Maharashtra State Report on Number and Area of Operational Holdings

Dy. COMMISSIONER (AGRI. CENSUS)
COMMISSIONERATE OF AGRICULTURE
DEPARTMENT OF AGRICULTURE
MAHARASHTRA STATE

2014.

LIST OF OFFICERS ASSOCIATED WITH THE PREPARATION OF MAHARASHTRA STATE REPORT

NAME	DESIGNATION
Shri. D. B. Sapre	Ex. Dy. Commissioner (Agril. Census)
Shri. D. D. Wakure	Dy. Commissioner (Agril. Census)
Shri. S. G. Ghawate	Statistician
Shri. M. N. Sali	Asstt. Statistician
Smt. Swati Sardesai	DDG, NIC Pune
Shri. Vishram Chowsalkar	Scientist D, NIC, Pune
Shri. D. N. Shete	Agricultural Supervisor
Shri. V. K. Bhosale	Agricultural Supervisor
Shri. S. M. Vishwasrao	Agricultural Supervisor
Smt. S. M. Khude	Agricultural Assistant
Smt. N. A. Kamble	Agricultural Assistant
Smt. R. P. Dhage	Stenographer
Smt. Sneha Bogam	Programmer, NIC, Pune

PREFACE

The 9th Agricultural Census 2010-11 was conducted in the State to collect the data on numbers and area of operational holdings.

For the first time, an attempt was made with the help NIC Pune and Department of Revenue and Land records to collect the computerized data and process it.

This census work includes, operational holdings, size class, tenancy status, gender and social category.

The information from this booklet can be extensively utilized in various government departments, semi-government and government organizations. This information will also be useful for researchers, economists, planners & developmental programmers.

I express deep sense of gratitude and thanks to Hon. Additional Chief Secretary, Revenue and forest department for guidance and support in using computerized land records for agricultural census work. Without the guidance and support of Hon. Additional Chief Secretary, Agriculture & Marketing, GOM, we will not be able to complete the Census work in time and in sophisticated manner, so I express deep sense of gratitude and thanks to him also. I appreciate involvement of field staff of revenue department for their active participation in collection and correction of data in time.

The talathis to whom the responsibility of collecting the appropriate data was entrusted have done excellent job during the census period.

The initial work of planning and organization of the scheme was completed during the tenure of Shri. D. B. Sapre, Ex. Dy. Commissioner(Agril. Census) & Shri. D. D. Wakure, Dy. Commissioner (Agril. Census). They successfully monitored the computerized work at all places in the districts with the help of NIC and BOT vendors. They played major role in timely completion of the census work.

The Agriculture Census Officers / Staff completed the work of compilation of tables and drafting of this report. I would therefore, like to place on record the excellent services rendered by the present and previous officers and the staff of Agriculture Census Cell.

The NIC, New Delhi and NIC, Pune took keen interest and efforts in the development of computerized programme and guidance in the electronic processing of the data all the time.

I am also grateful to the officers of Government Of India for their guidance and help in the conduction of Agricultural Census Programme in the state.

Commissioner Agriculture,
Maharashtra State, Pune.

Place : Pune.
Date : 12 September 2014.

FOREWORD

I am happy to place on record the 9th Agricultural Census report of Maharashtra State for the year 2010-11.

Operational holding is the basic unit of decision making in agriculture and therefore for formulation of any meaningfull and effective strategy for agriculture development, detailed data on structure of agricultural holdings are absolutely necessary. The census data fills in this longfelt gap in agricultural statistics. The holding wise information is having considerable utility in planning of agricultural production programmes.

The Agricultural Census 2010-11 is the ninth census in the state. As in the previous censuses & in this census also it was found that the number of small & marginal holdings (below 2.00 ha.) increased and that now they accounted for about three fourth *i.e.* 78.54% of the total operational holdings in the state, but with a share of 45.13% in the total operated area.

Another important features in this census was that the average size of holdings has come down from 1.66 ha. which was in 2000-01 to 1.44 ha. as in 2010-11 census.

Point to be noted here is that, per capita size of holding is decreased by 0.20 ha. in this census due to decrease in operated area and increase in the total number of holders.

The staff of revenue department was entrusted with the field work and supervision. Without their active co-operation, it would have been difficult to complete the census work. I wish to place here my deep feelings with gratitude.

I recall with gratitude the valuable services rendered by the staff of NIC, New Delhi associated with the agriculture census computarisation and tabulation work.

Shri. Umakant Dangat, Commissioner Agriculture, Maharashtra State, Pune has taken deep interest and provided useful guidance from time to time. Mr. D. B. Sapre, Ex. Deputy Commissioner & Mr. D. D. Wakure, Deputy Commissioner, Agriculture Census and his staff in the census cell exerted a great deal in organizing and completing the voluminous work of agricultural census work 2010-11.

I hope information in the reports will be most useful in decision making in government sector as well as in planning, extension work and in research work.

Agriculture Census Commissioner,
& Additional Chief Secretary,
(Agriculture & Marketing)
Govt. of Maharashtra,
Mantralaya, Mumbai - 32.

Place : Pune.
Date : 12 September 2014.

Technical Notes

1. Definitions

Operational Holding :

All land which is used wholly or partly for agricultural production and is operated as one technical unit by one person alone or with others without regard to the title, legal form, size or location.

Technical Unit :

An unit of land which is under the same management and has the same means of Production such as labour force, machinery and animals.

Operated area :

Operated area includes both cultivated and uncultivated area, provided part of it is put to agricultural production during the reference period. If, for instance, an operational holding consists of four survey numbers out of which one survey number is put to non-agricultural uses, the total area of the operational holding will be equal to the total geographical area of all the four survey numbers.

Operational holder :

A person who has the responsibility for the operation of the agricultural holding and who exercises the technical initiative and is responsible for its operation. He may have full economic responsibility or may share it with others. The operational holder maybe Individual/Joint/ Institutional.

I. ***Individual :*** If the holding is being operated either by one person or by a group of persons who are the members of the same household, such holding will be considered as an individual holding.

II. ***Joint :*** If two or more persons belonging to different households, share jointly as partners in the economic and technical responsibility for the operation of an agricultural holding, such holding will be considered as joint holding.

III. ***Institutional :*** Holdings such as government farms, farms of sugarcane factories, co-operative farms, lands managed by trusts would be treated as institutional holdings.

Size classes and Size groups of Holdings:

The data are presented at All India level and for all States and Union Territories in the following size classes and size groups of operational holdings

Sr. No.	Group	Sr. No.	Classes (in ha.)
I.	Marginal	1.	Below 0.50 ha
		2.	0.50-1.00
II.	Small	3.	1.0–2.0 ha.
III.	Semi-medium	4.	2.0–3.0 ha.
		5.	3.0–4.0 ha.
IV.	Medium	6.	4.0-5.0 ha
		7.	5.0-7.5 ha
		8.	7.5 ha -10.0 ha
V.	Large	9.	10.0–20.0 ha
		10.	20.0 and above

2. Sampling design

For the collection of data in the Agriculture Census, an approach of Census-cum sample survey has been adopted. Various States in the country have been grouped in to two categories *i.e.* land record States and non-land record States. Those States where Comprehensive land records are maintained giving information on land and its utilization, cropping pattern etc are called land record States and those States where such information is not maintained in the form of land-records are called non land record States. In land record States data on Agriculture Census is pooled for all the parcels of an operational holding irrespective of its location. However, for operational convenience the outer limit for pooling is restricted to taluka. This pooling is done for each operational holder in the village of his residence. In the non-land record States the data is collected through sample survey following household enquiry approach in 20% of villages in each block. In these selected villages, all the operational holdings are enumerated following household enquiry approach.

Thus in land record States no sampling is resorted to for data collection for the number and area of operational holdings and in non-land record States sampling of villages in each block/taluka is resorted to.

3. Attributes of disaggregation

This report contains the number and area of operational holdings distributed with reference to the following variables:

- Size category (Marginal, Small, Semi-medium, Medium and Large)
- Social groups (SC, ST and Others)
- Types of Holding (Individual, Joint, Institutional)
- Gender (Male, Female)
- States (all districts)

Maharashtra State Report on Number and Area of operational holdings – 2010-11

1. Introduction:-

The department of Agriculture, ministry of Agriculture, Government of Maharashtra, conducts Agriculture census, quinquennilay to collect data on operational holdings in the state. The reference period for Agriculture census is the Agricultural year (July2010 to June 2011). Being the ultimate unit for taking Agriculture related decision, operational holdings has been taken as statistical unit at micro level to data collection.

The first agriculture census in the state was conducted with reference year 1970-71. So far , eight Agriculture Census have been conducted in the state. The current Agriculture Census with reference year 2010-11 is 9th in the series.

The provisional result for first pores of correct census we released at state in October 2012. After scrutinizing the result at district/ Tahsil level. This data base has now been finalized out is being published in the form of Maharashtra State Report on numbers and area of operational holdings 2010-11.

2. Methodology

2.1 Agriculture Census is the largest countrywide statistical operation undertaken by the Ministry of Agriculture, Government of India for collection of data on the structural profile of Indian agriculture. The first Agriculture Census in the country and also in Maharashtra state was conducted with reference year 1970-71. So far eight Agriculture Censuses have been conducted at five yearly intervals. The ninth Agriculture Census is presently going on in country and also in Maharashtra state.

2.2 This report presents the summary results obtained during Phase-I of the ninth Agriculture Census with reference year 2010-11 (July to June). Phase-I of the census operation is carried out for all the agricultural operational holdings in the State.

2.3 The Census is carried out in three Phases. In Phase-1, a list of all the holdings with data on primary characteristics like area, gender and social group of the holder and its location code etc. are prepared. During Phase-II detailed data on irrigation status, tenancy particulars, cropping pattern, number of crops taken etc. are collected. Phase III, popularly known as Input Survey, relates to collection of data on the pattern of input use across various crops, regions and size groups of holdings.

2.4 In Maharashtra state where the revenue agency maintains the record of ownership of holdings and regular crop inspections are carried out, such records form the basis for conducting Phase-I of the Census operations. For Phase II, further sampling of holdings is carried out for collection of detailed data.

2.5 In the Maharashtra state, the data on the number and area of holdings is collected in the specified schedules using the land records as benchmark. However, as per the concepts and definitions followed in the Census, effort is made to obtain the de facto position rather than de jure position. A number of parcels of land scattered within a tehsil but operated by an individual or a single household are clubbed together to make a single holding. Similarly, such holdings on which partitions had taken place in practice, though not legally, are counted as separate holdings. The list of operational holdings is manually sorted according to social groups, *viz*. SCs, STs and others, of the

holder and size of the holding at village level. Collection of the data on number and area of Operational holdings according to gender of the holder were introduced for the first time during 1995-96 Census. Various tables prepared at village level are aggregated at Taluka, District, State and finally at all State level.

3. The Highlights of the Report on Number and Area of Operational Holdings, 2010-11 :

3.1 As per the Agriculture Census, 2010-11, the total number of operational holdings in the Maharashtra state has increased from 121 Lakh in 2000-01 to 136 Lakh 2010-11 i.e. an increase of 12.86%.

3.2 There is a marginal decrease in the operated area from 201.02 lakh ha. In 2000-01 to 197.67 lakh ha. in 2010-11 showing an decrease of 1.67%.

3.3 The average size of operational holding has declined to 1.44 ha. in 2010-11 as compared to 1.66 ha. in 2000-01.

3.4 The percentage share of female operational holders has decreased from 15.54 in 2000-01 to 14.98 in 2010-11 with the corresponding operated area of 13.58 and 13.08.

3.5 The small and marginal holdings taken together (below 2.00 ha.) constitute 78.54 percent in 2010-11 against 73.42 in 2000-01and the operated area at 45.13 percent in the current Census as against the corresponding figure of 38.68 percent in 2000-01.

3.6 The semi-medium and medium operational holding (2.00 ha. – 10.00 ha.) in 2010-11were 20.93 percent with the operated area at 49.33 percent. The corresponding figures for 2000-01Census were 25.86 and 54.67 percent.

3.7 The large holdings (10.00 ha. & above) were 0.53 percent of total number of holdings in 2010-11 with a share of 5.55 percent in the operated area as against 0.72 percent and 6.66 percent respectively for 2000-01Census.

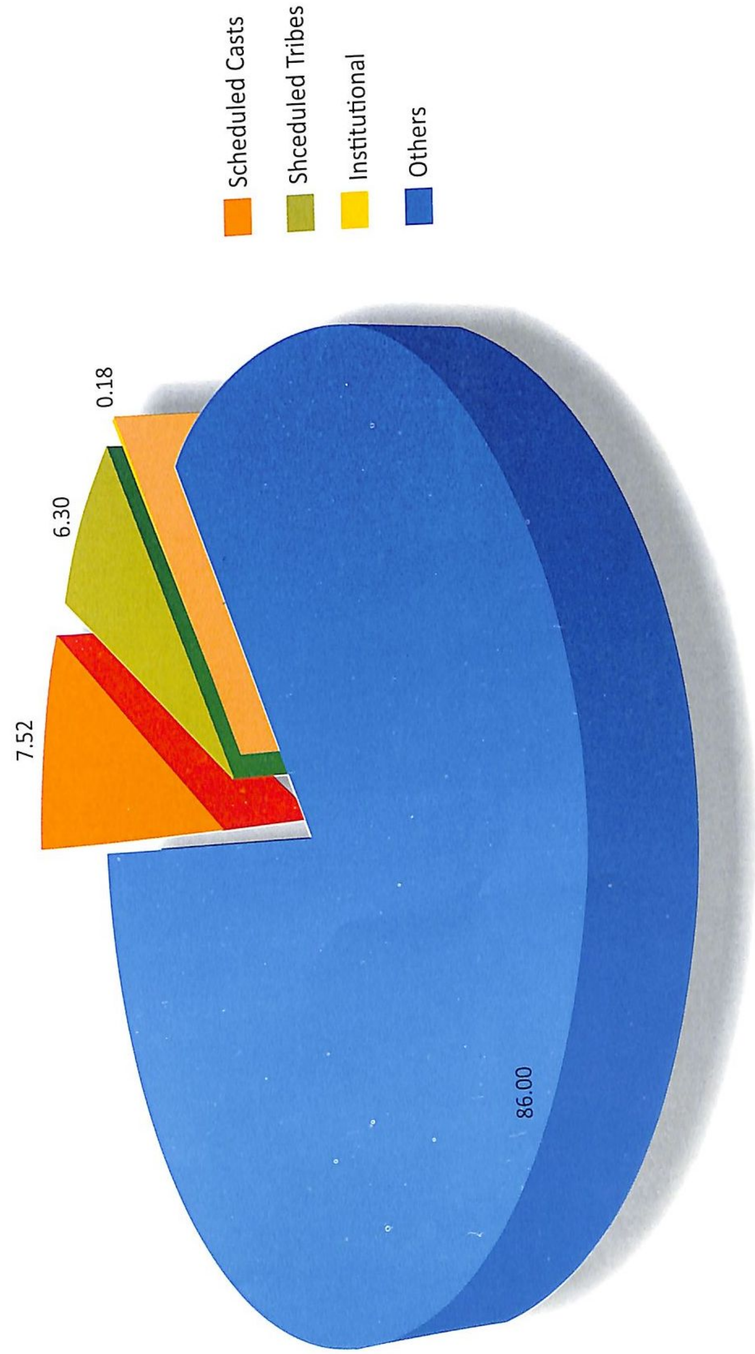

3.8 In a total of 136.98 lakh operational holdings in the State, the highest number belonged to Ahmednagar District (9.56 lakh) followed by Satara (8.62 lakh), Pune(7.43 lakh), Solapur(6.67 lakh), Beed (6.51 lakh), Nashik (6.42 lakh), Kolhapur (6.38 lakh),Sangali (5.38 lakh), Aurangabad (5.29 lakh), Ratnagiri (4.53 lakh) etc. with the lowest number of only 1.34 lakh operational holdings in Gadchiroli District.

3.9 Out of a total of 197.67 lakh hectares operated area in the Maharashtra State in 2010-11, the highest contribution was made by Solapur District (12.60 lakh ha.) followed by Ahmednagar (12.58 lakh ha.), Pune (10.50 lakh ha.), Nashik (9.82 lakh ha.), Beed (8.66 lakh ha.), Yavatmal (8.32 lakh ha.), Nanded (8.26 lakh ha.) etc. with the lowest operated area of 2.06 lakh hectares in Gondia District.

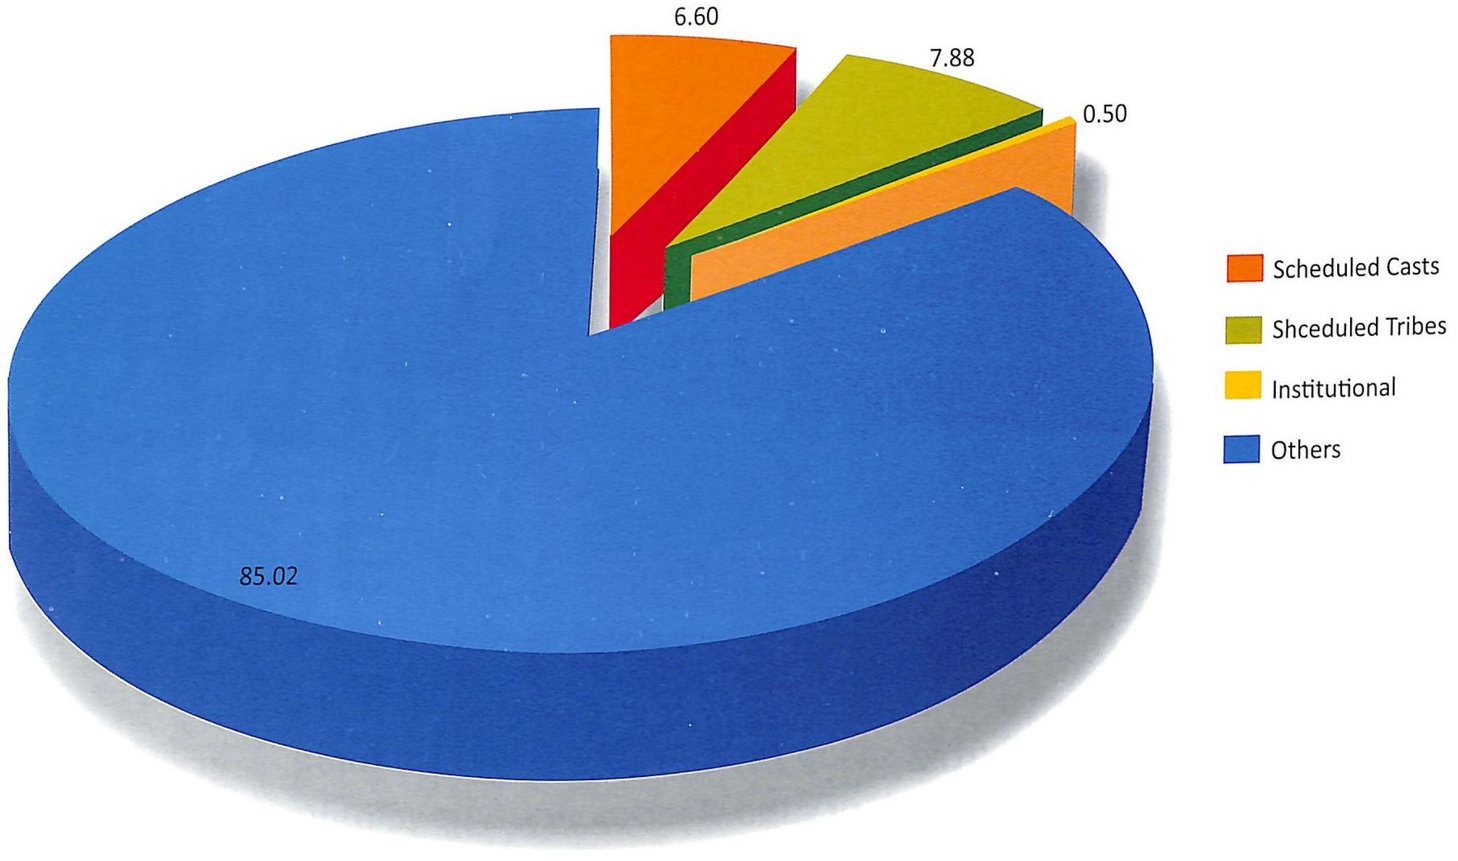

3.10 As compared to 2000-01, percentage variation in number of operational holdings in 2010-11 was highest in case of Ratnagiri District (35.03 percent) followed by Chandrapur (30.40 percent), Latur (27.22 percent), Gondia (27.01 percent), Washim (25.20 percent), Amaravati (22.64 percent), Osmanabad (22.31 percent), Aurangabad (21.83 percent), Akola (20.61 percent) etc. However, operated area showed declining trend in most of the districts.

3.11 A set of tables giving Maharashtra States distribution of number of holdings and area operated and the District-wise breakup of distribution of the number of operational holdings and area operated by major size groups is presented in the tables that follow.

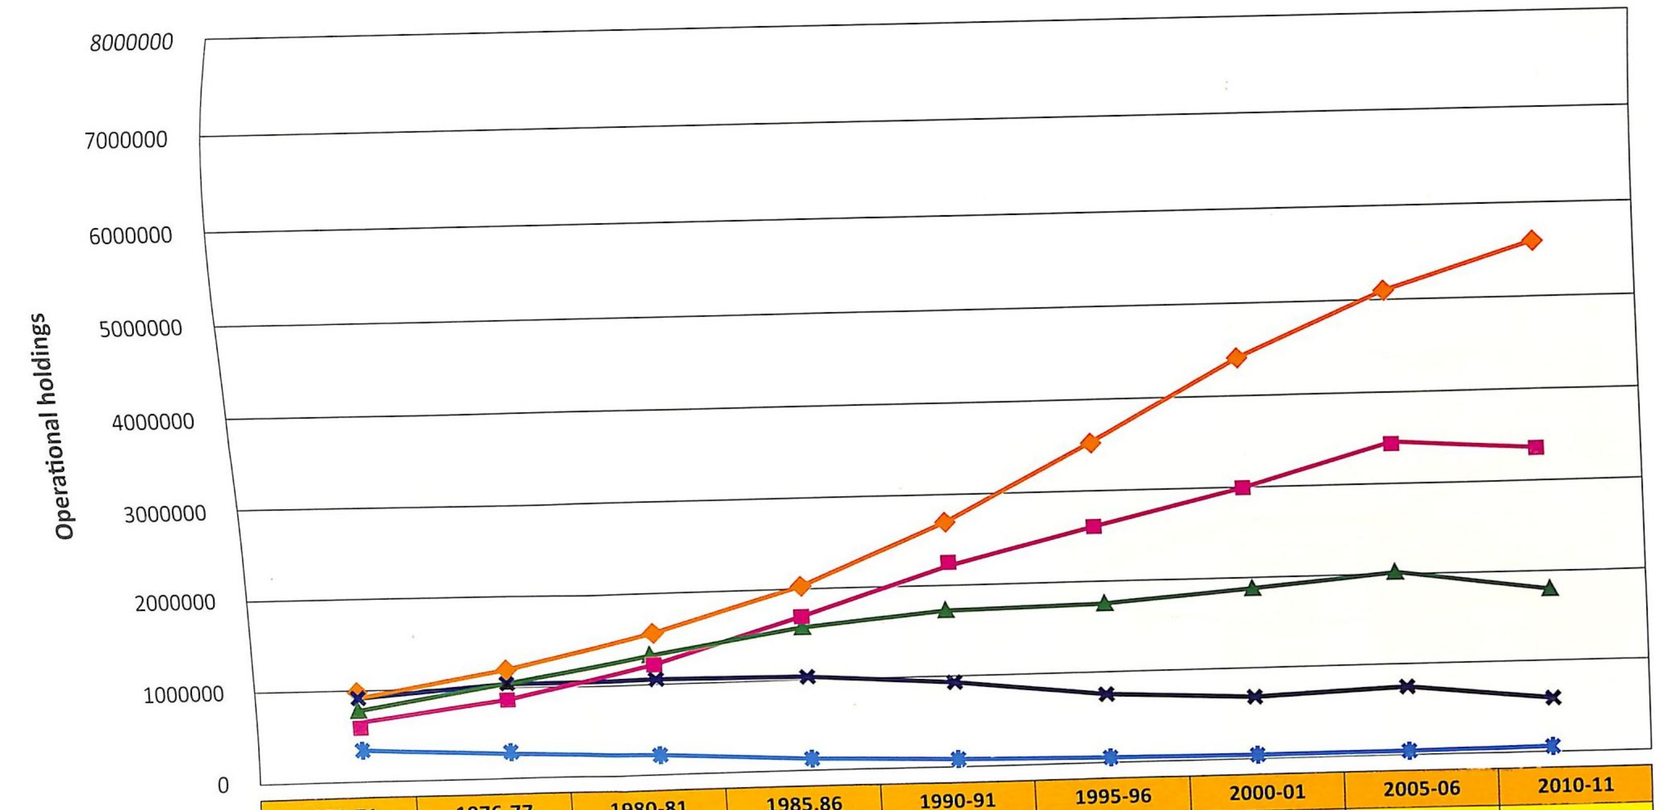

Percentage share of different social groups in number of operational holdings as per Agriculture Census 2010-11
