups is given in the table No.10 & 11 of Appendix-I. It is observed that in all types of holding the share of scheduled caste is 7.78 percent, scheduled tribe 6.41 percent and others, 85.54 percent .

3.6.2 Further, in respect of area operated in the state the share of scheduled caste is 6.17 percent scheduled tribe , 7.63 percent and others, 85.27 percent.

In individual type of holdings the number and area increase observed between 1995-96 to 2000-01 is to the extent 16.62 percent and 3.98 percent respectively. In joint type, of holdings the decrease has been observed both in number and the area to the extent of 65.74 percent and 71.07 percent respectively. The total picture however shows, increase in area in scheduled tribe and other social groupings by 5.22 percent and 0.52 percent over 1995-96. The area represented by scheduled cast however, has gone down by 2.85 percent.

Analysis of sample Agricultural Census:

3.7 Tenancy Particulars of Operational holdings:

An operational holding may be wholly owned and self operated or partly owned and partly leased in or wholly leased in or area otherwise operated. The area otherwise operated is an area operated by the operational holder by encroachment or through forcible occupation of government or private land.

3.7.1 Share of the operated holding by tenancy status :

Out of 121.38 lakh total holding in the state, during the 2000-01, wholly owned and self operated holding were the highest i.e. 121.32 lakh (99.95 %), followed by wholly leased & wholly otherwise operated holding (0.04 %) and partly owned & partly leased in and otherwise operated holdings is 0.01 % (Table No.3) . Similar trend was also observed in area for tenancy status.

Table No. 3

Distribution of operational holdings and operated area by Tenancy Status

Sr. No.	Tenancy Holding	Holding number	%	Area hectare	%
1	Total holdings	12137627	100	20102804	100
2	Wholly owned & self operated holdings	12131775	99.95	20088392	99.93
3	Wholly leased holdings	2901	0.02	4298	0.02
4	Wholly otherwise operated holdings	1768	0.02	4829	0.02
5	Partly owned partly leased in & partly otherwise operated holdings	1183	0.01	5290	0.03

3.7.2 Land Utilization :

In Agricultural Census, the operated area has been classified into six broad categories viz.-, **i)** Net sown area **ii)** Current fallow **iii)** Fallow land other than current fallow **iv)** Other uncultivated land excluding fallow land, cultivable waste, and **vi)** Not available for cultivation.

The district wise distribution of estimated area by major size classes and land use are given in Table No. 18 of Appendix-I.

Since, in the Agri. Census holding wise enumeration is done and is limited to holding which have at least some area under agriculture crop and / or current fallows, whereas bulk of the area under forest, barren and uncultivable lands, pastures etc. will not be covered under Agricultural Census as they do not form any holding. The distribution of total operated area under different land uses in 2000-01 is shown as on next page.

Table No.3.1

Distribution of total operated area under main land uses in 2000-01.

Sr.No.	Land use	Area	%
i	Net sown area	17732809	88
ii	Area under current fallow	1133115	6
A	Net cultivated area (i+ii)	18865924	94
I	Other uncultivated land excluding fallow land	224565	
ii	Fallow land other than current fallow	262202	
iii	Culturable waste land	265907	
B	Total Uncultivated Land (i+ii+iii)	752670	4
C	Land not available for cultivation	484210	2
	Total Operated area(A+B+C)	20102804	100

3.7.3 An important aspect of land utilization is the area used for cultivation. This is indicated by the net cultivated area which is sum of the net sown plus the area under current fallows . The net cultivated area is 94 percent of the total operated area in 2000-01. Out of the remaining 6 percent, 4 percent is uncultivated land and 2 percent not available for cultivation.

3.7.4 Districtwise estimated Number and Area of operational holdings by major size classes and irrigation status:

The information on Districtwise distribution of irrigation is summarized in respect of major size classes along with number and area of operational holdings in Table No.19 of Appendix-I.

Based on net sown area during the 2000-2001, the wholly irrigated holdings number 1379141 and the area, 1433179 hectares. The corresponding percentage is 11.67 and 8.08, respectively. However, in respect of partly irrigated, the share of number of holdings and area, to the net sown area is

9.46 percent and 13.63 percent respectively . Of the total partly irrigated area , the irrigated area is 946591 ha.or 5.34 percent and Partly unirrigated area is 1469571 ha or 8.29 percent to the net sown area.

The percentage number of wholly unirrigated holdings to the total number of holdings in the state work out to 78.87 percent. The area represented by these wholly unirrigated holdings is 78.29 percent.

Source wise classification of irrigated holdings :

3.7.5 The total number of holding in the state is 121.38 lakh out of which wholly irrigated holdings are 13.79 lakh and partly irrigated holdings, are 11.18 lakh.

The source wise number and area of operational holdings for major size classes in different districts is shown in table No.20. of Appendix-I.

Table No. 3.2

Number of holdings and area irrigated by different sources in 2000-01.

Sr.No.	Source of Irrigation	Number of holding	Area Irrigated	% area by source
1	Canal	431751	405157	17
2	Tanks	148009	153285	6
3	Wells	1387290	1400331	59
4	Tube Wells	84544	82994	4
5	Other Source	496353	338004	14
	Total	**2547947**	**2379771**	**100**

The distribution of wells and tube wells in different districts with major size classes given in Table 21 of Appendix-I. The total number of wells and tube wells is 1347413 and 86814 respectively in 2000-01. The wells with electric pump sets are 1273362. The wells having diesel pumpset are 15732 .Out of the total wells , 31944 wells are not in use . Out of the total irrigated area, 59 percent is under well irrigation , 4 percent under tubewell; 17 percent under canals, 6 percent under tanks and 14 percent under other sources of irrigation.

3.8 Table No.23,of appendix-I, gives district wise ,crop wise estimated number of holdings, irrigated and unirrigated area along with major size classes. On the basis of this table, the findings are summarized as below. The further details of area under different crop groups grown in Maharashtra are presented in the Table 3.3

Table -3.3

Area under different Crop groups in 2000-01 for All Social Groups (Area in 000 ha)

Sr. No.	Crop	1995-96 Area	%	2000-01 Area	%	% Variation
1	Cereals	10582	75.58	9311	73.55	(-)12.01
2	Pulses	2237	15.98	2033	16.07	(-)9.07
	Foodgrains (1+2)	12819	91.56	11345	89.62	(-)11.50

	Total non food crop (8+9+10+11+12+13+14+15)	**5112**	**100**	**5713**	**100**	11.76
16	Grossed cropped area	19113		18372		(-)3.88
17	Net sown area	17245		17733		2.83
18	Intensity of Cropping	110.83		103.60		(-)6.52

3.8.1 In 2000-01, the gross cropped area was 18371908 ha., out of which area under food crops was 68.90 percent (12658860 ha.) and non food crops, was 31.10 percent (5713048 ha).

In all food crops area,the cereal crops : 73.55 percent, pulses 16.07 percent , sugarcrops 4.95 percent , spices & condiments 0.38 percent, fruitcrops, 2.93 percent vegetable crops, 1.20 percent and other crops 0.92 percent. Further it is found that, the food crop area decreased by 9.59 percent in 2000-01 over 1995-96.

Cereals :-

3.8.2 The area decrease in cereals was to the extent of 12.01 percent in the 2000-01 over 1995-96. The decrease was mainly observed in Jowar, Bajra, Wheat and Other cereals. Remarkable increase in area was observed in maize .

Pulses :-

3.8.3 In respect of pulses, the area decreased was of the order of 9.07 percentover the previous census. The area under Udid, Mug & Other pulses decreased. However, the area under Gram and Tur increased over last census. This may be due to extensive efforts .

Sugar Crops :-

3.8.4 The area under sugar crops increased by 11.96 over last census. This might be due to the high returns from the crop in the report period.

Fruit Crops :-

3.8.5 The State Govt. has taken special efforts to promote fruit plantation in the State due to which the fruit crop area increased by 17.41 percent over the previous Census. The area increase are significant in Mango, Banana, Orange, Cashewnut, Ber, Custard Apple.

Oil Seeds :-

3.8.6 The area under oilseeds in the year 1995-96 was 1134429 ha., which increased to 2010532 ha. representing growth of 77.18 percent. In oilseed crops area under Soyabean jumped from 940022 ha. to 1431365 ha. However area in other oilseed crops like groundnut, Sesamum, Sunflower, Safflower, the decreased considerably.

Fibre Crops: -

3.8.7 It is observed that the area under crops like cotton, Jute, Mesta and Sunhemp increased in 2000-01 over 1995-96. This led to increase in overall growth in area of fibre crops by 1.15percent.

Cropping Intensity by Major size Classes: -

3.8.8. The cropping intensity is measured by gross cropped area divided by net area sown ; multiplied by 100 and expressed in percentage. Cropping intensity according to major size classes is shown in the Table No. 3.4.

Table No. 3.4

Cropping Intensity by Major size Classes in 2000-01

Major size classes	Gross cropped area (ha.)	Net area sown (ha.)	Cropping Intensity (%)
Marginal	2562059	2454566	104.38
Small	4910856	4736481	103.68
Semi-Medium	5682099	5487394	103.55
Medium	4246797	4106540	103.42
Large	970097	947828	102.35
All classes	18371908	17732809	103.60

The cropping intensity at state level is 104 percent. It was maximum for marginal holdings and minimum for large holdings. It indicates that cropping intensity decreased with increase in size class of holdings.

Chapter IV

Districtwise Analysis

Operational Holdings & Operated Area:

4.1 Districtwise number and area of operational holding for the year2000-01 is shown in Table 14 of appendix -I. From the data in the Table 14-A of Appendix I it is seen that during the current census, the Districtwise number of holding varied from 1.15 lakh in Gadchiroli district to 9.17 lakh in Ahmednagar district. The proportion of number of holding in these districts to the state total was 0.95 percent and 7.55 percent respectively. The distribution of area among different districts ranged from 2.03 lakhs ha. in Gondiya district to 13.37 lakhs ha.in Ahmednagar district. The proportion of this area to the state total was 1.01 percent and 6.65 percent respectively.

The Districtwise percentage distribution to the state total in this respect is shown in the Table 14-A of Appendix-I.Compared with the census in 1995-96, the number of operational holdings increased maximum in Solapur district.

The maximum percentage of holding was in Ahmednagar (7.55%) district, minimum in Gadchiroli (0.95%) district in 2000-01. In respect of operated area, it decreased in ten districts and increased in fifteen districts. The proportion of maximum increase in operated area was in Wardha district and maximum decrease in Sindhudurg district over last census.

Districtwise average size of holding :-

4.2 The districtwise average size of operational holding is depicted in the table 12 A of Appendix I.

The average size of operational holding was lowest in Kolhapur district (0.79 ha.) and the highest was inYavatmal district (2.70 ha.) The corresponding average size of holding during last census 1995-96 was 0.91 ha. in Kolhapur and 2.92 ha. Yavatmal district. In the remaining districts, it varied from 0.99 ha. to 2.43 ha. in 2000-01. The average size of operational holding had decreased in all the districts in 2000-01 as compared with that in 1995-96.

Districtwise distribution of type of holding :-

4.3 The districtwise distribution of number & area as well as their percentage by type of holding is shown in Table No.14-C of Appendix I. The data in this table reveals that the district having very high proportion of individual holding were Bhandara (99.93%), Gadchiroli (99.93%), Parbhani (99.92%) ,Jalna (99.90%), Aurangabad (99.89%). The district with lowest proportion of individual holdings is Ratnagiri (91.21%) . In respect of Joint holdings the highest proportion is in Ratnagiri district (8.61%) followed by Raigad (7.18 %). Institutional holding , which accounted very little proportion, in the form of number of holding varied negligibly in different districts. Institutional holdings accounted for very little proportion of operated area i.e. between 0.12 percent to 2.99 percent.

Districtwise distribution of Tenancy status :

4.4 The districtwise percentage distribution of number of operational holding by tenancy status is given in the Table No.17 of Appendix I. This Table indicates that in all districts wholly owned status is major while rest of the tenancy status share is negligible.
